

TRASH MONITORING WEBINAR SERIES

The goal of this webinar series is to share our current collective knowledge to support current practices and advances in trash monitoring and the development of data analysis and visualization tools aimed at assessing the effectiveness of policies and practices for limiting the amounts of trash in the environment. Webinars will be held monthly starting in January 2021.

The webinar series is being sponsored by the [Trash Monitoring Workgroup](#) and the [California Water Quality Monitoring Collaboration Network](#). Webinar recordings and materials will be made available on the Network's [website](#). There is no registration. Participation will be on a first come basis. However, we do not anticipate exceeding our hosting ability.

Webinar Topic: Taking Out the Trash: Trash Capture and Compliance

When: May 20, 2021 11:30AM – 12:30 PM

Presenter: [Chris Sommers](#) - Vice President at EOA, Inc.

The [Trash Amendments](#) require Municipal Separate Storm Sewer Systems (MS4s) in California to significantly reduce the amount of trash discharged from their stormwater conveyance system. Cities, counties, and other entities must choose one of two pathways to achieve compliance – Track 1 (Install and Maintain Full Capture Systems) or Track 2 (Demonstrate Full Capture Equivalency). This presentation will explore how MS4s are achieving compliance and improving our environment.
