              Other NWS Partners, Users and Employees

From:         Douglas C. Young, Chief  
              NWS Digital and Graphical Information Support Branch

Subject: Changes to NOAA Weather Radio All Hazards (NWR) Radio Frequency for Safford, AZ (KXI24): Effective on or about November 18, 2024

Effective on or about November 18, 2024, the radio frequency for the NWR transmitter Station KXI24, located in Safford, AZ, currently operating on a frequency of 162.550 MegaHertz, will change to 162.475 MegaHertz. The transmitter is operated by the Tucson, AZ Weather Forecast Office (WFO), and will be temporarily unavailable during the radio frequency change.

Emergency Alert System (EAS) participants currently monitoring this NWR transmitter for weather warnings should change their frequency on or about November 18 to ensure no degradation of service.

NWR listeners currently using receivers equipped with Specific Area Message Encoding (SAME) will not need to change their SAME programming.

Station KXI24, Safford, AZ, 162.475 MegaHertz:

County	SAME Location Code
=====	=====
Graham, Arizona	004009
Greenlee, Arizona	004011
Cochise, Arizona	004003
NW Cochise, Arizona	104003
NW Cochise, Arizona	304003
SW Cochise, Arizona	704003
SE Cochise, Arizona	904003
