

**Table 1: Study 1 Correlations***Correlations between voice variables and psychology self-report measures*

	VHI	Voice Symptoms	Avoidant Attachment	Anxious Attachment	Anxiety	Shame	Minimization	Ch. Trauma
VHI	-	.63***	.28**	.37***	.23*	.20*	-.06	.24*
VRQOL <sup>1</sup>	.89***	.50***	.34***	.47***	.41***	.42***	-.13	.29**

\* =  $p < .05$ , \*\* =  $p < .01$ , \*\*\* =  $p < .001$ 

1. Higher V-RQOL scores indicate lower voice-related quality of life
