1. Introduction

Several of United Nations (UN) Agencies including United Nations Development Programme (UNDP), United Nations Population Fund (UNFPA), United Nations Entity for Gender Equality and Empowerment of Women (UN Women), United Nations Capital Development Fund (UNCDF), United Nations Volunteers (UNV), have partnered together to use a unified new ERP system from Oracle Cloud that includes a supplier portal that will manage interaction with suppliers for solicitation process and contract management. This document is intended for any supplier who wishes to do business with any of the aforementioned UN Agencies (Partner Agencies) and to serve as a guide on how to use the online portal system.

In the initial phase during 2022, the new portal will function in parallel with existing systems of Partner Agencies and will be utilized only for specific tender processes from select Offices. Therefore, suppliers need to register and use Oracle Portal only for the specific tender opportunities which are managed via the Oracle portal. During this initial period, the Partner Agencies will continue using existing online tendering systems, such as ATLAS eTendering, InTend, etc. Suppliers need to use profiles of those systems (or register one if needed) to participate in tenders managed in the other platforms.

1.1 How to use the Guide

This guide is organized in several sections that correspond to different functions of the Supplier Portal such as registration, submitting bids, maintaining profile, etc.

The [Table of Contents](#) provides a detailed overview of all the topics covered in this User Guide. It contains hyperlinks to the exact page of the content in the document so the reader can navigate directly to the relevant section. Each section starts with a brief overview of the content of that section with hyperlinks.

Throughout the document, there are three types of hyperlinks:

- Hyperlink buttons that will take reader to the main TOC, found at the top right corner of each main chapter page, such as the one on this page.
- Hyperlinks that take readers to the beginning of the current section, usually found at the bottom left corner like in this page.

1.2 What is Supplier Portal?

The Supplier Portal module is designed to facilitate Supplier interactions during tender process and later for contract management. The system aims to enhance the integrity and transparency of the procurement process and enables the streamlining of the processes: Suppliers can use online portal to view solicitation documents, submit their bids, communicate with procurement office, etc.

The Supplier Portal system addresses [UN's fundamental procurement values](#), such as **fairness**, **integrity**, **transparency** and **accountability**.

Some of the main benefits of the system are:

- ✓ **No late submissions are accepted:** The system will automatically not accept any bid after the deadline.
- ✓ **Electronic sealed bids:** The system encrypts the bids submitted in the system and does not allow anyone to view any information provided before the bidding deadline.
- ✓ **Electronic stamping of the bids:** The system stamps all information submitted by suppliers and prevents anyone from altering, deleting, or adding anything to the bid after the deadline for submission.
- ✓ **Streamlines the bidding process:** Suppliers can register in the system, retrieve all information and solicitation documents, submit their bid online, edit it directly in the system, and receive automatic notifications once the evaluation is finalized and the contract is awarded.
- ✓ **Electronic submissions of Invoices :** The system enables suppliers to submit their own invoices and view payments, receipts and orders electronically.
- ✓ **Provides an audit trail:** As the Supplier Portal system records all activity in the system, it keeps an audit trail for increased accountability and transparency.
