FINANCE COMMITTEE

Hundred and Sixty-second Session

Rome, 23 - 25 May 2016

Report on the Utilization of WFP's Advance Financing Mechanisms (1 January - 31 December 2015)

Queries on the substantive content of this document may be addressed to:

Mr Finbarr Curran
Director, Budget and Programming Division

EXECUTIVE SUMMARY

- The “Report on the Utilization of WFP’s Advance Financing Mechanisms (1 January–31 December 2015)” is submitted to the Board for consideration.
- WFP is funded entirely by voluntary contributions, and as part of its commitment to leave no one behind, it must reach those most in need first. On-time delivery of benefits is critical for ensuring that the poorest and most vulnerable – women and children in particular – have timely access to the nutritious food that they need. WFP has developed advance financing tools that enable it to be flexible in funding its operations according to needs.
- This paper reports on the use of these advance financing tools in 2015 and on improvements made to the Immediate Response Account (IRA).

GUIDANCE SOUGHT FROM THE FINANCE COMMITTEE

- The Finance Committee is requested to take note of WFP’s “Report on the Utilization of WFP’s Advance Financing Mechanisms (1 January–31 December 2015)”.

Draft Advice

- **The FAO Finance Committee advises the Executive Board, in accordance with Article XIV of the General Regulations of WFP, to take note of the “Report on the Utilization of WFP’s Advance Financing Mechanisms (1 January–31 December 2015)”.**

Distribution: General

Date: 13 May 2016

Original: English

* *Reissued for technical reasons*

Agenda Item 6

WFP/EB.A/2016/6-I/1*

Resource, Financial and Budgetary Matters

For consideration

Executive Board documents are available on WFP's Website (<http://executiveboard.wfp.org>).

Report on the Utilization of WFP's Advance Financing Mechanisms (1 January–31 December 2015)

Draft decision*

The Board takes note of “Report on the Utilization of WFP's Advance Financing Mechanisms (1 January–31 December 2015)” (WFP/EB.A/2016/6-I/1*).

Introduction

1. WFP is funded entirely by voluntary contributions, and as part of its commitment to leave no one behind, it must reach those most in need first. On-time delivery of benefits is critical for ensuring that the poorest and most vulnerable – women and children in particular – have timely access to the nutritious food that they need. WFP has developed advance financing tools that enable it to be flexible in funding its operations according to needs.
2. This paper reports on the use of these advance financing tools in 2015 and on improvements made to the Immediate Response Account (IRA).

* This is a draft decision. For the final decision adopted by the Board, please refer to the Decisions and Recommendations document issued at the end of the session.

Advance Financing Mechanisms

3. Two mechanisms provide advance spending authority for projects:
- Internal Project Lending (IPL).¹ This mechanism advances funding for projects if collateral exists in the form of forecast contributions; it has a ceiling of USD 570 million. The forecasts are made at high, medium or low probability, and lending can be made up to an average of 80 percent of all categories of forecast contributions.² When the forecast contribution is received, the advance is repaid.
 - The IRA. This is a multi-year and multilateral funding facility that provides immediate assistance in emergencies in the absence of collateral. The IRA is replenished by direct donor contributions (see Annex I). Allocations can also be revolved when a project allocation is reimbursed, using donors' contributions made directly to the project concerned. The IRA target level was increased from USD 70 million to USD 200 million in 2014.³
4. Figure 1 illustrates the process used to decide which advance-financing mechanism should be deployed.

Figure 1: Decision process for deploying the IPL or IRA

5. The stability of the IRA was enhanced in 2015 by a transfer of USD 50 million from the Programme Support and Administrative Equalization Account to the IRA with a view to establishing a permanent revolving/lending capacity irrespective of the timing and level of contributions. The level is to be maintained by judicious lending supported by risk analysis at the time of allocation and a repayment schedule.

¹ Part of the Working Capital Financing Facility (CFF).

² WFP/EB.A/2014/6-D/1, paragraph 25.

³ WFP/EB.2/2014/5-A/1, paragraphs 9–11.

Use of the Working Capital Financing Facility for Internal Project Lending in 2015

6. Significant changes in WFP's advance financing mechanisms were made at the Board's 2014 Annual Session: i) approval of the separation of the Global Commodity Management Facility (GCMF) and corporate services advances from the WCFF; and ii) approval of an increase in the WCFF ceiling to USD 570 million.
7. WFP operated under this new advance financing system for the first full year in 2015. Table 1 shows that 157 IPL advances totalling USD 777.5 million were made to 73 operations, of which 60.7 percent went to emergency operations (EMOPs), 30.6 percent to protracted relief and recovery operations (PRROs), 1.8 percent to development projects and country programmes, and 6.9 percent to special operations.
8. The value of advances made in 2015 fell by USD 315 million – 29 percent – from the 2014 level. There was a reduction of USD 298 million in advances made to the Syrian Arab Republic and the surrounding region as targeting and prioritization plans were developed on the basis of available and forecast resources, which reduced the need for IPL allocations. Other significant reductions were USD 36 million in South Sudan, and USD 37 million in the West Africa Ebola response. The most significant increase in 2015 was USD 45 million in Yemen.

Year	Number of loans	Amount advanced (USD million)	Average loan amount (USD million)
2004	5	27.1	5.4
2005	10	154.5	15.5
2006	4	36.8	9.2
2007	21	157.3	7.5
2008	58	324.6	5.6
2009	35	227.1	6.5
2010	62	427.3	6.9
2011	64	439.1	6.9
2012	120	636.1	5.3
2013	132	675.2	5.1
2014	161	1 092.8	6.8
2015	157	777.5	4.9
All years	829	4 975.4	6.0

9. Advances from the WCFF in 2015 included: i) USD 328.2 million for operations in the Syrian Arab Republic and adjoining region; ii) USD 62.3 million for Yemen to secure its pipeline and reduce delivery lead times; iii) USD 45.9 million for pre-positioning food in South Sudan; and iv) USD 33.6 million for ensuring timely deliveries of food in Iraq.

Yemen

Early in 2015, WFP launched a flash appeal in response to emerging humanitarian needs, which resulted in several donors indicating that contributions would be forthcoming. To cover immediate food needs through PRRO 200636 and augment capacity through the special operations, IPL advance financing was provided against high-probability forecasts. This enabled the country office to secure food from the GCMF and nearby markets, greatly reducing delivery lead times.

South Sudan

Advances provided at the beginning of 2015 supported seasonal pre-positioning of food during the February–May dry season, before the rains rendered 60 percent of the country inaccessible by surface transport. When increased fighting in parts of the country in mid-2015 displaced a significant number of people, WFP used the IPL facility to procure high-energy biscuits for rapid delivery to those in need at a time when normal distribution was impossible.

Use of the Immediate Response Account in 2015

10. The IRA was established in December 1991 as a multilateral funding facility to provide immediate assistance in emergencies. Allocations from the account (see Annex II) are made to operations requiring a rapid injection of resources in the form of a loan or a grant to address life-threatening situations where no contributions are forecast. Allocations may be made up to the balance of funds available in the account at the time. If the project receives no contributions after an IRA loan allocation is made, which would allow the allocation to be revolved, the allocation may be converted to a grant.
11. In 2015, IRA income increased by USD 54.2 million from the 2014 level. This included a one-time transfer of USD 50 million from the Programme Support and Administrative Equalization Account⁴ to provide loans without reliance on specific donor contributions or the amount of repaid advances. Underlying donor contributions to the IRA increased by USD 4.2 million, 8 percent more than in 2014.

	2009	2010	2011	2012	2013	2014	2015
New contributions	52.7	37.3	38.1	56.2	52.1	53.1	107.3
Allocations	136.6	151.9	161.9	126.1	165.3	182.0	164.2
Revolved funds	86.3	113	104.4	82.4	88.6	132.6	95.3

12. Allocations from the IRA in 2015 totalled USD 164.2 million (see Table 2). They were utilized for 18 PRROs, 3 special operations and 21 EMOPs of which 13 were immediate-response EMOPs approved under the delegated authority of Country Directors, Regional Directors and the Director of Emergencies.
13. In 2015, EMOP 200339 in the Syrian Arab Republic continued to receive significant IRA allocations. Other large allocations were made to: i) Yemen for the purchase of cereals and pulses to cover shortfalls anticipated for January and February 2016; ii) Somalia for pre-positioning of food in areas expected to be flooded; iii) Nepal in response to the April earthquake; and iv) Iraq to ensure uninterrupted food supplies for one month for 1.8 million food-insecure people.
14. Thirteen immediate-response EMOPs valued at USD 12.3 million were approved in 2015, compared with 15 in 2014 costing USD 16.7 million.

⁴ WFP/EB.A/2015/6-D/1.

15. The IRA also supported emergency preparedness in 11 countries at a cost of USD 1.73 million; in 2014 such support was given in three countries at a cost of USD 450,000. In late 2015 the large number of countries requesting IRA allocations to prepare for the current El Niño phenomenon threatened to exceed the USD 2.0 million annual limit for such allocations, which was approved by the Board in 2004 and not reviewed since then. In the light of the increase in the annual target level of the IRA effected in 2014, the Secretariat is proposing a similar revision of the annual limit for emergency preparedness and related needs assessments (see WFP/EB.A/2016/6-D/1).
16. At the end of 2015 the IRA balance stood at USD 59.0 million, compared with USD 17.8 million at the end of 2014.

In Somalia the IRA was critical in starting PRRO 200844. WFP procured 4,900 mt of cereals, SuperCereal, Plumpy'Doz, Plumpy'Sup and vegetable oil from the GCMF on receipt of the IRA allocation. The first consignment was received in Somalia within two months, enabling the country office to address pipeline shortfalls and assist vulnerable households through the lean season.

Observing that support for the response to the April 2015 earthquake in Nepal was not materializing as quickly as anticipated, WFP sought to publicize the effects of the earthquake on food security and used the IRA to ensure that immediate food assistance continued while resources were being mobilized for EMOP 200668.

IRA Grants Made During 2015

17. There were 16 individual IRA allocations in 2015, made as grants or converted into grants during the year. The value of these allocations was USD 10.4 million, most of which funded IRA support for emergency operations and preparedness activities.

Corporate Services Advances in 2015

18. There were no significant changes in the Global Vehicle Leasing Pool in 2015: the credit line remains at a sustainable USD 22 million, as given in the Management Plan (2016–2018).
19. Nine advances totalling USD 19.4 million were made from the Capital Budgeting Facility (CBF) to: i) support the Logistics Execution Support System (LESS), bringing the total advanced since 2013 to USD 24.5 million; ii) upgrade facilities at Dollow, Somalia; and iii) support works at the Humanitarian Logistics Base in Djibouti. Recoveries of USD 3.5 million had been made by the end of 2015 from projects where LESS was operating. The CBF ceiling was increased in the Management Plan (2016–2018) from USD 28 million to USD 40 million to continue the LESS project, complete the improvements to premises started in 2015 and start work on others.
20. Twenty-two other advances totalling USD 49.3 million were made in 2015 for fee-for-service activities for security, telecommunications, evaluations and Gender Office activities.

The Global Commodity Management Facility

21. The objective of the GCMF is to improve WFP's efficiency and effectiveness by anticipating needs and resources and setting the supply process in motion earlier, enabling WFP to exploit favourable market conditions and reducing response times in emergencies. It is administered through a special account for purchasing food in advance of requests from projects.
22. WFP maintains food inventories for certain planning zones to reduce delivery lead times: inventory is replenished according to aggregated demand and projected resources and shortfalls. Food is released to projects on receipt of confirmed contributions or advances from the WCFE or the IRA. Since its inception in 2008, the approved level of the GCMF has increased from USD 60 million to USD 350 million to provide for operations covering large areas and for more non-cereal foods.

2015 Highlights

23. The GCMF purchased 626,000 mt of food in 2015 valued at USD 372 million. During the year 848,000 mt was purchased from the GCMF inventory by 41 country offices in four planning zones. The average lead-time for these purchases was 37 days, 63 percent fewer than with conventional procurement processes and exceeding the target of a 50 percent reduction. The average monthly inventory in WFP's pipelines during 2015 was 26,000 mt, and average storage time was 78 days. This enabled WFP to meet operational requirements promptly.
24. In 2015, 69 percent – 616,000 mt – of the food purchased for the East Africa supply line was delivered to country offices through the GCMF, an increase of 28 percent in terms of volume from 2014. The average lead time was 40 days, compared with 107 days for conventional purchases.
25. Since the activation of the Level 3 response in Yemen in July 2015, 73,000 mt of food has been delivered through the GCMF; before this only Plumpy'Doz and Plumpy'Sup had been supplied using the GCMF. The GCMF supply line was rapidly expanded to include split peas, wheat and vegetable oil, and the first food item from it was made available in May 2015 with a 13-day delivery time from the purchase order.
26. The North Africa and Middle East GCMF supply line, established in December 2012, delivered 93,000 mt of food for the Syrian crisis in 2015 – 41 percent of cash-funded purchases. The average lead time was 77 days, whereas conventional procurement required 115 days.
27. The southern Africa supply line, established in May 2013, provided 40,000 mt of food in 2015 – 53 percent of cash-funded purchases.
28. The GCMF West Africa supply line was used to deliver 93,000 mt of food to country offices – 44 percent of requirements. The average lead-time was 43 days compared with 107 days for conventional purchases.
29. The GCMF team remains a major business counterpart for the design, validation and testing of LESS.
30. With support from the Canadian Department for Foreign Affairs, Trade and Development, GCMF was transformed into a business team with a view to maximizing its sustainability. This helped to improve collaboration, risk management and information-sharing through weekly and monthly reports and monthly operations meetings with supply partners.
31. The forward planning processes enabled WFP to save USD 30 million on food purchases in 2015, USD 9.6 million through the GCMF and USD 20.4 million through new contract modalities such as food-supply agreements. Local purchases made after harvests, purchases based on market intelligence and the development of better contracts and pricing mechanisms all led to savings.
