

Commercial Fertilizer Product Registration (Form 4300B)

A completed Application for Registration (WSDA form 4300A) must accompany this form
Please read all instructions on Page 2 before completing this form

Company Information													
Company Name						WSDA Company Number			Date				
Product Information													
Brand Name						Product Name							
Product Usage (Select one): <input type="checkbox"/> Home <input type="checkbox"/> Commercial <input type="checkbox"/> Commercial & Home Package Type (Select all that apply): <input type="checkbox"/> Bulk <input type="checkbox"/> Packaged <input type="checkbox"/> Dry <input type="checkbox"/> Liquid Does this product contain pesticides? <input type="checkbox"/> Yes <input type="checkbox"/> No EPA/WSDA Pesticide Registration Number:													
Guaranteed Analysis (%)													
N		Ca		B		Cu		Mo		Lime			Gypsum
P ₂ O ₅		Mg		Cl		Fe		Na		CaCO ₃	MgCO ₃	CCE	CaSO ₄ .2H ₂ O
K ₂ O		S		Co		Mn		Zn					
Maximum Labeled Rate of Application													
Maximum rate of: _____ <input type="checkbox"/> lbs. <input type="checkbox"/> ounces <input type="checkbox"/> gallons* <input type="checkbox"/> quarts* <input type="checkbox"/> pints* <input type="checkbox"/> fl. oz.* <input type="checkbox"/> cubic feet* per: _____ <input type="checkbox"/> Acres <input type="checkbox"/> Sq. Ft. _____ times every _____ <input type="checkbox"/> days <input type="checkbox"/> weeks <input type="checkbox"/> months <input type="checkbox"/> years *Density: _____ lbs. per: <input type="checkbox"/> gallon <input type="checkbox"/> cubic foot													
Guaranteed Maximum Metals Concentration (PPM)													
As	Cd	Co	Hg	Mo	Ni	Pb	Se	Zn					
Enter a value greater than or equal to the result or detection limit (whichever is greater). ND, BDL, MDL, zero and left blank are <u>not</u> permitted.													
Ecology Information													
1. Does this product contain waste ingredients? <input type="checkbox"/> Yes <input type="checkbox"/> No 2. Is this product a micronutrient fertilizer? ** <input type="checkbox"/> Yes <input type="checkbox"/> No ** (does not guarantee N, P ₂ O ₅ , K ₂ O, Ca, Mg, S, CCE)													
										If you answer "Yes" to either 1 or 2, follow the instructions on the most current Ecology Questionnaire for additional testing requirements			

Commercial Fertilizer Product Registration (Form 4300B) — Instructions

A completed WSDA form 4300B is required for registration. An incomplete form will delay the processing of your application.

Company Information:

- **Company Name:** Enter the name of the company as it appears on the Application for Registration (WSDA form 4300A).
- **WSDA Company Number:** You can find your Company Number on your current registration certificate. If you are applying for the first time, leave this box blank.
- **Date:** Enter the date you submit the registration.

Product Information:

- **Product Brand Name and Product Name:** Enter the complete name found on the product label.
- **Product Usage:** Indicate whether the product usage is home, commercial, or commercial & home.
- **Package Type:** Check the package type.
- Dual products require registration as both a Fertilizer and a Pesticide.

Guaranteed Analysis %:

- Enter the values to match the guaranteed analysis on the product label. Do not list values for nutrients not guaranteed on the label.
- The values must be entered as a percentage. Parts per million (ppm) and other methods of measurement are not allowed.
- All limes must include guarantees for calcium and/or magnesium carbonate (CaCO₃ and/or MgCO₃) and calcium carbonate equivalent (CCE).
- Gypsum must include guarantees for calcium sulfate (CaSO₄.2H₂O) and sulfur.

Maximum Labeled Rate of Application:

- If the product label includes application rates, complete this section using the highest rate and maximum number of applications allowed during a growing season. Leave this section blank if the label does not have directions for use.
- Density is required when application rates are expressed as a volume per area (such as gallons per acre).

Guaranteed Maximum Metals Concentration (PPM):

- A value must be entered for each of the nine metals. It must be reported in parts per million (ppm) and must be equal to or greater than (≥) the value found on your laboratory report.
- If the laboratory report indicates ND (non-detect), BDL (below detection limit), or MDL (minimum detection limit), you must enter a value equal to or greater than (≥) the ND, BDL, or MDL.
- To account for variability in source material as well as sampling and analytical variation, many companies choose to report values higher than those found on the laboratory report. This is acceptable as long as the reported value allows the product to meet the established metals standards.

Ecology Information:

- Solid waste is defined in chapters [70A.205 RCW](#) and [70A.300 RCW](#), but does not include biosolids or biosolid products regulated under chapter [70A.226 RCW](#) or wastewater regulated under [chapter 90.48 RCW](#).
- A micronutrient fertilizer is defined as a fertilizer that guarantees B, Cl, Co, Cu, Fe, Mn, Mo, Na, or Zn, but does not guarantee N, P₂O₅, K₂O, Ca, Mg, or S.
- Products containing guano (bat, bird) are always considered waste-derived.
