ESSL Scientific Report No. 2009-01

ESSL

European Severe Storms Laboratory e.V.

European Conference on Severe Storms

ECSS 2009

Preprints

5th ECSS, Stadtsäle Bernlochner, Landshut, DE, 12-16 October 2009

As of: 26/11/2009 Revision: [2]

ESSL – European Severe Storms Laboratory e.V.		
Dissemination Level		
PU	Public	**X**
PO	Restricted to members and partner organizations (including the Advisory Council)	
RE	Restricted to a group specified by the Executive Board (including the Advisory Council)	
CO	Confidential, only for members of the Executive Board (including the Advisory Council)	

Table of contents

ECSS 2009 Preprint volume front cover page, index, back cover:
http://www.essl.org/ECSS/2009/preprints/chapter00.pdf (0.9 MB)

Session 1: Theory of convection, atmospheric instability, and synoptic or orographic forcing
http://www.essl.org/ECSS/2009/preprints/chapter01.pdf (2.0 MB)

Session 2: Dynamics, microphysics and electrification of severe storms
http://www.essl.org/ECSS/2009/preprints/chapter02.pdf (7.2 MB)

Session 3: Severe weather climatology and hazard assessment
http://www.essl.org/ECSS/2009/preprints/chapter03.pdf (7.6 MB)

Session 4: Climate change impacts on severe storms, development of adaptation concepts
http://www.essl.org/ECSS/2009/preprints/chapter04.pdf (3.2 MB)

Session 5: Forecasting, nowcasting and warning of severe storms
http://www.essl.org/ECSS/2009/preprints/chapter05.pdf (7.9 MB)

Session 6: Numerical studies, e.g. of convective initiation, storm life cycles and phenomena
http://www.essl.org/ECSS/2009/preprints/chapter06.pdf (8.9 MB)

Session 7: Remote sensing of severe storms, e.g. by satellite, radar and lightning detection
http://www.essl.org/ECSS/2009/preprints/chapter07.pdf (13 MB)

Session 8: (Extra-)tropical cyclones: embedded thunderstorms and large-scale wind fields
http://www.essl.org/ECSS/2009/preprints/chapter08.pdf (2.6 MB)

Session 9: Severe storm case studies & field campaigns, e.g. COPS, THORPEX, VORTEX2
http://www.essl.org/ECSS/2009/preprints/chapter09.pdf (11 MB)

Session 10: Severe weather reporting and databases, e.g. applied to forecast evaluation
http://www.essl.org/ECSS/2009/preprints/chapter10.pdf (3.2 MB)

Session 11: Socio-economic aspects, e.g. damage analysis, wind speed vs. damage relation
http://www.essl.org/ECSS/2009/preprints/chapter11.pdf (4.6 MB)

Session 12: Socio-economic aspects, e.g. emergency response and risk management, security of critical infrastructures
http://www.essl.org/ECSS/2009/preprints/chapter12.pdf (0.5 MB)

Session 13: *Evening session*: Videos and pictures of severe convective weather
http://www.essl.org/ECSS/2009/preprints/chapter13.pdf (0.8 MB)
