

AGENDA

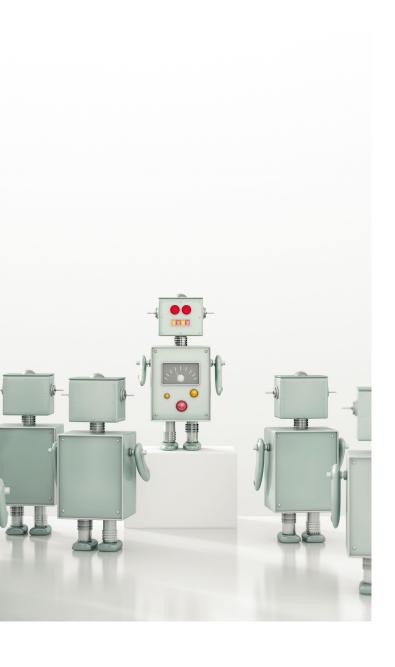

INTRODUCTION to AI

Al in transportation

Future of AI in transportation

HISTORY OF AI

- CONCEPT OF AI STARTED IN THE 1950S BY ALAN TURING
- IN THE 1960S AND 70S, AI WAS MAINLY FOCUSED ON PROBLEM SOLVING AND SYMBOLIC METHODS
- 1980S RISE OF MACHINE LEARNINGWIH ALGORITHMS, THE START OF DECISION MAKING
- 1990S AND 2000S ADVANCE MACHINE LEARNING TECHNIQUES AND DEEP LEARNING
- TODAY- CAN BE PART OF EVERYDAY LIFE, COMPUTERS, PHONES, AND ETC.

GENERATIVE ALAT WORK

Automate up to 29.5% of work hours in the US economy by 2023 (Mckinsey)

Up to 92% of programmers are using AI tools (Github)

57% of knowledge workers are using at work monthly, and 40% once a week (Flexos)

By 2025, 50% of Software Engineering Leader roles will explicitly require oversight of Generative AI (Gartner)

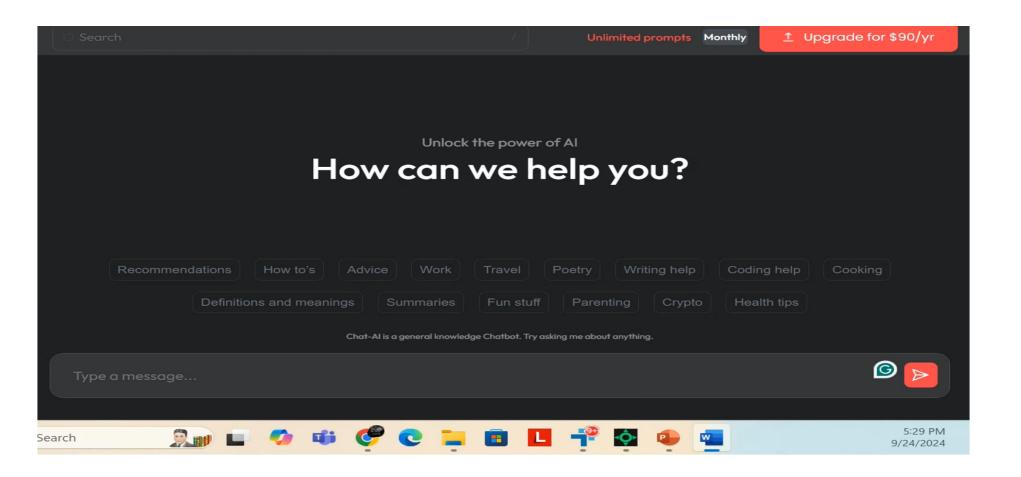

2/3 of content creators are currently using Generative AI (Descript)

Generative AI can increase the productivity of skilled workers by up to 40% (MIT)

AI IN TRANSPORTATION INDUSTRY

WHERE ARE WE NOW?

QUICK EXAMPLE

HOW IS AI BEING USED TODAY IN TRANSPORTATION

- Route optimization
- Fleet management
- Predictive Maintenance
- **Passenger Safety**
- Ticketing and payment systems Environmental Sustainability
- AI in Accessibility

- Customer Service
- Scheduling and Dispatch
- Traffic Management
- Data Analysis
- Al in Emergency responses

THE FUTURE OF ALIN TRANSPORTATION

- Autonomous Vehicles
- Better Traffic Management
- Enhanced Safety
- Personalized Travel Experience
