

FACT SHEET

Commerce Preliminarily Finds Dumping of Imports of Ripe Olives from Spain

- On January 19, 2018, the Department of Commerce (Commerce) announced its affirmative preliminary determination in the antidumping duty (AD) investigation of imports of ripe olives from Spain.
- The AD law provides U.S. businesses and workers with a transparent, quasi-judicial, and internationally accepted mechanism to seek relief from the market distorting effects caused by injurious dumping of imports into the United States, establishing an opportunity to compete on a level playing field.
- For the purpose of AD investigations, dumping occurs when a foreign company sells an imported product in the United States at less than fair value.
- Commerce preliminarily found that respondents Aceitunas Guadalquivir, S.L., Agro Sevilla Aceitunas S.COOP Andalusia, and Angel Camacho Alimentacion S.L. were dumping at preliminary dumping margins of 16.80 percent, 14.64 percent and 19.73 percent, respectively. Commerce established a preliminary dumping margin of 17.13 percent for all other producers and exporters of ripe olives from Spain.
- As a result of the preliminary affirmative determination, Commerce will instruct U.S. Customs and Border Protection (CBP) to require cash deposits based on these preliminary rates.
- The petitioner is the Coalition for Fair Trade in Ripe Olives, whose individual members are Bell-Carter Foods, Inc. (CA), and Musco Family Olive Co. (CA).
- The scope of this investigation covers certain processed olives, usually referred to as “ripe olives.” The subject merchandise includes all colors of olives; all shapes and sizes of olives, whether pitted or not pitted, and whether whole, sliced, chopped, minced, wedged, broken, or otherwise reduced in size; all types of packaging, whether for consumer (retail) or institutional (food service) sale, and whether canned or packaged in glass, metal, plastic, multi-layered airtight containers (including pouches), or otherwise; and all manners of preparation and preservation, whether low acid or acidified, stuffed or not stuffed, with or without flavoring and/or saline solution, and including in ambient, refrigerated, or frozen conditions.

Included are all ripe olives grown, processed in whole or in part, or packaged in Spain. Subject merchandise includes ripe olives that have been further processed in Spain or a third country, including but not limited to curing, fermenting, rinsing, oxidizing, pitting, slicing, chopping, segmenting, wedging, stuffing, packaging, or heat treating, or any other processing that would not otherwise remove the merchandise from the scope of the investigations if performed in Spain.

Excluded from the scope are: (1) specialty olives¹ (including “Spanish-style,” “Sicilian-style,” and other similar olives) that have been processed by fermentation only, or by being cured in an alkaline solution

¹ Some of the major types of specialty olives and their curing methods are:

for not longer than 12 hours and subsequently fermented; and (2) provisionally prepared olives unsuitable for immediate consumption (currently classifiable in subheading 0711.20 of the Harmonized Tariff Schedule of the United States (HTSUS)).

The merchandise subject to this investigation is currently classifiable under subheadings 2005.70.0230, 2005.70.0260, 2005.70.0430, 2005.70.0460, 2005.70.5030, 2005.70.5060, 2005.70.6020, 2005.70.6030, 2005.70.6050, 2005.70.6060, 2005.70.6070, 2005.70.7000, 2005.70.7510, 2005.70.7515, 2005.70.7520, and 2005.70.7525 HTSUS. Subject merchandise may also be imported under subheadings 2005.70.0600, 2005.70.0800, 2005.70.1200, 2005.70.1600, 2005.70.1800, 2005.70.2300, 2005.70.2510, 2005.70.2520, 2005.70.2530, 2005.70.2540, 2005.70.2550, 2005.70.2560, 2005.70.9100, 2005.70.9300, and 2005.70.9700. Although HTSUS subheadings are provided for convenience and US Customs purposes, they do not define the scope of the investigations; rather, the written description of the subject merchandise is dispositive.

- In 2016, imports of ripe olives from Spain were valued at an estimated \$70.9 million.
- The Preliminary Decision Memorandum is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <https://access.trade.gov>, and to all parties in the Central Records Unit, Room B8024 of the main Department of Commerce building. Please refer to case number A-469-817.

NEXT STEPS

- Commerce is scheduled to announce its final determination on or about June 5, 2018.
- If Commerce makes an affirmative final determination, and the U.S. International Trade Commission (ITC) makes an affirmative final determination that imports of ripe olives from Spain materially injure, or threaten material injury to, the domestic industry, Commerce will issue an AD order. If either Commerce's or the ITC's final determination is negative, no AD order will be issued. The ITC is scheduled to make its final injury determination approximately 45 days after Commerce issues its final determination, if affirmative.

-
- “Spanish-style” green olives. Spanish-style green olives have a mildly salty, slightly bitter taste, and are usually pitted and stuffed. This style of olive is primarily produced in Spain and can be made from various olive varieties. Most are stuffed with pimento; other popular stuffings are jalapeno, garlic, and cheese. The raw olives that are used to produce Spanish-style green olives are picked while they are unripe, after which they are submerged in an alkaline solution for typically less than a day to partially remove their bitterness, rinsed, and fermented in a strong salt brine, giving them their characteristic flavor.
 - “Sicilian-style” green olives. Sicilian-style olives are large, firm green olives with a natural bitter and savory flavor. This style of olive is produced in small quantities in the United States using a Sevillano variety of olive and harvested green with a firm texture. Sicilian-style olives are processed using a brine-cured method, and undergo a full fermentation in a salt and lactic acid brine for 4 to 9 months. These olives may be sold whole unpitted, pitted, or stuffed.
 - “Kalamata” olives: Kalamata olives are slightly curved in shape, tender in texture, and purple in color, and have a rich natural tangy and savory flavor. This style of olive is produced in Greece using a Kalamata variety olive. The olives are harvested after they are fully ripened on the tree, and typically use a brine-cured fermentation method over 4 to 9 months in a salt brine.
 - Other specialty olives in a full range of colors, sizes, and origins, typically fermented in a salt brine for 3 months or more.

PRELIMINARY DUMPING MARGINS:

COUNTRY	EXPORTER/PRODUCER	DUMPING RATE
Spain	Aceitunas Guadalquivir, S.L.	16.80%
	Agro Sevilla Aceitunas S.COOP Andalusia	14.64%
	Angel Camacho Alimentacion S.L.	19.73%
	All others	17.13%

CASE CALENDAR:

EVENT	DATE
Petition Filed	June 22, 2017
DOC Initiation Date	July 12, 2017
ITC Preliminary Determination	August 11, 2017†
DOC Preliminary Determination	January 18, 2018
DOC Final Determination†	June 4, 2018
ITC Final Determination*	July 19, 2018
Issuance of Order**	July 26, 2018

NOTE: Commerce preliminary and final determination deadlines are governed by statute. For AD investigations, the deadlines are set forth in sections 733(b) and 735(a)(1) of the Tariff Act of 1930, as amended. These deadlines may be extended under certain circumstances.

†Where the deadline falls on a weekend/holiday, the appropriate date is the next business day.

*This will take place only in the event of affirmative final determinations from Commerce.

**This will take place only in the event of affirmative final determinations from Commerce and the ITC.
