Tsunami Hazard Map

This map is to help you protect yourself from the worst-case tsunami expected along our coast. It is based on the Relative Tsunami Hazard Maps developed by Humboldt State University and tsunami inundation mapping by the California Geological Survey. It uses the best currently available information and may be changed or updated as

additional scientific information becomes available. It includes no information about the probability of a tsunami hitting our area and does not reflect how an actual tsunami may impact the region. **It is intended to support tsunami evacuation planning and should not be used for any other purposes.**
