

Fuels and Fire Behavior Advisory

Area(s) of Interest

Date Advisory takes affect

Subject: A brief synopsis of the condition(s) present that warrant the Advisory (Should be no more than one or two sentences)

Discussion: Detailed description of the condition(s) (may include graphics)

Difference from normal conditions: In specific, measurable terms how is this condition exceptional or extreme when compared to normal for the time of year or compared to other extreme fire seasons for the area of concern?

Concerns to Firefighters and the Public: Specific circumstances that are likely to result from the Advisory conditions

Mitigation Measures: How firefighters and fire managers should be prepared to deal with each of the specific circumstances listed above

Area of Concern: Detailed description of the area of concern (may include a map)

NOTE (Delete everything including and below this line):

text in black is editable and should be tailored to fit specific situation for advisory message. Title and topic areas of advisory are to be in RED. Topic area titles to be standard.

**Advisories should only be issued to address an exceptional or extreme circumstance that could threaten firefighter or public safety. Conditions that could be reasonably expected normally do not warrant a Fuels and Fire Behavior Advisory*

**Each Advisory must include a detailed map of the affected area when submitted to the Predictive Services unit (This map is used to complete the national Advisory map and may be in addition to the 1 page allowed for the Advisory)*

**Advisories should be coordinated with neighboring administrative units to ensure that all areas with similar conditions are being addressed.*

**Only one Advisory may be active at any time over any area. If multiple Advisory conditions are present incorporate them into one Advisory*

**Each Advisory should be no more than one page. If more detailed information is available provide a link in the Advisory where that information can be obtained*

**Advisories will remain in effect for 14 days from issuance. If the Advisory conditions continue beyond the 14 days a new Advisory will need to be issued to update conditions and circumstances with more timely information. At the request of the issuer Advisories may be lifted before the 14 days has passed.*

**All Advisories that extend beyond a single local administrative unit or that will be posted on the national Advisory map must be coordinated with the Geographic Area Predictive Service Units*
