# Severe Weather

October 2024's near-record-setting driest first 30 days brought a complete lack of severe weather, which was in contrast to an otherwise active year across central Indiana, with 31 severe weather episodes since late February that included 12 tornadoes.

Instead, Moderate Drought (D1) expanded southward through October, encompassing most areas north and west of the Indianapolis Metro by the October 22<sup>nd</sup> U.S. Drought Monitor Update. By the October 29<sup>th</sup> update, D1 had advanced to all but far southern and far eastern central Indiana, while Severe Drought (D2) had expanded southward into ten of the region's northern counties – including all areas northwest of Frankfort and north of Muncie.
