

May 2-3, 2014 Heavy Rain Event

A slow-moving frontal boundary over west-central and southwest Florida produced areas of flooding rainfall during the late morning and afternoon hours on May 2, 2014. After a brief break, the rain continued through the overnight and into the day on May 3rd. The hardest hit area was Hillsborough County, namely around Busch Gardens and Temple Terrace where numerous reports of road closures and street flooding were received. The University of South Florida saw significant flooding on the campus. The two images below show radar estimated rainfall totals from the two-day rain event. Observed rainfall totals are also listed below the images.
