              Other NWS Partners, Users and Employees

From:         Stephen Bieda III, Ph.D, Chief  
              Severe, Fire, Public, and Winter Weather Services Branch

Subject: Updated: Soliciting Comments through December 5, 2023 on the  
Discontinuation of the Max/Min Temperature and Precipitation Table Product  
(RTP) for all NWS Southern Region Offices

Updated to correct list of alternative websites providing data contained  
in the RTP.

The Max/Min Temperature and Precipitation Table Product (RTP) is a text  
product providing the maximum/minimum temperatures and precipitation  
totals for a sub-state region, an entire state, or a multi-state region.  
The RTP table is used by national centers and local media. Weather  
Forecast Offices, in coordination with their local users and Regional  
Headquarters, will determine the regional extent of this product and which  
WFOs will issue substate, multi-state, or state product(s). This product  
is not issued by all Weather Forecast Offices (WFOs).

The information contained in the RTP duplicates information contained in  
other text products as well as various web sites and NWS application  
programming interfaces (API).

WFO local products providing the data contained in the RTP product  
include:

- \* PNS Text Products for summaries of temperatures and precipitation during  
significant weather events (Public Information Statement)
- \* RER Text Products for record event reporting (Record Event Report)
- \* CLI Text Products for routine climate reports (Daily Climate Report)
- \* RR3 Text Products for cooperative observations (Hydrometeorological Data  
Report)
- \* MTR Text Products for routine METAR observations with temperature and  
precipitation data

Alternative websites providing the data contained in the RTP product  
include:

- \* NOAA Online Weather Data - <https://www.weather.gov/climate>
- \* NWS Weather API: <https://www.weather.gov/documentation/services-web-api>
- \* Aviation Weather Center API: <https://aviationweather.gov/data/api/#/>

The weather enterprise and private sector companies may also provide tailored services.

Offices for which Regional Max/Min Temperature and Precipitation (RTP) Products are proposed to be discontinued:

Office Name -----	AWIPS ID -----	WMO Header -----
Albuquerque, NM	RTPABQ	ASUS65 KABQ
