¹ These products are Citrix Ready when using either the Xerox Global Print Driver[®], the product native print driver or the Citrix universal driver;

² Device is compliant/tested, but has not been formally certified;

³ All products certified in the U.S. EPEAT-certified products vary by country in Belgium, Canada, Denmark, Finland, France, Germany, Netherlands, Luxembourg, Norway, Sweden, Switzerland and the U.K. Visit www.epeat.net for information regarding country-specific EPEAT certifications;

⁴ Xerox Integrated Server;

⁵ Certification in progress/Undergoing evaluation;

⁶ Requires optional wireless network adapter;

⁷ Trellix was formerly known as McAfee[®] Enterprise Business;

⁸ Common Criteria Certification expected Q2 2025. Expected date subject to change.

PRINT DRIVER/DEVICE/SERVER ENVIRONMENT CERTIFICATIONS

Microsoft® WHQL Certification

Windows Hardware Quality Labs testing involves running a series of tests on third-party hardware or software and then submitting the log files from these tests to Microsoft for review. Xerox® Products are Windows Hardware Quality Labs (WHQL) certified to comply with Microsoft standards and ensure seamless compatibility with Microsoft Windows environments.

Citrix® Certification

Citrix Systems is an American multinational software and services company specializing in virtualization and remote access software for delivering applications over a network and the internet. Xerox is part of the Citrix-ready program, which allows vendors to perform a self-evaluation of their products against a set of metrics outlined by Citrix. Once the product passes certification, Xerox pays an annual fee for having its certified products listed on the Citrix website, as well as the right to use its logo. This certification ensures that a product using Citrix software will function as expected in a remote environment.

IPv6 Ready

Internet Protocol version 6 (IPv6) is a protocol for routing network traffic and identifying network-connected devices. IPv6 will be phased in over many years as the next-generation replacement for the global IPv4 standard. Because printers and multifunction printers comprise a sizable percentage of the world's networked devices, Xerox is transitioning its products' capabilities to be IPv6-compatible.

Bonjour®

Bonjour is Apple Inc.'s trade name for its implementation of zero-configuration networking, a service discovery protocol. Bonjour enables the automatic discovery of devices such as printers, other computers, and the services that those devices offer on IP networks using industry-standard IP protocols.

Mopria® Print Service

Mopria is an acronym derived from the Mobile Print Alliance. The charter of this alliance of printer manufacturers is to enable simple wireless printing from smartphones, tablets, and other mobile devices. Mopria printing does not require any driver installation or software download on these devices. Mopria Print functionality will be embedded in phones, tablets, or other mobile devices and there is no set-up required. When mobile device users have access to a Mopria-certified printer, they can effortlessly discover and print to this printer.

Wi-Fi Direct Certification

This certification lets you print from your mobile device without having to connect to a network. Adding the optional wireless USB adapter enables this connection and allows for both an Ethernet connection and Wi-Fi Direct connection to be enabled at the same time.

Apple® AirPrint®

Apple® AirPrint® is a driverless printing technology that enables Apple iOS devices including the iPhone®, iPad®, iPod Touch®, and even macOS computers to print without installing drivers or downloading software. AirPrint uses well-established, familiar technologies already in use today, such as Bonjour, IPP, PDF, and JPEG. AirPrint will continue to evolve to add new features and functionality. However, the basic operation of AirPrint will remain constant, where it requires only a few steps to work as it was designed to do.

APPLICATION CERTIFICATIONS

Cerner Certification

Cerner is the leading U.S. supplier of healthcare information technology solutions that optimize clinical and financial outcomes. Around the world, health organizations, ranging from single-doctor practices to large health networks, turn to Cerner for their powerful and intuitive solutions. Cerner offers clients a dedicated focus on healthcare, an end-to-end solution and service portfolio, and proven market leadership. Xerox pays Cerner for product certification, which is a 6-8 week process after the product is received in Kansas City. Once certified, Cerner lists the product on its internal customer website and sends Xerox a certificate. This certification allows Xerox to participate in customer bids where Cerner Certification is a requirement. Xerox also provides a product, including all supplies and services, to Cerner, until that product is at the end of its life. Cerner Certification is important to a customer's IT staff as this allows them the comfort of having 24/7 support 365 days a year through the Cerner help desk. Cerner provides this support as part of their HIS package. For example, a hospital can call and report a downed printer in the Emergency Room at 3 a.m. to receive remote support.

On June 20, 2012, Medical Information Technology, Inc. (MEDITECH) published a statement concerning changes to its printer testing program. This statement read in part, "Going forward, MEDITECH will no longer be testing laser printers. If a laser printer uses the PCL 5, 5c, or 5e language, it will work with MEDITECH and will therefore be supported. All other types of printers (dot matrix, barcode) will still be tested by MEDITECH."

MEDITECH Certification

Medical Information Technology, Inc. (MEDITECH) is a leading provider of integrated software solutions for healthcare organizations worldwide. This certification validates that Xerox® Devices are fully compatible with MEDITECH's MAGIC operating system, a health information system that provides a structured and easy-to-use programming language to more than 1,500 healthcare organizations globally. With this certification, Xerox continues to achieve noteworthy healthcare industry praise for its award-winning line of devices and it allows Xerox to participate in customer bids where MEDITECH Certification is a requirement. These certified devices are then fully supported by MEDITECH help desk technicians 24/7 and 365 days a year, giving their clients and ours the assurance that support will be available at all times.

SAP Certification

Together with SAP through our Gold-level membership in the SAP Printer Vendor Program, we provide seamless connectivity between SAP systems and your Xerox® Printers and MFPs. And as an SAP customer, you benefit from having SAP-certified Xerox® Device types available right from SAP's online delivery model. Whether you are using an existing Xerox® Product or plan to upgrade, we can assure you that you will have printing continuity within your SAP environment. You also have peace of mind knowing that you can contact SAP for support regarding any issues. And we have a direct link to SAP that allows us to keep our devices current and in line with SAP release updates. SAP-certified devices are available for the legacy R/3 system and newer ERP releases up to current SAP offerings.

SECURITY CERTIFICATIONS

Common Criteria Certification

The Common Criteria Certification provides independent, objective validation of IT products' reliability, quality, and trustworthiness. It is a standard that customers can rely on to make informed decisions about their IT purchases. Common Criteria (aka ISO/IEC 15408-1:2009) sets specific information assurance goals, including strict levels of integrity, confidentiality, and availability for systems and data, accountability at the individual level, and assurance that all goals are met. Common Criteria Certification is a requirement for hardware and software devices used by the federal government on national security systems.

FIPS 140-2/140-3

FIPS 140 is a series of coordinated requirements issued by the National Institute of Standards and Technology (NIST) to validate a product's level of security depending on its intended use. All hardware and software components used by the government and other key industries to collect, store, transfer, share, and disseminate sensitive but unclassified information must be FIPS 140-2 or 140-3 certified.

Trellix¹ Security

Built-in Trellix security protects against intrusion from within Xerox® MFPs built on Xerox® ConnectKey® Technology. Two levels of protection are offered.

Trellix Enhanced Security is standard and allows only an approved, predefined list of applications, code, and software files to run on the device. This Trellix agent is Xerox factory-installed and proactively monitors and prevents any changes made to the Xerox factory default system applications.

Trellix Integrity Control is an optional, commercial application that supports a higher level of whitelisting/allowlisting and change control or dynamic whitelisting/allowlisting. This protects the device's executable files from being tampered with and identifies trusted sources, controls what can change, who can change it, and when it can change.

ENVIRONMENTAL COMPLIANCE

ENERGY STAR®

With the goals of reducing energy consumption and greenhouse gas emission, ENERGY STAR is a voluntary program sponsored by the United States Environment Protection Agency. Products carrying the label are certified for matching or beating federal energy conservation standards.

Blue Angel

Based in Germany, Blue Angel is the world's first certification for environmental friendliness. It aims to promote ecological awareness and to guide environmentally conscious consumers to the most ecologically sound products.

EPEAT®

EPEAT (multiple countries) is a global registry for environment-friendly electronics for purchasers, manufacturers, resellers, and others wanting to find and promote environmentally preferable products. EPEAT uses a self-declaration and rigorous verification system to ensure the products conform to the established criteria. Once products are added to the registry, EPEAT uses independent experts to verify that the products meet the selected criteria as claimed. All Xerox® Products listed in this document are EPEAT-certified in the U.S. Various products are also certified in additional countries. For more information, go to www.epeat.net.
