

F-0 Tornado at Canova Beach August 4, 2004

Under westerly steering flow, a band of showers and thunderstorms moved from central Florida and rapidly intensified as they approached the Brevard County coast line. An F-0 tornado touched down and then quickly dissipated in Canova Beach near Lee Street and Harris Blvd., about a block west of US A1A. Eyewitnesses described the event lasting only about 20 to 30 seconds just before 2:00 pm EDT.

The tornado destroyed an aluminum roof porch, knocked out power, blew down fences and sheds, and scattered lawn furniture.
