Released: January 4, 2012

**NOTICE OF CONDITIONAL GRANT OF APPLICATION OF HEALINC TELECOM, LLC FOR
RECERTIFICATION AS A PROVIDER OF VIDEO RELAY SERVICE ELIGIBLE FOR COMPENSATION
FROM THE INTERSTATE TELECOMMUNICATIONS RELAY SERVICES (TRS) FUND**

CG DOCKET NO. 10-51

By the Chief, Consumer and Governmental Affairs Bureau:

On December 1, 2011, Healinc Telecom, LLC (Healinc) filed an application¹ for Commission recertification² as a provider of video relay service (VRS), and for Commission certification as a provider of Internet Protocol relay (IP Relay) service, that is eligible for compensation from the Interstate TRS Fund (Fund).³ For the reasons discussed below, the Consumer and Governmental Affairs Bureau

¹ Healinc Telecom, LLC, *Internet-Based TRS Certification Application*, CG Docket No. 10-51 (filed Dec. 1, 2011) supplemented on December 28, 2011 (Healinc Recertification Application). See 47 C.F.R. § 64.606; *Structure and Practices of the Video Relay Service Program*, CG Docket No. 10-51, Second Report and Order and Order, 26 FCC Rcd 10898 (2011) (*iTRS Certification Order*).

² The Consumer and Governmental Affairs Bureau (Bureau) initially granted Healinc certification for the provision of VRS on June 9, 2006, for five years, until June 9, 2011. See *Notice of Certification of Healinc Telecom, LLC as a Provider of Video Relay Service (VRS) Eligible for Compensation from the Interstate Telecommunications Relay Service (TRS) Fund*, CG Docket No. 03-123, Public Notice, 21 FCC Rcd 6486 (rel. June 9, 2006). The Bureau twice extended this certification period for Healinc and other affected providers, in order to maintain the *status quo* while the Commission considered reform of the Internet-based certification process. See *Consumer and Governmental Affairs Bureau Announces Extension of Expiring Certifications for Providers of Internet-Based Telecommunications Relay Services*, CG Docket Nos. 03-123 & 10-51, Public Notice, 26 FCC Rcd 6737 (2011) (extending expiring certifications to November 4, 2011); *Consumer and Governmental Affairs Bureau Extends Expiring Certifications for Certain Providers of Video Relay Service and IP Relay Service*, CG Docket Nos. 03-123 & 10-51, Public Notice, 26 FCC Rcd 15157 (2011) (extending expiring certifications to January 4, 2012).

³ The Communications Act of 1934, as amended, defines telecommunications relay services (TRS) as:

... telephone transmission services that provide the ability for an individual who is deaf, hard of hearing, deaf-blind, or who has a speech disability to engage in communication by wire or radio with one or more individuals, in a manner that is functionally equivalent to the ability of a hearing individual who does not have a speech disability to communicate using voice communication services by wire or radio.

47 U.S.C. § 225(a)(3) (as amended by the Twenty-First Century Communications and Video Accessibility Act of 2010 (CVAA), Pub. L. No. 111-260, § 103(b), 124 Stat. 2751, 2755 (2010); Pub. L. No. 111-265 (technical amendments to CVAA)). VRS is a form of Internet-based TRS (iTRS) that uses a broadband Internet connection between the VRS user and the communications assistant (CA) to enable a person using American Sign Language to communicate over video with another party through a CA. During a VRS call, the CA relays the communications between the two parties, signing what the other party says to the deaf or hard of hearing user and responding in

(Bureau) hereby grants the Healinc Recertification Application on a conditional basis,⁴ pending inspection of Healinc's facilities and confirmation of Healinc's compliance with all applicable rules and orders, as well as our determination that Healinc is qualified to receive compensation from the Fund and that grant of full certification would be consistent with the objective of preventing waste, fraud, and abuse to the Fund, as embodied in our VRS rules and orders.

In the *iTRS Certification Order* released on July 28, 2011, the Commission amended its requirements and processes for certifying iTRS providers as eligible for compensation from the Fund, to ensure that iTRS providers receiving certification are qualified to provide iTRS in compliance with the Commission's rules, and to eliminate waste, fraud, and abuse through improved oversight of such providers.⁵ These new rules require that all iTRS providers obtain certification from the Commission to be eligible to receive compensation from the Fund.⁶ They further require that all VRS applicants for certification lease, license or own, as well as operate, essential facilities associated with iTRS call centers and employ their own CAs to staff those centers on the date of their application for certification.⁷ Each iTRS applicant for certification is also required to submit specific types of documentary evidence that demonstrate its compliance with Commission rules, including those adopted in the *VRS Practices R&O*.⁸ On October 17, 2011, the Commission released the *iTRS Certification Clarification Order*,⁹ clarifying certain aspects of the certification requirements adopted in the *iTRS Certification Order*, and modifying section 64.606 of the Commission's rules to lessen the burdens on applicants for certification associated with the submission of certain documentation to the Commission.¹⁰

Based on our review of the Healinc Recertification Application, we grant conditional certification to Healinc to provide VRS services. In the *iTRS Certification Order*, the Commission reserved the right, after initial review of an application, to conditionally grant certification subject to one or more subsequent

voice to the other party to the call. The Interstate TRS Fund compensates eligible providers of VRS and other forms of interstate TRS for their reasonable costs of providing these services. See 47 C.F.R. § 64.604(c)(5)(iii).

⁴ Healinc originally submitted an application for certification as a provider of IP Relay in 2008. *Healinc Telecom, LLC IP Certification Application*, CG Docket No. 03-123 (Nov. 18, 2008). This application remains pending. Healinc's request for IP Relay certification was incorporated into its March 10, 2011 application for recertification, and is again incorporated into the Healinc Recertification Application under consideration here. We will address Healinc's pending application for IP Relay certification in a subsequent Public Notice.

⁵ *iTRS Certification Order*, 26 FCC Rcd at 10899, ¶ 1. The measures adopted in the *iTRS Certification Order* were part of the Commission's ongoing and transitional efforts to reform the structure and practices of the VRS program, and the new certification processes by which this grant of conditional certification is awarded may be superseded or modified by future Commission actions on VRS reform.

¹⁰ See *id.* at 14902-14904, ¶¶ 16-20.

on-site visits to the applicant.¹¹ The Commission noted that such visits would “better enable the Commission to verify the information provided in a certification application, and help us to better assess an applicant’s ability to provide service in compliance with our rules.”¹² This grant of conditional certification is without prejudice to the Commission’s final determination of Healinc’s qualifications, and is dependent on the Commission verifying the information provided in the Healinc Recertification Application, as supplemented, and on the veracity of the applicant’s representations that it will provide service in compliance with all pertinent Commission requirements.¹³

To allow the Commission to make such a determination, we reserve the right to conduct one or more on-site inspections of Healinc’s facilities by designated personnel, and to request additional documentation relating to Healinc’s provision of VRS. Ultimate conversion to full certification will be granted if, based on on-site visits and our review of such additional documentation, the Commission finds that Healinc is in compliance with the Commission’s rules and orders, including those rules designed to ensure the accuracy and integrity of Fund payments,¹⁴ and is qualified to receive compensation from the Fund for the provision of VRS.¹⁵ If at any time during the period in which Healinc is operating pursuant to this conditional certification, the Commission determines that Healinc has failed to provide sufficient supporting documentation for any of the assertions in Healinc’s application, or that any of those assertions cannot be supported, or finds evidence of any apparent rule violation, fraud, waste, or abuse, the Commission will take appropriate action, including the possible denial of the Healinc Recertification Application. In the event of such denial, Healinc’s conditional certification will automatically terminate 35 days after such denial.¹⁶ If, however, the Commission grants full certification, Healinc, like all VRS providers, must continue to operate in compliance with all relevant Commission rules and orders.

The Bureau specifically notes an inaccuracy in Healinc’s application. Specifically, Healinc states in its application that its VRS platform coupled with its Emergency Routing System will be able to access certain information from “the Neustar Registered Location database.”¹⁷ We remind Healinc that providers do not obtain registered location information from the TRS Numbering Directory, which is maintained by its administrator, Neustar. The primary purpose of this Directory is to record the mapping of the North America Numbering Plan telephone number of each registered iTRS user to a unique Uniform Resource Identifier (URI).¹⁸ We further remind Healinc that, because the TRS Numbering Directory does not maintain a list of registered location information for VRS users, Healinc must maintain its own database of such registered location information in order to comply with the numbering requirements.

Redacted copies of the Healinc Recertification Application, including all supplements, are available for public inspection and copying during regular business hours at the FCC Reference
