Climate action and finance to address food crises in fragile and conflict-affected contexts

Monday, 4 December 2023, 15.30 – 16.30 (GMT+4)

Food and Agriculture Pavilion, Blue Zone, Dubai Expo City, UAE

Live stream available here: <https://foodpavilion.org/blog/programme/climate-action-to-address-food-crisis-in-fragile-and-conflict-affected-contexts/>

Climate action and finance in agrifood systems offer solutions to help tackle food crises, reduce forced displacement and climate-induced mobility, build climate resilience and sustain peace in fragile and conflict-affected countries.

This session will provide evidence for mobilizing investment in actions that build climate resilience in the context of food, humanitarian, and environmental crises. The event supports the COP28 Presidency focus on boosting conflict and climate-sensitive policies and investment that protect lives and livelihoods, and support community resilience, specifically in fragile and conflict-affected contexts.
