Regional Climate Summary

November 2021

November was another abysmally dry month with little to no precipitation accumulating throughout our region. November began with cool, drizzly, and foggy weather in the Permian Basin from the 2nd-6th. Lea County and the Marfa Plateau experienced their first fall freeze during this stretch. The warmth returned in a big way from the 7th-10th with many locations reaching high temps in the 80s. Another stretch of abnormally warm temps occurred from the 15th-17th including a record tying high of 84°F at MAF on the 15th. The entire region finished the month with above normal average temperatures and around 5-25% of normal precipitation. Midland saw its first freeze of the season on the 22nd which was 11 days past the normal first freeze date.
