

The WaterLIFE DECLARATION

We, the undersigned, share a vision for healthy rivers, fair water use and sustainable supply chains. We are all committed to achieving this vision and recognise the importance of the following to do so:

PARTNERSHIP

Support and investment in the Catchment Based Approach, recognising catchment partnerships are an essential basis for collaborative action and impact at all scales.

EQUITY

Through its new abstraction and agricultural policies, the government must create a level playing field and ensure environmental protection across England and Wales.

COLLABORATION

All players working together openly, honestly and without blame, to develop shared, evidence-based and deliverable solutions.
