

## Registration

Potential applicants are Masters and PhD students from in Uzbekistan and other countries in the region (Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, Azerbaijan and Armenia). Applications from post-docs and young faculty members showing proven interest to moving into radio astronomy, with emphasis on CME and type II solar radio bursts, will also be welcome. Deserving candidates from other parts of the world can also apply.

The scientific background of the applicants is the primary criterion to select participants: Scientific background, ability and potential, likelihood of benefiting in research career from attending the workshop, and relationship to relevant home country scientific policies.

Applicants need to provide (i) a CV, (ii) a one-page description of their research to date, (iii) an explanation on how they would use the workshop to further their research, and (iv) a supporting recommendation from their supervisor or head of department. Applications that do not include these four documents will be noncompliant and rejected.

To apply and request financial support please fill:
