STATISTICS RELATING TO RECORD COPIES RECEIVED BY THE INTERNATIONAL BUREAU

GUIDANCE NOTE CONCERNING STATISTICS

Certain codes are used in the statistical tables to indicate the identity of receiving Offices and of designated States. These codes have been taken from the "Code for Identifying States and Organizations" contained in Annex B* to the Administrative Instructions under the Patent Cooperation Treaty (PCT). The codes and the States to which they refer are set out at the foot of this note.

In the case of receiving Offices, the codes indicate the Contracting State of the Patent Cooperation Treaty (PCT) for which the receiving Office is the national industrial property office except in the case of the European Patent Office which acts (as well as the national industrial property office) as receiving Office for the Contracting States of the PCT which are also party to the European Patent Convention. In the statistical table relating to the designations of States, the figures shown relate to the indications as to designations contained in the record copies as received by the International Bureau of WIPO and notified by it to the designated Offices. Against the code of each designated State, the abbreviations "NAT" and/or "EPO" and/or "OAPI" are indicated. These abbreviations mean that, for the designated State, a national patent ("NAT") and/or a European patent ("EPO") and/or a patent granted by the African Intellectual Property Office ("OAPI") is sought.

UPDATED LIST OF PERIODICALS ESTABLISHED
UNDER PCT RULE 34.1(b)(iii)

prepared by the International Bureau
following the decision of the PCT/CTC at its eighth session

"MINIMUM DOCUMENTATION" UNDER RULE 34.1(b)(iii) OF THE
REGULATIONS UNDER THE PATENT COOPERATION TREATY (PCT)

The International Searching Authorities have agreed that for the purposes of PCT Rule 34.1(b)(iii), the published items of non-patent literature to be included in the PCT "minimum documentation" should be the items published in the periodicals listed below during the five-year period preceding the time at which an international search report is established, it being understood that an International Searching Authority would not be precluded from consulting issues of the said periodicals published prior to the beginning of the said five-year period. The list is preceded by explanatory notes facilitating an understanding of the indications contained in the list.

The list was originally agreed upon at a meeting held in Geneva on April 12, 1978. The present list was agreed upon by the International Searching Authorities at a meeting held in Geneva on December 2, 1983, and came into force on January 1, 1985. The list is republished here to take account of changes, e.g. publisher's names and addresses, that have been notified to the International Bureau since the last publication of the list in PCT Gazette No. 15/1984.

EXPLANATORY NOTES

1. The structure of the list is as follows:

- (i) periodicals in the list are numbered consecutively by a PCT Identification Number (but see note 2(v) below);
- (ii) each entry is concerned with one periodical only and gives for each periodical
 - the original title of the periodical
 - the publisher
 - the address of the publisher;
- (iii) the language of the periodical is indicated opposite the title of the periodical as follows:

"De" for German	"Nl" for Dutch
"En" for English	"Pt" for Portuguese
"Fr" for French	"Ru" for Russian
"It" for Italian	"Sp" for Spanish
"Ja" for Japan	"Sv" for Swedish;
- (iv) where the periodical is published in two or more parts, or sections, these are indicated below the title (with a short indication of the fields covered by each one, if not obvious from their subtitle);
- (v) the International Standard Serial Number (ISSN) is given for each periodical or for each section where the periodical is published in two or more parts, so as to assist identification of each periodical or section;
- (vi) where the publication of a periodical has been discontinued, the title of the periodical is shown inside square brackets and the date of discontinuation indicated;
- (vii) where a periodical has been deleted from the list, the title of the periodical and its Identification Number are enclosed in square brackets together with an indication of the date of deletion.

2. The titles of the periodicals are arranged alphabetically, subject to the following:

- (i) a periodical added to the list after it was originally established appears at the end of the list together with an indication (in square brackets) of the date when the periodical was so added. However, a cross reference, in alphabetical order, is inserted (in parentheses) in the body of the list itself;
- (ii) where the title of the periodical contains the name of a learned society, association, or organization, etc., the periodical appears in the listing under the name of the learned society, association, or organization, etc., e.g. "Journal of the Americal Ceramic Society" appears under "American Ceramic Society, Journal";

- (iii) the only secondary publication included as an exception in this list is indicated under Identification Number 169;
- (iv) when several editions of a periodical exist in different languages (e.g., by cover-to-cover translation), the periodical is listed according to the title of the English edition, if any, together with the original title in parentheses. If no English edition exists, the original title is used for the purposes of the alphabetical list;
- (v) where the title of a periodical has changed, both the new title and the former title (in parentheses) are given in the alphabetical listing, the PCT Identification Number allotted to the periodical remaining unchanged.

3. The names of Japanese publishers are indicated in English, followed by transliteration of the Japanese name into Latin characters in parentheses.

4. The names and addresses of the publishers of the original editions of Russian periodicals are indicated below the names and addresses of the publishers of cover-to-cover translations into English. The language of each edition of the periodical is indicated, in this case, according to the respective publishers.

5. Whenever the periodical contains, in addition to full-text articles in the language, or languages, in which it is published, translations of abstracts, or of abstracts and part of the text, into other languages, this fact is indicated by an asterisk next to the indication of the languages.

RECEIVING OFFICES

Residents of the Contracting States of the European Patent Convention can file international applications either with the national Office or with the European Patent Office. The applicant's choice of the European Patent Office as receiving Office, however, is limited in the countries indicated below as follows (there are no limitations as far as Austria, Liechtenstein, the Netherlands and Switzerland are concerned):

BE A resident of Belgium must file an international application which may be of interest for national defence or security with the Industrial Property Office (Belgium).

DE An applicant from the Federal Republic of Germany, under Section 93 of the Penal Code, must file an international application which contains a state secret with the German Patent Office unless he obtained written authorization from the Ministry of Defence of the Federal Republic of Germany.

FR A resident of France may file direct at the European Patent Office only if he is claiming priority of an earlier application filed in France at the National Institute of Industrial Property.

GB A United Kingdom resident may only file direct at the European Patent Office

(i) after having obtained written authorization from the Patent Office (London)
or

(ii) after an application for a patent for the same invention has been filed in the Patent Office (London) and not less than six weeks have elapsed without the Comptroller of the Patent Office (London) giving a direction prohibiting publication of the invention.

These restrictions do not apply to an application for a patent for an invention for which an application for a patent has first been filed in a country outside the United Kingdom by a person resident outside the United Kingdom.

IT A resident of Italy may only file direct at the European Patent Office with the authorization of the Ministry for Industry, Commerce and Handicraft, except if the international application claims the priority of a national application filed in Italy over 90 days previously and such application has not been made subject to the official secrets regulation.

LU A resident of Luxembourg must file an international application for an invention which may be of interest for national defence with the Intellectual Property Office (Luxembourg).

SE A resident of Sweden may file an international application concerning a defence invention direct with the European Patent Office only if it has been classified by the defence authorities of Sweden as not being of a confidential nature.

Switzerland

The Swiss Federal Intellectual Property Office has informed the International Bureau of certain changes in the Swiss Patent Regulations with effect from January 1, 1987, as follows:

Time when the name and address of the inventor must be given if Switzerland is designated:

May be in the request or may be furnished within 20 months from the priority date; however, continuation of the procedure may be requested in case of failure to observe that time limit.

Does the Office disregard the priority claim if the priority document was not submitted within 16 months from the priority date under PCT Rule 17.1?

Yes, the priority claim will be disregarded; however, the priority right can be re-established where, within a time limit of two months from the official notification of the loss of the priority right, the priority document is furnished and a fee equal to the amount of the fee for the continuation of the procedure is paid.

References to deposits of microorganisms:

The indications prescribed in PCT Rule 13bis.3(a)(i) to (iii) may be furnished within the 16-month time limit referred to in PCT Rule 13bis.4.

The furnishing of samples to a third party may be subjected to the condition that that party indicates to the depositary institution its name and address for the purpose of information of the depositor and undertakes:

- (a) not to make available the deposited culture or a culture derived from it to a third party;
- (b) not to use the culture outside the purview of the law;
- (c) to produce, in case of a dispute, evidence that the obligations under paragraphs (a) and (b) have not been violated.

Special requirements of the Office (PCT Article 22(1), second sentence, and Rule 51bis):

The name and address of the inventor, if they have not been furnished in the "Request" part of the international application, must be furnished within 20 months from the priority date; however, continuation of the procedure may be requested in case of failure to observe that time limit.

Federal Republic of Germany

The German Patent Office has informed the International Bureau of certain changes in the national law of the Federal Republic of Germany concerning both patents and utility models with effect from January 1, 1987, as follows:

Types of protection available:	National: patents, patents of addition, utility models (a utility model may be sought instead of or in addition to a national patent).*
National fee:	If the filing fee for a patent or a utility model has not already been paid within the time limit applicable under PCT Article 22 or 39(1), the Office will invite the applicant to pay the filing fee within a time limit of one month after receipt of that invitation.
Special requirements of the Office (PCT Rule 51bis):	If the international application is for a patent and a utility model, the translation must be furnished in duplicate.

* With effect from January 1, 1987, the former auxiliary utility model application system has been abolished, and auxiliary utility model applications are no longer admissible. However, the following new system applies: A utility model application concerning the subject matter of an earlier national, international or European patent application for a national or European patent for the Federal Republic of Germany may claim the filing date of that earlier patent application provided the utility model application is filed before the expiration of two months from the date of rejection, withdrawal or grant of the patent application or before the expiration of eight years from the filing date of that patent application, whichever is earlier. Any priority which is claimed in the earlier patent application under the Paris Convention for the Protection of Industrial Property will apply also to the subsequent utility model application.

CONTRACTING STATES

States Party to the Patent Cooperation Treaty (PCT)

On November 26, 1986, Benin deposited its instrument of accession to the Patent Cooperation Treaty (PCT). Thus, Benin will become the 40th Contracting State of the PCT on February 26, 1987.

Consequently, as from February 26, 1987, nationals and residents of Benin will become entitled to file international applications under the PCT, and, from the same date, it will be possible to file international applications designating Benin. Since Benin is a member State of the African Intellectual Property Organization (OAPI), such designation has the effect of a designation of that country for the purposes of a regional patent issued by OAPI in Yaoundé, Cameroon.

SECTION IV

NOTICES AND INFORMATION OF A GENERAL CHARACTER

REFERENCES TO DEPOSITS OF MICROORGANISMS

Denmark, Finland, Norway

Pursuant to PCT Rule 13bis.7, the Danish Patent Office, the National Board of Patents and Registration of Finland and the Norwegian Patent Office have notified the International Bureau of amendments to footnotes (11), (12) and (13), relating to the table concerning references to deposits of microorganisms, contained in Annex M1, published in PCT Gazette No. 15/1986. The penultimate sentence of each of the said footnotes is to be replaced by the following sentence:

"If such a request has been filed by the applicant, any request made by a third party for the furnishing of a sample shall indicate the expert to be used."

Sweden

Pursuant to PCT Rule 13bis.7, the Royal Patent and Registration Office of Sweden has notified the International Bureau of amendments to the table concerning references to deposits of microorganisms, contained in Annex M1, published in PCT Gazette No. 15/1986, as follows:

3rd column (Time Earlier Than
16 Months From The Priority Date):

In the case of (A): where applicant requests publication earlier than 16 months from the priority date, not later than that request
In the case of (B): at the time of filing (as part of the application)

4th column (Depositary Institutions):

See footnote (1), below: footnote (14), below, also applies

Footnote (14): Swedish Patent and Registration Office: the applicant may request that, until the application has been laid open to public inspection (by the Royal Patent and Registration Office), or has been finally decided upon by the Royal Patent and Registration Office without having been laid open to public inspection, the furnishing of a sample shall only be effected to an expert in the art. The request to this effect shall be filed by the applicant with the International Bureau before the expiration of 16 months from the priority date (preferably on the Form PCT/RO/134 reproduced in Annex M3 of Volume I of the PCT Applicant's Guide). If such a request has been filed by the applicant, any request made by a third party for the furnishing of a sample shall indicate the expert to be used. That expert may be any person entered on a list of recognized experts drawn up by the Royal Patent and Registration Office or any person approved by the applicant in the individual case.
