FAO REGIONAL CONFERENCE FOR AFRICA

Thirty-first Session¹

New dates to be confirmed

Update of the Vision and Strategy for FAO's Work in Nutrition

Executive Summary

In April 2019, the 161st Session of FAO Council endorsed a recommendation for the development of an updated Vision and Strategy for FAO's work in nutrition. The updated Vision and Strategy for FAO's work in nutrition will consider: 1) all forms of malnutrition; 2) food systems over and beyond nutrition-sensitive agriculture; and, 3) the current global context building on the outcomes of the Second International Conference on Nutrition, the Rome Declaration on Nutrition and its Framework for Action, and the United Nations Decade of Action on Nutrition. It will also include a robust implementation plan and accountability framework, and take into account context- or regional-specific considerations.

This document provides a summary of the progress in updating the Vision and Strategy for FAO's work in nutrition, and its overall processes.

Suggested action by the Regional Conference

The Regional Conference may wish to provide guidance on the further development of the Vision and Strategy for FAO's work in nutrition in the region.

Queries on the content of this document may be addressed to:

Regional Conference Secretariat

ARC-Secretariat@fao.org

¹ Rescheduled from 23-27 March 2020, Victoria Falls, Zimbabwe

I. Introduction

1. The 2019 State of Food Security and Nutrition in the World² documents the ever more complex challenges of malnutrition in the world; the alarmingly high levels of both under- and over-nutrition. There are 821 million individuals suffering chronic hunger, while two billion individuals are overweight, of which 672 million are obese.

2. Unhealthy diets are an underlying cause of both under- and over-nutrition. FAO, the leading United Nations (UN) agency for food and agriculture with expertise across the food system, has an extremely important role to play in improving nutrition for all.

3. Recent global developments in both knowledge and practice have highlighted the vital role that functioning food systems play in supporting nutrition by ensuring availability and access to healthy diets. Specifically, in November 2014, ICN2, co-hosted by FAO and the World Health Organization (WHO), adopted the Rome Declaration on Nutrition³ and its Framework for Action⁴. In September 2015, the international community subscribed to 17 Sustainable Development Goals (SDGs) aimed at paving a trajectory towards a hunger-free, more equitable and more sustainable world by 2030.⁵ In April 2016, the UN General Assembly endorsed the Rome Declaration on Nutrition and the Framework for Action and proclaimed the UN Decade of Action on Nutrition 2016-2025⁶ and mandated FAO and WHO to co-lead the implementation of the Decade.

4. The Programme Committee, at its 121st Session in March 2017, requested an evaluation of the Vision and Strategy to improved nutrition for all remains relevant and that the Strategy remains fit for purpose.⁷ The evaluation of the Strategy⁸ was finalized in February 2019 and made several recommendations to

5. In March 2019, the 126th Session of the Programme Committee requested an update of the Strategy and a report on the progress of the update to be presented at its 127th Session in November 2019.⁹

6. In mid-2019, the process of updating the Strategy was initiated, led by the Nutrition and Food Systems Division of FAO (ESN), under the supervision and guidance of the Assistant Director-General for Economic and Social Development (ES-ADG). This is an inclusive process, benefiting from the work of the entire Organization, and with internal and external consultations and iterative drafting throughout 2020.

II. Review of Progress by the Programme Committee¹⁰ and the Council¹¹

7. An annotated outline¹² of the proposed updated Strategy was developed and submitted to the Programme Committee in late September 2019, and reviewed at its 127th Session held from 4 to 8 November 2019.

8. The Programme Committee appreciated the update on the Strategy development process and supported the L Z focus on addressing all forms of malnutrition, taking note of FAO's commitment to this goal. The Committee welcomed the food systems approach and requested that the L Z h a H Zgb Zthg hf i ZZb Z] Zg Z l g ab Z] and fully reflect the key recommendations from the evaluation of the previous Strategy. The Committee further recommended that this be conducted through an inclusive consultation process.

9. The Programme Committee looked forward to reviewing a draft of the Strategy in its entirety at its 129th Session (November 2020) and the final version at the 130th Session (March 2021), for its presentation and endorsement by the FAO Council (March 2021) in advance of the UN Food Systems Summit, if possible.

10. The 163rd Session of the FAO Council in December 2019 endorsed the recommendations of the 127th Session of the Programme Committee regarding the continued work on the Strategy.

III. Summary of the Updated Strategy

11. The updated Strategy will comprise the following sections: a) Introduction and Context; b) Vision; c) Approach; d) General Principles; e) Outcomes; f) Means of Implementation; g) Implementation Plan; and h) Accountability Framework.

12. **Introduction and Context.** The introduction will show how nutrition is vital to achieving FAO corporate objectives in support to countries aiming to achieve their targets for the SDGs. It will emphasize the imperative for FAO to advance its Organization-wide approach to nutrition in order to fulfil its leadership commitment under the UN Decade of Action on Nutrition. The context will expound on critical factors influencing the update of the Strategy, including: a) the changing nature of the burden of malnutrition; b) the major structural changes globally that both affect malnutrition, and are influenced by it; c) the development of the SDGs and numerous initiatives and opportunities (e.g. UN Decade of Action on Nutrition) to catalyse advances in nutrition; and d) the increased number of organizations relevant to nutrition.

13. **The Vision** : H Z f g h bthg h g bthg l æ Zi a Zh aZ Zælg] b h] Ze Z able to practice dietary patterns that promote all dimensions of health and well-being; are accessible, affordable, safe and equitable; are culturally acceptable; and have low environmental impact. It will also highlight the food-system approach to reaching this goal, emphasizing the comparative advantage of FAO in focusing on the food-related aspect of nutrition.

14. **Approach** : H Zi hZa h f i h l g g bthg b h iih a f i e f g Zthg h i h e b b % innovations and actions across food systems at the global, regional, national and local levels that will gZ e Zælg] b h] Ze h Za : H bthg h g bthg B l æ[l æ] hf a i b h : H l g Zæ domains of the food system, food supply chain, food environment and consumer behaviour.

¹¹ [Add link to Council Report when it becomes available]

¹² <http://www.fao.org/3/nb124en/nb124en.pdf>

15. **General Principles.** The updated Strategy will stress that : Healthy diet is founded on a set of core principles, including: i) all individuals have a right to adequate food; ii) gender equity and equality must be elevated and adverse gender-related impacts must be avoided; iii) partnerships are critical to end all forms of malnutrition and the leading role of partners in other vital areas, such as health system strengthening and education, is recognized and supported; and iv) taking a systems approach implies quantifying and balancing the potential trade-offs to make healthy diets safe, available, affordable, acceptable, and appealing for all by weighing the impact of various policies and actions on different aspects of sustainability (environment, society and culture, economy), without compromising the health of individuals.

16. **Outcomes.** The updated Strategy will define a results chain containing outcomes aligned with FAO s mandate and a NG Sustainable Development Goals.

- Outcome 1. Globally, regionally, nationally and locally, there is clarity of vision of attaining diets that promote all dimensions of health and well-being; are accessible, affordable, safe and equitable; are culturally acceptable; have low environmental pressure and impact; and the changes needed to enhance those food systems not delivering this vision.
- Outcome 2. Partnerships among multiple stakeholders are forged and strengthened to enhance a common understanding of and commitment to the needed changes in policy and action to achieve healthy diets while supporting economic, social, cultural and environmental sustainability.
- Outcome 3. Global, regional, national and local partners are fully engaged in identifying the influence and impact their current policies have on the food system and nutrition and they are engaged with the food systems changes, including innovations, needed to enhance policy coherence and impact.
- Outcome 4. Capacity in countries is sufficient and governance structures are working effectively at global, regional, national and local levels to enable policies, innovations and actions to be successful.
- Outcome 5. Government actors and other stakeholders are implementing the key policies, innovations and actions needed for positive change.

17. **Means of Implementation.** The updated Strategy will detail the actions needed to reach these outcomes. These actions will be interconnected and can be enhanced or de-emphasized based on context. They are not sequential actions nor do they function in siloes, but rather in synergy, aligned with other actions by all partners and stakeholders.

- FAO will advocate and communicate at national, regional and global levels, in areas related to enhancing access to diets that promote all dimensions of health and well-being, specifically diets that are accessible, affordable, safe and equitable; are culturally acceptable; and have low environmental impact; and ensuring the changes needed to transform those food systems not reaching this vision.
- FAO will collate data, conduct analysis and synthesize evidence on diet, nutrition and food systems.
- FAO will provide a meeting place for Members and partners, including development partners, civil society and the private sector. As a credible neutral agency, FAO will facilitate and broker strengthened dialogue and common understanding of changes needed to ensure food systems achieve healthy diets while supporting all dimensions of sustainability.
- FAO will engage countries and partners in policy analysis to identify the impact of existing policies, gaps in policies, and what changes and innovations are needed to enhance coherence

and impact across the food system. This action may also include translation and adaptation of international agreements, codes of conduct, etc., into country-specific norms and guidelines.

- FAO will support the enhancement of national capacities across the individual, organizational, and policy level to facilitate the development of governance structures and partnerships needed for policy, innovation, and action implementation.
- FAO will provide technical assistance within its area of expertise and mandate for action to ensure delivery functions are operating.

18. **Implementation Plan.** An implementation plan will be developed that takes into consideration context- or regional-specific elements.

19. **Accountability Framework.** An accountability framework will be developed in alignment with : H h i h Z i h Z f l g % i h l g Z g] Z huntability mechanisms.

IV. Processes and Timeline

20. Extensive consultations, both internal to FAO and with external partners, began in 2019 and will continue throughout 2020.

21. A Nutrition Strategy Technical Task Team (with representatives from all relevant FAO headquarters technical divisions and departments and all Regional Offices and several Subregional Offices) was convened. The first meeting was held on 11 November 2019 to review and collate feedback on the annotated outline of the updated Strategy. The Task Team will meet regularly in 2020 to consider key components of the Strategy and review proposed inputs for the various sections of the Strategy.

22. By way of this information note, shared with all Regional Conferences, participants will receive information on the process and direction of the update of the Strategy at their respective Regional Conference¹³:

- Asia and the Pacific (17-20 February 2020);
- Near East (2-4 March 2020);
- Africa (23-27 March 2020);
- Latin America and the Caribbean (27-29 April 2020); and
- Europe (5-7 May 2020).

23. A preliminary draft of the updated Strategy will be shared with the all FAO Technical Committees in 2020. The draft will be shared on the occasion of the respective Technical Committees:

- Committee on Fisheries, 13-17 July 2020;
- Committee on Forestry, 22-26 June 2020;
- Committee on Commodity Problems, 23-25 September 2020; and
- Committee on Agriculture, 28 September - 2 October 2020.

24. External consultations with key stakeholders, including UN partner organizations, selected academic institutions, donors, non-governmental agencies, and others, will be conducted in 2020.

25. An informal seminar with Members to present and review a draft of the updated Strategy will be held during the second quarter of 2020 in Rome, Italy (a specific invitation will be extended to all permanent representations in Rome).

¹³ <http://www.fao.org/about/meetings/en/>

26. A subsequent draft, having taken into consideration input from the aforementioned consultations, will be submitted to the Programme Committee for consideration during its 129th Session to be held November 2020.

27. The final Strategy will be submitted to the 130th Session of the Programme Committee for approval (March 2021), and subsequently presented to the FAO Council for endorsement (March 2021).

28. As part of this process, the Regional Conference may wish to provide guidance on the further development of the Vision and Strategy h : H h d l g b h g h f a i i b h a region.
