RONNIE DANIELS:

Morning, ladies and gentlemen. Welcome to the July 16th MACMR meeting. We're going to commence the meeting at this time.

I would like to ask Commissioner

McLendon to lead us in the Pledge of Allegiance.

(Pledge of Allegiance.)

RONNIE DANIELS:

Thank you. Got a big day today. We're filling a vacant spot that's been vacant for a while. Before we get to that, I'm going to ask Joe to lead us in the prayer.

JOE SPRAGGINS:

Okay. Before we go to prayer, you know, I want to -- obviously, what happened in our country last weekend, we'd like for everyone to take a moment of silence to think about that. Think about Corey Comperatore who gave his life because he was there as an innocent victim just standing there, was there trying to save his family whenever he heard the gunshots. He went to save his family, and so we want to -- I just want to have his family in our prayers today and the two that was injured and also our former president of the United States who was injured. And just

```
1
      know that it was God's will that he is alive for
      us today, and it's God's will that the others are
 2
 3
      alive, and let's don't forget to give him the
 4
      praise and not us. So let's go to the Lord in
 5
      prayer.
 6
                 (Moment of prayer.)
 7
      RONNIE DANIELS:
 8
                All right. Thank you, Joe.
 9
                All right. At this time, we're going to
10
      bring up our new commissioners, Matthew Mayfield,
11
      for the oath of office.
12
      JOE SPRAGGINS:
13
                Matthew, will you come down front, and
      his family, if y'all would like to come with him.
14
15
                 (Oath of office administered.)
16
      RONNIE DANIELS:
17
                Next up, approval of the minutes. Do we
18
      have any discussion on the minutes from July 18th,
19
      2024?
                 (No response.)
20
21
      RONNIE DANIELS:
22
                Do we have a motion to approve?
23
      CAM ROBERDS:
                I'll make a motion to approve the
24
25
      minutes.
```

```
1
      JONATHAN McLENDON:
 2
                 I'll second.
 3
      RONNIE DANIELS:
                All in favor?
 4
                 (Unanimous vote.)
 5
 6
      RONNIE DANIELS:
 7
                All right. Approval of the agenda for
      today as written, do we have any discussion on
 8
 9
      that?
10
                 (No response.)
11
      RONNIE DANIELS:
                Do we have a motion to approve?
12
13
      JONATHAN McLENDON:
                 I will make a motion.
14
15
      RONNIE DANIELS:
16
                 I will second it.
17
                All in favor?
                 (Unanimous vote.)
18
19
      RONNIE DANIELS:
20
                Mr. Joe, turn it over to you.
21
      JOE SPRAGGINS:
                All right. Well, first off, welcome,
22
23
      Matthew, to the commission. And for the ones that
      don't know, Matthew owns a company called Eagle
24
25
      Point Oysters, and, you know, it's one of the
```

first ones that started when we did the off-bottom and started doing off-bottom, the oysters and all. And he has been in this business and been a great asset to the state, so we appreciate it.

I know you have been involved in fisheries most of your life, and as I heard it -- I talked to your wife awhile ago. She said this is something that, I guess, was a lifelong dream. Well, we're proud to make that dream come true, because he's going to be a great asset to the state of Mississippi. It's going -- we're going to note your ability about oysters and understand what we can do, and I know that you'll bring a lot to this table about what we're going to be able to do in the future with oysters. And we thank you so much.

So anything you would like to say?
Thank you so much for being a part of it.
MATTHEW MAYFIELD:

I want to say thank you so much for the kind words, General. I'm really looking forward to it.

JOE SPRAGGINS:

Well, we're really looking forward to having you, and I tell you what -- and we're proud

to have a full commission finally, you know, and so -- thank you, Governor Reeves, for appointing Matthew to this and we appreciate it very much.

All right. Let's see. We've got -- if you have any public comments, TJ is in the back, so make sure you see TJ and get with him if you have any public comments.

All right. We do have one thing. The August meeting is Tuesday, you know, the 20th, I think it is, and we need to look at the possibility of changing that. We have Gulf Council here on the Gulf Coast.

And for the ones that don't know, Jason Osborne, also one of our commissioners, is not here today, and has now been appointed to the Gulf Council, so he is one of three representatives for the state of Mississippi on the Gulf Council and so we're glad to have him there.

So me and Jason both will be out and we'd like to look at a possibility and ask the question, could we look at the 13th or the 27th of August, which -- either one of those dates? Would either one work?

RONNIE DANIELS:

27th would work.

	,
1	JOE SPRAGGINS:
2	All right. 27th. Anybody else?
3	MATTHEW MAYFIELD:
4	Works for me.
5	JOE SPRAGGINS:
6	27th work?
7	CAM ROBERDS:
8	27th works.
9	JONATHAN McLENDON:
10	I'm good either one.
11	JOE SPRAGGINS:
12	Why don't we look, then, at the
13	possibility of changing it to the 27th at 9:00
14	a.m.?
15	RONNIE DANIELS:
16	Do we need to make a motion for that?
17	CRYSTAL MATTA:
18	Yes.
19	JOE SPRAGGINS:
20	I guess we do.
21	STEPHEN ECKERT:
22	Probably be the best idea.
23	RONNIE DANIELS:
24	I would like to make a motion to
25	reschedule the August 20th CMR meeting to

```
1
      August 27th.
 2
      CAM ROBERDS:
 3
                I'll second it.
 4
      RONNIE DANIELS:
 5
                All in favor?
 6
                 (Unanimous vote.)
 7
      RONNIE DANIELS:
                All right. Mr. Joe, that's done.
 8
 9
      JOE SPRAGGINS:
10
                All right. And then we -- the Gulf
11
      Council meeting we just had in Houston 24 through
12
      27 June went pretty well. We are talking more
13
      about what we're going to be able to do with --
14
      especially with the snapper season in the future.
15
      We're working hard to be able to get our MS Creel
16
      working, and we're working to get the test with
17
      it.
18
                And Alabama is doing the Alabama Creel,
19
      you know, to marry up to Louisiana Creel, so we
20
      will have three states in the Gulf working exactly
21
      the same way. Hopefully, this will change what
22
      we'll be able to do in the near future as far as
23
      our number of oysters -- I mean, excuse me, number
24
      of snapper that we will be allowed to catch.
25
      that's something that we have had to go through
```

the process with, but it's working very good. And hopefully that will work out.

We did have appointments to our SSC, and Trevor was re-appointed as one of our representatives and so we're glad to have him.

And Dr. Paul Mickle also was re-appointed, and I'm not sure. I think it was one more. I can't remember who it was, but we have three of them, I think, that are appointed to the SSC for the state, so we're very glad to have them.

All right. Neshoba County, we have got the -- you know if you haven't ever been to Neshoba County, the Neshoba County Fair comes up every year at the absolute hottest time of the year. If the temperature is below 100, you've done something good, and -- but I will tell you what -- on top of that, it's all the hot air that's going on around there.

But anyway, we do have a thing every year. We have been working and having -- we call it a Red Clay and Sand Mixer and it's put on by the Gulf Coast and we have it on a Wednesday night, which is -- we'll have it at one of the cabins and it's right by The Square. We -- DMR does the cooking of shrimp and oysters and some

fish and then the others bring in some, you know, other sides to go with it.

Last year, we had over 600 people. We started this thing three, four years ago with about 30 people and now we're up to over 600. So if you're in Neshoba County on the 31st day of July, make sure you have got shorts on, but, you know, come on over to the thing. It starts about 6:00 at night, 5:30, 6:00, and it will be a great thing to have.

It's a way for us to sell our seafood. Gulf seafood is what the whole thing is about, how great Gulf seafood is, and what better to do than take it up to Neshoba and so that all the other people coming from around the state can be able to see it and see how great it is. So if you're up there, please come by.

Shrimp season update, you know, we -this year, we're at one point -- as of the end of
June, we're at 1.7 million pounds of shrimp that's
landed and at about \$2.2 million. That's about a
\$1.30, \$1.29 a pound. Obviously, very low.

Better than last year because -- but -- we had a
lower number this year, but at 2.75 million pounds
landed last year, but only 3.3 million and \$1.20,

so it went up a little.

not having the landings and it's not the fact that the shrimp aren't there. There is plenty of shrimp. It's just we just don't have the shrimpers to go out there. And the reason they're not going out there is one thing and that's because when you're paying \$5 a gallon for diesel fuel and going out and coming back and getting \$1.30 a pound, you're hardly making enough money to make the trip worth it.

So we -- people last year -- well, in the late -- say, 2007, 2008 time frame, we had over 750 boats that went out the first day of shrimp season. This year, we had 47. That tells you what the industry is going. The industry is going just like this, and it's for two to three reasons. Number 1, it's price. Jonathan can tell you more than anything about it, being a processor, but the price of what it is, and the other is our imports. We have got to do something to stop the imports. The imports are coming in to America. When they're coming in, they're selling them for hardly anything and it's killing the industry. And it's not just the shrimp industry.

It's killing other industries, too, so we need to look at that.

If you get a chance to talk to your congressman, your senator, the Governor or anybody else, please express how important it is that we do something with the imports and put a tariff on them, put something on them to change it, because when our shrimpers cannot go out and make a living — and there's plenty of the greatest Gulf shrimp in the world right here — there is a problem. We need to look at it, and we need to try to help work and fix it. Okay?

As far as the snapper season, well, it's closed right now, and I don't foresee it re-opening. You know, we opened up Memorial Day weekend. We had 64,000 -- a little over 64,000 pounds is what our allocation was and right now, we're in the 60s, you know, the -- 60- to a little plus -- over 60,000 pounds has been caught. This is about a third of what we should be catching, so, you know, the problem is, it's something that we're working. That what MS Creel is going to change, and we're going to be able to, in the future, get that up to at least 120-, 150,000 pounds, something to make it back to where

it should be at.

23

24

25

So we'll see what happens, but, you know, it's -- we wound up getting through the holiday weekend, the Fourth of July, but that's it, and I don't foresee us opening anymore because we don't want to go over. We went over last year and had to pay it back, so we don't want to go over it again, and we want to make sure that we do what we need to do there.

Let's see. What else do I got here? Bonnet Carré update, you saw it. We just went out with a press release about the shrimp processors and where we have money in it for the 2019 Bonnet Carré to be able to give money back to the shrimp processors. And this is something that -- to help them to go out and be able to put new technology and upgrade their equipment and upgrade the things that need to be done. And this is what's happening in Louisiana and it's happening here now, and so we'll be able to do it. And what they do is they go out and be able to -- I think a half a million dollars. Is that the number that we're working on or is there a number set as to how much people can spend? RICK BURRIS:

1 So we've got -- there's, I think, about 2 3 and a half million dollars in the total grant 3 and we're going to evaluate to see, you know, how 4 many applications we get and then kind of go from 5 there. 6 And it is -- just a point of 7 clarification, it's for the seafood processors, 8 not just shrimp processors. 9 JOE SPRAGGINS: 10 Huh? 11 RICK BURRIS: 12 It's -- this grant is for all seafood 13 processors. 14 JOE SPRAGGINS: 15 Right. All seafood processors, not just 16 shrimp, yeah. It will be for any of the 17 processers that are seafood, and this is so they can update their equipment and update their 18 19 operation and be able to do it a better way and be able to help them stay in business, so hopefully, 20 21 that will work out. 22 Let's see. We've got an update on 23 the -- excuse me, derelict vessels. 157 derelict

vessels have been reported, 122 have been removed,

35 are pending removal and five are -- excuse me,

24

25

three are in court order right now, so that's looking pretty good.

We're still -- we're far above the other parts of the Gulf Coast, and we're using that \$1.6 million that was given to us by the federal government to do this. So that's in the grant that we would be able -- was able to get and that's working fantastic.

Let's see what else I've got here.

We're also -- Commercial Safety -- Vessel Safety

Program is also part of the Bonnet Carré, and NOAA

approved it on the 1st of -- so it will start the

1st of September 2019.

And then all the appeals finalized for the fishermen payout has been done. We have done all the appeals, and, you know, we went in -- we did the very first phase of it to where we gave -- if you were a shrimper, you got \$7,500. If you were an oysterman, you got \$15,000, and we were able to do that.

And then they went back and then we started working on the loss up to 108,000 and some few dollars per person -- or company, so now we're able to pay all that. We have worked all the appeals and everything else so we're being able to

pay them all out. And that is fantastic.

14

15

16

17

18

19

20

21

22

23

24

25

And we're looking at it as a possibility of where we'll have a Round 2. And before that, what we're talking on the Round 2 of that is that we may have some money left over that we did -- we were not -- that we had to allocate to be spent in another form for the Bonnet Carré, but was done in -- through GOMESA and so we're able to take that money, re-allocate it. And so we're going back now and looking at the ones that had -especially the commercial fisherman that did not get in the first round for whatever reason. Either they were out fishing and did not realize it or they were -- for some reason did not get there, so we're going to give them a chance to be able to look at it. So hopefully, we might be able to make them whole, too, up to a certain point so that's a great deal.

And we also have the movement on 2020. We got \$3 million from the federal government to be able to do another round for 2020, and that's for shrimp and oysters only, but we will be -- shrimp and oyster fishermen only will be able to do a 2020 round, so we will be working on that too.

1 So hopefully, we'll be able to get some 2 money in these fishermen's hands and keep them in 3 business because I tell you what, if we don't, we're going to lose them all, you know, and we 4 5 definitely don't want to do that. All right. 6 Let's see. Action updates? 7 STEPHEN ECKERT: 8 Yes, sir. For actions updates, 9 discussed at the June 22nd meeting, the Commission 10 recommended and the Director approved the 11 following motions: First, there was a motion to 12 recommend the final adoption of changes to Title 13 22, Part 1, rules and regulations for molluscan 14 shellfish-related activities to conform with the 15 requirements of Senate Bill 2648 and House Bill 16 1007. 17 Second, we had a motion to recommend the 18 following state saltwater finish records: These 19 being all tackle for, one, a golden tilefish, 20 23 pounds, 3.2 ounces caught by Mr. Nathan 21 Bosarge; and, second, a permit, 11 pounds, 22 11.2 ounces caught by Mark Kleinpeter. 23 And that concludes our actions update. 24

JOE SPRAGGINS:

25

Okay. And one other thing is -- any

1 questions on the actions updates? 2 (No response.) 3 JOE SPRAGGINS: 4 Okay. Changes to Title 22, Part 1, 5 updated regulations on the on-bottom leasing and 6 shellfish tagging will go into effect Tuesday --7 Thursday, the -- July 18th; is that right? 8 RICK BURRIS: 9 (Nodding head affirmatively.) 10 JOE SPRAGGINS: 11 So it will go into effect Thursday, 12 July 18th. So we'll be able to start now, and 13 we're in the process of finding -- finalizing how 14 we're going to be able to do the leases and 15 hopefully, sometime in August, we will be able to 16 go out with a notice to the public to be able to 17 start going ahead and putting applications in to 18 do leases for the -- on-bottom for the oysters, 19 which is going to be a great deal. We've been fighting this battle for a couple of years now 20 21 and, thank goodness, we've got it finally figured 22 out, so hopefully, we will be able to get that 23 done. I think that's everything I have. 24 Ιf 25 something comes up, I will bring it up later,

Commissioner, but that's my report. Thank you.

RONNIE DANIELS:

Sounds good, General.

JOE SPRAGGINS:

1

13

14

15

16

17

18

19

20

21

22

23

24

25

I do have one other thing. Sorry about that. It wasn't on here.

We will -- we officially were supposed to do it this Thursday, but it's now been canceled. It will be in August, but DMR will now be a part of Wildlife Fisheries Foundation. And it will be the Department of Wildlife Fisheries and Parks and Marine Resources Foundation, so we will be our own -- be a part of a foundation. And we will be able now for people who would like to donate things to be able to donate, you know, money to an organization to help the marine fisheries and the Gulf of Mexico and us to be able to do things like scholarships for kids to go into marine biology and to be able to do fishing tournaments for the youth and underprivileged and also maybe a Governor's fishing tournament and But it will be tax free now so you can donate. So it will be something that we will work it out, but we will sign that. It will probably go in effect in August instead of this month.

1 Sorry about that. 2 RONNIE DANIELS: 3 All right. 4 JOE SPRAGGINS: 5 I am done now. 6 RONNIE DANIELS: 7 All right. Any of our commissioners 8 have anything to report today? 9 Joe, whenever you were just talking 10 about the problems with shrimpers, it jogged my 11 memory about something we talked about, something 12 I brought up a year or two ago, and maybe it would 13 be beneficial to look back into this again. 14 know some of our legislators looked at it. 15 Whenever we're talking about our commercial fishermen, obviously, imports is always 16 17 a big issue that's brought up, but just the cost 18 of being able to get out there. One of the things 19 I brought up a year or two ago was road tax on 20 fuel that's being burned in boats, and we started 21 looking at ways to bypass that or get around that. 22 You know, we're paying taxes that are meant for 23 vehicles on fuel that's being burned through boats 24 on the water that never even get on land.

So maybe if we get our legislators to

25

2.1 look at that with us again, find a way to where at 1 2 least these guys get some of a -- some of a break 3 on their fuel cost on something that I don't think 4 they should be paying anyhow. 5 JOE SPRAGGINS: 6 Yeah, it makes good sense. And you know 7 what, my fault for not carrying that further 8 because I should have, but I will definitely look 9 at that. 10 RONNIE DANIELS: 11 Well, you know, it would benefit the 12

Well, you know, it would benefit the charter fishermen and every aspect of commercial fishermen, whether it be crabbers, oysters, shrimp, anything.

JOE SPRAGGINS:

13

14

15

16

17

18

19

20

21

22

23

24

25

Yeah. I mean, if nothing else, we could put it at the docks where they --

RONNIE DANIELS:

Dockside or another option would be some type of reimbursement program to where they could save their receipts, have an affidavit that every bit of that fuel was burned through a boat that they do trailer and they could submit that to the state quarterly or once a month and get a reimbursement on that road tax that they're not

```
1
      burning this fuel on the roads.
 2
      JOE SPRAGGINS:
 3
                Okay. Well, I will definitely check
 4
      into that.
 5
      RONNIE DANIELS:
 6
                All right.
 7
      JOE SPRAGGINS:
                And I will get with the legislators and
 8
 9
      see what we can -- look into that.
10
      RONNIE DANIELS:
11
                 Thank you.
                All right. Next up, Office of Marine
12
13
      Patrol, Chief Wilkerson.
14
      KYLE WILKERSON:
                Good morning Commissioners, Legal,
15
16
      Director. Commissioner Mayfield, good to have
17
      you.
18
      MATTHEW MAYFIELD:
19
                 Thank you.
20
      KYLE WILKERSON:
21
                Well, looking at the June report, we
22
      were compliance-wise with compliance checks, we're
23
      at 10.8 percent. People are doing -- are doing
      real well. They're complying with Tails and
24
25
      Scales. We've written a few Tails and Scales
```

citations, confiscated a few red snapper. As of this month, when it went -- when it closed, we were at 95 percent compliance rate with everybody playing right out there, so it was a good -- it was a good season.

This particular report, there is a few citations that stick out, illegal possession of oysters, possession of untagged oysters and harvested oysters in prohibited waters. That was all harvested illegally at the Clermont Harbor in Bayou Caddy. They were in possession of that and they were written citations for it.

We're looking at 2,900 stops for June, which is really good, really high. Everybody is complying. Everybody is playing right with that out there. We had one other commercial harbor -- excuse me, commercial activity north of the CSX bridge, which is a no-no. Somebody crabbing up there with too many crab pots.

Other than that, everything looks pretty normal. If you have any questions, please ask.

JOE SPRAGGINS:

I do, you know, thank y'all. Thank the officers, each and every one of them. I don't think that I can remember a holiday weekend

1	without a tragedy.
2	KYLE WILKERSON:
3	It's been a while, yes, sir.
4	JOE SPRAGGINS:
5	And you had this it was Fourth of
6	July weekend. No boating accidents that caused
7	death. And, I mean, there was a few accidents and
8	there was some other things that went on, but no
9	one died because of it, so that says a lot for
10	what y'all are doing out there every day and we
11	thank you so much for it.
12	KYLE WILKERSON:
13	Thank you. We are hard workers.
14	RONNIE DANIELS:
15	Thank you, Chief. Y'all keep up the
16	good work.
17	KYLE WILKERSON:
18	Thank you, sir.
19	RONNIE DANIELS:
20	All right. Next up is going to be
21	Coastal Resources Management, Laura Moncrief.
22	LAURA MONCRIEF:
23	Good morning, Commissioners. Good
24	morning, Director.
25	So today I'm going to be presenting just

an update on our Coastal Preserves Bureau. Sorry. My first time. Bear with me.

So just an update of our Coastal Preserves Bureau and what we have accomplished since the last update, which I believe was in 2022.

So the Bureau is made up of three programs. We have Coastal preserves, invasive species and beneficial use program. And it operates under myself, as the bureau director, and five ENRS employees, with our main goal being to manage 16 of the 20 designated Coastal preserve sites within our three Coastal counties.

Now, there's been 83,000 acres designated as critical Coastal habitat. As you can see, it's kind of blurred, but it's outlined in blue. And of that 83,000 acres, the state currently holds titles to almost 46,000 of which we manage. And since 2022, the state has actually acquired an additional 2,900 acres, so we're steadily growing.

Where most of our active management actually occurs is within 33 units within those 16 Coastal preserve areas, which is about approximately 5,000 acres. Now, to put that into

perspective, of those 33, it's 5,000, but when we're having to go to a site multiple times a year, my team is covering, over, you know, 20,000 acres on an annual basis. And those activities can range from prescribed burnings, planting to thinning, invasive species monitoring and eradication, public access on our Coastal preserve areas for our local community on top of tourists, in addition to beneficial use.

So since 2022, we have actually conducted prescribed burns at -- on 342 acres, and we have also conducted thinning operations on 25 acres.

In terms of invasive species, just on the terrestrial side, we have actually treated almost 1,600 acres. And we're also responsible for monitoring our Coastal waterways, so when it comes to our aquatic vegetation what we conduct in-house, our team is covering about 120 miles annually. We do utilize contractors for some of our efforts, specifically with our apple snails and wild hog eradication, but we have remained diligent in our efforts in maintaining those populations.

Now, with the range of activities, you

know, our main goal here is -- you know, to essentially get, you know, something like you see in these pictures is through effective management strategies of our Mississippi Coastal ecosystems, so we try to do our best on, you know, our conservation, preservation and restoration of these resources.

19

20

21

22

23

24

25

One thing that actually has been essential in our efforts, specifically with our invasive species management, is the utilizing of our QuickCapture app, so through this app, we're actually able to get detailed information of sites that we are treating and/or surveying. So from there, we're able to extrapolate the level of treatment that's being -- taking place at each site and being able to address, you know, questions as far as, are we seeing population increase in size? Decrease? Are they remaining the same? And from there, we can determine how effective our methodologies are. We can also -so we're also utilizing this app with our contractors as well, so -- just to further our dataset so it actually is utilized with the apple snail survey as well.

I'm sorry. It's a little grayed out.

Let me see if I can get it to go back. There you go.

One of our other primary goals is public access, so what we've actually been trying to do within the last few years is go through and update our sites, so we have been putting out new plant markers, installing new trail signs, new kiosks, as you can see below with our new Eric Clark unit, outlooks here at Hellmers.

And at each site, we're also responsible for trail maintenance, so since 2022, it's been conducted at eight units, so — which is about 30 miles of trails. Again, to kind of put that into perspective of what my team is having to cover, when you're having to go out to a site multiple times a year, these guys are having to cover over 75 miles annually.

And most recently, we have been able to do road repair at that -- the bottom middle picture at our Delisle unit.

Also, moving forward, we are planning to partner up with the Grand Bay NERR and conduct educational nature trail surveys or nature trail walks for our local public, just to essentially bring more light into our Coastal preserve areas

and also in the process of updating our website, creating more interactive — interactive way to, you know, gain information for our public so whenever they get to a kiosk if there's a QR code, they can easily pull it up on their phone, see what the trails are, the level of difficulty, local flora and fauna that they'll be able to see at the site. So that's something we're actually in the process of working on right now.

In terms of our beneficial use program, so its main goal is to restore and create tidal marsh habitat in all associated habitats as well. To date, the program has restored approximately 350 acres with the most recent being our Greenwood Island expansion with 250 acres -- or 230 acres, sorry, of expansion.

We also have multiple concurrent projects and all of them are listed, but just to highlight a few: One, being our Apollo Flight service that we conduct monthly just to get better footage of our invasive species treatment and our beneficial use active sites.

We've also partnered with forest service in seed collection of slash pine for nursery stock, on top of research. We also help in

monitoring efforts with Audubon for shorebird surveys on Deer Island, and we have also partnered with multiple contracting companies who have been extremely instrumental in the eradication and at least controlling populations of invasive species.

And like with many offices, we all have our challenges. With ours, unfortunately, one of the primary ones being invasive species.

Mississippi holds that prime habitat, you know, for just — for invasives to actually just flourish. Also, these species don't know how to take a break on weekends or holidays, so it's a constant uphill battle for us.

Also, with mother nature, you know, we do get hit periodically with some bad inclement weather, hazardous storms where we're constantly not able to access sites or having to deal with debris removal.

And one of my favorites, when our local public decides they want to put in the effort to use our Coastal preserve areas as a trash dumping site. Rather than just putting forth that same effort and dumping in the appropriate dumping sites, they would rather use Coastal preserve, so that's always fun.

and this morning, like I said, I can't take any credit for. It's all from my team. These guys are extremely hardworking. All of them are out in the field right now. I also wanted to highlight past employees who have been instrumental in the program and what we've been able to accomplish. And then more recently, at the bottom right is our -- or sorry -- bottom left, our two summer interns who've played a part and a huge contribution to the bureau and what we've been able to accomplish.

With that, I will take any questions.

CAM ROBERDS:

I was going to ask on the apple snails -- I remember last year when it came up -- are we better off now than we were a year ago with all that you guys are doing to control the population?

LAURA MONCRIEF:

I will say that we're better off in our monitoring efforts. I will say that. Like, being able to utilize QuickCapture more, I think we have a better handle on what we're doing.

I will say that as far as whether the

population is truly in decline, you know, that's a little bit harder to answer because of the scale at which they're at. But I will say the -- you know, being able to utilize multiple contracting companies ourself and the QuickCapture app, it's been way more diligent than I feel it has in the past.

CAM ROBERDS:

We appreciate everything you guys are doing out there for sure.

LAURA MONCRIEF:

Yeah, thank you. Thank y'all.

RONNIE DANIELS:

Thank you.

JOE SPRAGGINS:

I just would like to also thank Jennifer and her team because they're doing a great job, you know. There is a lot of things out there that are invasive to what's happening in the Gulf Coast and it's brought in from different things and different ways. And a lot of it comes in off the different ships and everything else that come into here, but they are fighting it.

You remember salvinia back a couple of years ago and how much we were fighting salvinia

down here on the Gulf Coast? They pretty much have taken care of that. It's close. They've really cut down a lot of it, and I tell you, I'm not getting reports every day of, I can't get my boat out of my boathouse so, you know. There is a lot of things that are happening there that's just something that every day you have to fight a battle with it.

And also to restore all the areas that they're restoring, they're trying very hard to restore. And Jennifer also sits on the permit board for the DEQ, so she represents us for that, so we have a good team working there. So thank y'all, all of you, for what you're doing.

All right.

RONNIE DANIELS:

All right. Next up is going to be Finance and Administration, Ms. Leslie Brewer.

LESLIE BREWER:

Good morning, everyone. Welcome.

I'm presenting the financials for the end of June, which is actually our fiscal year end.

At the end of June, our state revenue was 6.8 million. Our agency revenue,

1	80.2 million.
2	State net income, a negative 802,000 and
3	agency net income of 38.4 million. We do have a
4	negative in that state column, but that's because
5	we don't get our appropriations transferred till
6	usually September. I'm not sure why it works that
7	way.
8	And after 12 months, we have
9	82.7 percent of our budget remaining in operations
10	and our Tidelands is at 42 percent.
11	Does anybody have any questions?
12	RONNIE DANIELS:
13	Any questions? You got all that, didn't
14	you, Cam?
15	CAM ROBERDS:
16	Every time.
17	RONNIE DANIELS:
18	Thank you.
19	LESLIE BREWER:
20	Thanks.
21	RONNIE DANIELS:
22	Next up is going to be Public Affairs,
23	Ms. Charmaine.
24	CHARMAINE SCHMERMUND:
25	Good morning, Commissioners, Director

Legal. Welcome, Commissioner Mayfield.

This Mississippi Department of Marine Resources had 18 media mentions since the June MACMR meeting. News items included MDMR's free HACCP class being offered, the grant program for certified seafood processers, boater safety and red snapper season closing.

The Office of Marine Patrol took part in Adventures on the Water at the Margaret Sherry Library in Biloxi on June 19th and the Stay Safe and Play Event at Point Cadet Plaza on June 30th, along with staff from the Grand Bay NERR.

The Lyman Hatchery hosted two visits from Ocean Springs summer camps who toured the hatchery on July 2nd, and we'll be having our second tour this afternoon.

The Office of Marine Fisheries also hosted a marine conservation class tour at the Bolton Building on July 9th.

A Pearl River Community College
hydrography instructor introduced students,
observed and assisted with MDMR field work on
July 15th by operating the sound velocity profiler
while on board an MDMR vessel during the monthly
trial sampling to learn about how MDMR conducts

1	this routine sampling.
2	The Mississippi Deep Sea Fishing Rodeo
3	was held July 4th through the 7th, and the agency
4	was on hand each day at the fishing rodeo
5	distributing our rules and regulations
6	publication, fish ruler stickers, fish posters and
7	other informational pieces to the public.
8	RONNIE DANIELS:
9	Busy month.
10	JOE SPRAGGINS:
11	Hey, we took one of them sharks out,
12	too, at the fishing rodeo. What was it,
13	600-something pounds?
14	CHARMAINE SCHMERMUND:
15	I can't remember.
16	JOE SPRAGGINS:
17	It was a big shark. One of them
18	sharks one of them biting sharks is out. It
19	was a tiger shark, I think, and but so we've
20	got one of them off there. Caught at Cat Island.
21	RONNIE DANIELS:
22	Wow.
23	Thank you, Charmaine.
24	All right. Marine Fisheries, this one
25	is always fun. We've got some new state records.

1 Trevor. 2. TREVOR MONCRIEF: 3 Yeah. We have got two for you with a 4 lot more coming next month as well. A lot of them weighed in after the deadline. 5 6 So both all tackle records today. First 7 one is gray snapper. The old record was 8 15 pounds, 7.79 ounces. This new record is 15 9 pounds, 14.4 ounces. Mr. Joseph Rizzuto, picture 10 of the fish. There's a picture of Joseph with the 11 fish. That is quite the specimen. 12 Next one is the Atlantic creolefish. 13 You don't see too many of these. Old record was 14 one pound, 8.69 ounces. The new record is 15 one pound, 9.6 ounces. Mr. Sean Cook, there is 16 the picture of that fish, and there is Mr. Cook 17 with the fish. 18 And all we need is a motion to recommend 19 adoption of the new records. 20 RONNIE DANIELS: 21 I've never even heard of a creolefish. 22 TREVOR MONCRIEF: 23 Don't catch them on a hook and line very 24 often. They're down there, just not in the same

numbers as everything else.

25

```
1
      RONNIE DANIELS:
 2
                 That's pretty cool.
 3
                 Do we have a motion to approve the new
 4
      state records?
 5
      JONATHAN McLENDON:
                 I'll make the motion.
 6
 7
      CAM ROBERDS:
                 I'll second.
 8
 9
      RONNIE DANIELS:
10
                All in favor?
11
                 (Unanimous vote.)
12
      RONNIE DANIELS:
13
                 Congratulations to these guys that
14
      caught them.
15
      CAM ROBERDS:
                 Do any of our commissioners have any
16
      other business today?
17
18
                 (No response.)
19
      RONNIE DANIELS:
20
                All right. Public comments, it looks
21
      like we only have one. It's going to be Mr. Greg
22
      Cenac talking about the roach.
23
      GREG CENAC:
24
                 Yes. I think we have some pictures that
25
      will --
```

RONNIE DANIELS:

Did we get that loaded?

GREG CENAC:

And the last time I was here, one of the councilmen -- I won't tell you who, but Ronnie -- asked what a roach was, so we're going to show you what a roach is.

There is the roach, and this is the largest cockroach in the world.

It just went away. It must have scurried away real quick.

We're building it and we're going to be moving it over to Biloxi Beach and parking it at the Seafood Museum for about a week and then we'll -- until the cars start having too many wrecks. You know, look here, Esther, you know, and, boom, hit them.

So we will have some little fundraisers on the back for Biloxi, but we're on the Mississippi Fishing Banks.

So here's Will Ladner. He was interviewing for WLOX. We're hoping to get maybe Ocean Springs to shoot it with fireworks and everything else. We'll have a big thing going across the Bay. We're going to try to move it in

1 about two weeks on a weekend, so I don't know if 2 you may need some extra support to protect the 3 cities on the cockroach's move, so -- all right. 4 Just to let y'all know. 5 And we have some other stuff coming up. 6 We're going to put this out to just make sure 7 everybody is protected. 8 JOE SPRAGGINS: 9 When they deploy that -- when is Yeah. 10 the deployment? 11 GREG CENAC: 12 Will. 13 WILL LADNER: 14 It will be -- surely more than that 15 30 days out. We're going to give enough time to 16 where everybody can get whatever publicity they want out of it. 17 18 JOE SPRAGGINS: 19 Are we calling that Cockroach Reef? 20 Cockroach Reef, right? 21 GREG CENAC: 22 Yeah. But it's on a -- it's actually 23 very large. I mean, that's a 120-foot tugboat? 24 WILL LADNER: 25 Yes.

GREG CENAC:

So it's 54 feet long. It's a world's record, and we're going to try to do that, so -- but we're also doing -- it's a long story. We went out to the private sector. A lot of the DMRs fund a lot of these deployments, and so now we went out to the private sector to raise more money to the Fishing Banks to build reefs.

And we have some other stuff up our sleeves, you'll find, as we're also building some little reefs closer in, too.

JOE SPRAGGINS:

Well, Bay Pest Control, I think is the one --

GREG CENAC:

Yes, sir. Right there, Bay Pest Control contributed quite a large amount of money to have it built and commissioned.

And I can't divulge other people right now that are interested, but there's going to become fun things. We're trying to hopefully build an offshore park like they have in Florida. I know the artificial reefs here is talking about doing, that maybe an art park or something, but that's down the ways.

1	So can you imagine diving on this
2	because it's going to be sitting up out of murk
3	level, people come down, the divers, ahh, a
4	cockroach, but it's going to be a lot fun. So
5	JOE SPRAGGINS:
6	They're going to think it was an
7	ancestor of a cockroach, you know, back in the
8	dinosaur days.
9	All right. Thank you very much.
10	RONNIE DANIELS:
11	I love it. That's really cool.
12	JOE SPRAGGINS:
13	Yeah. Well, I don't think anybody else
14	has one.
15	CAM ROBERDS:
16	That's got to be the first.
17	RONNIE DANIELS:
18	And now I know what a cockroach is.
19	All right. No other public comments.
20	All right, y'all. Good meeting today.
21	Do we have a motion to adjourn?
22	CAM ROBERDS:
23	I'll make a motion to adjourn.
24	RONNIE DANIELS:
25	I will second that.

```
1
                 All in favor?
 2
                  (Unanimous vote.)
 3
                  (Meeting adjourned at 9:47 a.m.)
