

## Johannes Geiss Fellowship 2024

The International Space Science Institute (ISSI) in Bern, Switzerland invites applications for the Johannes Geiss Fellowship (JGF). With this fellowship ISSI honors the memory of Johannes Geiss, the founder of ISSI, and his contributions to the space sciences.

The fellowship was established in 2015 to attract internationally renowned scientists to make a demonstrable contribution to the ISSI mission by pursuing ambitious independent research, in any of the disciplines that are part of ISSI's core mission: astronomy & astrophysics, astrobiology, plasma physics, solar physics, solar system science, Earth sciences from space.

For information about ISSI and its mission please refer to [www.issibern.ch](http://www.issibern.ch)

The Johannes Geiss Fellow is expected to participate in ISSI activities and to collaborate with ISSI's scientific staff and visitors, as well as with research institutes in Switzerland and neighboring countries. The Johannes Geiss Fellow is invited to give public lectures in close collaboration with the Pro ISSI Association.

The JGF provides a stipend covering travel costs and living expenses for a stay at ISSI Bern of up to 6 months. ISSI can host fellows either for a single extended visit (e.g., during a sabbatical) or for several shorter duration stays.

The application (to be submitted as a single pdf-file) should comprise a cover letter (max. 1 page), a brief outline of the research planned while at ISSI and possible collaborations with Swiss and/or other institutions (max. 3 pages), a curriculum vitae (max. 2 pages), a list of the 10 most relevant publications, and a declaration of availability for outreach activities.

All applications must be received by ISSI no later than **October 3, 2023**, through the online submission form at <https://www.issibern.ch/JGF-application/>. The final selection will be communicated no later than November 1, 2023. The earliest possible starting date for the 2024 JGF is January 2024.

Further information may be obtained from the ISSI home page ([www.issibern.ch](http://www.issibern.ch)) and from Dr. Antonella Nota ([antonella.nota@issibern.ch](mailto:antonella.nota@issibern.ch)).

*ISSI is a scientifically independent and neutral Space- and Earth Science Institute that advances science by facilitating open multi-disciplinary discourse in a stimulating environment, reaching out towards new scientific horizons.*
