## Acknowledgments

The Office of People Analytics (OPA) is indebted to numerous people for their assistance with the 2021 *QuickCompass of Sexual Assault Response Personnel (2021 QSAR)*, which was conducted on behalf of Dr. Nathan Galbreath, Acting Director of the Department of Defense (DoD) Sexual Assault Prevention and Response Office (SAPRO). The survey was conducted under the leadership of Dr. Ashlea Klahr, Director of OPA's Health and Resilience (H&R) Division. H&R research is conducted under the oversight of Ms. Lisa Davis, Deputy Director of H&R, and Dr. Rachel A. Breslin, H&R Chief of Military Gender Relations Research.

Policy officials who contributed to the development of this survey included Dr. Nathan Galbreath, Dr. Aubrey Hilbert, Dr. Tanya Banchs, Dr. Andra Tharp, and Dr. Rachel Thanos of DoD SAPRO.

The project manager for this effort was Mr. Mark Petusky of Fors Marsh Group, LLC (FMG). The lead survey design analysts were Ms. Amanda Barry, Mr. Mark Petusky and Dr. Rachel Wynn of FMG. Ms. Kimberly Wyborski, Director of Data Collection at FMG, was responsible for the creation of survey database and archiving standards. The Data Operations Manager on this survey was Ms. Autumn Chen.

FMG's Advanced Analytics team, under the guidance of Dr. Jennifer Gibson, Vice President, was responsible for all statistical aspects of this survey, including sampling, weighting, and nonresponse bias analysis. Mr. Stephen Busselberg and Mr. Alex McMillan were responsible for coordinating the sampling and weighting processes and developed the statistical weights based on the respondents for this survey.

A team consisting of Dr. Ashlea Klahr and Ms. Lisa Davis of OPA, Ms. Amanda Barry, Mr. Mark Petusky, Ms. Jenny Kim, Mr. Alex Fernandes, Ms. Elizabeth Richards, and Dr. Rachel Trump-Steele of FMG contributed to the writing and analyses provided in this report.

---

## Executive Summary

---

The following report provides an overview of the results of the *2021 QuickCompass of Sexual Assault Response Personnel (2021 QSAR)*. The report provides insights from Sexual Assault Response Coordinators (SARCs); Victim Advocates (VAs) and Uniformed Victim Advocates (UVAs); and Special Victims' Counsel (SVC), Victims' Legal Counsel (VLC), and Special Victims' Paralegal (SVP) professionals regarding their training, their access to and relationships with command and other professionals, their perceptions of resources provided to victims, the support they receive in their profession, and their personal wellbeing.

## Study Background and Methodology

### Study Background

The Department of Defense (DoD) is committed to providing victims of sexual assault the care and services they need to recover. The sexual assault response workforce is the backbone of this mission, and includes Sexual Assault Response Coordinators (SARCs), Victim Advocates (VAs), and Uniformed Victim Advocates (UVAs), as well as Special Victims' Counsel (SVC), Victims' Legal Counsel (VLC), and Special Victims' Paralegal (SVP).

SARCs provide confidential support and coordinate care for victims throughout the investigation and recovery process. VA/UVAs are advocates who provide education and resources to victims in addition to providing confidential support—these personnel are under the supervision of the SARC. SVC/VLC/SVPs are legal personnel who are active duty advocates representing victims by providing legal advice, guidance, and assistance with exercising their legal rights as a victim of sexual assault. In sum, sexual assault responders are responsible for providing support, guidance and advocacy for sexual assault victims, throughout the care and recovery process, and the justice process, when relevant.

The *2021 QSAR* was designed to provide insights from SAPR personnel at military installations worldwide. The National Defense Authorization Act (NDAA) for Fiscal Year 2021 required the Department to conduct a survey of SAPR personnel no later than June 30, 2021 to address several key elements including:

1. the state of support provided to sexual assault responders,
2. the ability of sexual assault responders to contact and access their installation commander or unit commander,
3. the ability of sexual assault responders to contact and access the immediate commander of victims and alleged offenders,
4. the responsiveness of commanders to sexual assault responders,
5. the support and services provided to victims of sexual assault,
6. the understanding of other response and prevention professionals and their willingness to assist,

7. the adequacy of the training received by sexual assault responders, and
8. any other factors affecting the ability of sexual assault responders to perform their duties.

The 2021 Q SAR was designed specifically to survey SARCs and VAs/UVAs on these key elements to meet this congressional mandate, and also included SVC/VLC/SVPs. The 2021 Q SAR is the fifth survey of this population following four previous iterations conducted triennially from 2009 through 2018.

### Survey Methodology

The 2021 Q SAR was administered via the web from June 8 through July 20, 2021. This survey was a census of all DoD SARCs and VAs/UVAs who were certified as of April 1, 2021, and all SVC/VLC/SVPs serving at the time of the survey fielding. The target population consisted of 1,973 certified SARCs, 21,101 VAs/UVAs, and 252 SVC/VLC/SVPs. Surveys were completed by 4,370 eligible sexual assault responders, yielding an overall weighted response rate of 19%. Data were weighted using an industry-standard process to reflect the known population of sexual assault responders as of April 2021. Weighting produces survey estimates that are representative of their respective populations. See Table 1 for a further description of the eligible respondents.

**Table 1.**  
*Weighted Eligible Respondents by Job Role and Service*

	Overall	SARC	VA/UVA	SVC/VLC/SVP
Army	2,358	598	1735	25
Navy	708	68	633	7
Marine Corps	372	53	308	11
Air Force	651	102	534	15
DoD Agency	80	42	38	0
Total	4,370	881	3,418	71

### Key Findings

#### Sexual Assault Responder Well-Being

The well-being of sexual assault responders varied by role, though all roles showed a decrease in well-being compared to 2018. Job stressors were generally highest for SVC/VLC/SVPs followed by SARCs. The greatest stressors for SVC/VLC/SVPs were their caseload and the subject matter of their work, while for SARCs the greatest stressors were the administrative requirements of their position and the increasing complexity of the program. While job stressors remained lowest for VA/UVAs, there were notable increases in stressors for VA/UVAs compared to 2018.

Sexual assault responders of all types indicated significantly higher rates of burnout, compassion fatigue, and vicarious trauma compared to 2018, with SVC/VLC/SVPs experiencing the highest levels.

- Burnout: SARCs (51%, up from 32%), VA/UVAs (40%, up from 26%), and SVC/VLC/SVPs (62%, unchanged)
- Compassion Fatigue: SARCs (32%, up from 23%), VA/UVAs (21%, up from 13%), and SVC/VLC/SVPs (75%, up from 54%)
- Vicarious Trauma: SARCs (23%, up from 14%), VA/UVAs (10%, up from 5%), and SVC/VLC/SVPs (36%, up from 27%)

### **Workplace Climate**

Work satisfaction was generally high for sexual assault responders. However, SVC/VLC/SVPs scored significantly lower in satisfaction than both SARCs and VA/UVAs. By contrast, SVC/VLC/SVPs scored significantly higher than both SARCs and VAs/UVAs on workgroup effectiveness.

Retaliation against sexual assault responders remained low, consistent with 2018. SARCs and SVC/VLC/SVPs were more likely than VA/UVAs to have witnessed or knew of retaliation in the past 12 months. Of note, only approximately half of sexual assault responders indicated they would feel comfortable seeking help with retaliation.

### **Self-Care Support**

Despite increases in work stress and related harms such as burn-out, the majority of sexual assault responders reported high levels of resilience, which is the ability to “return to the previous level of functioning” after a negative experience (Smith, et al., 2008, p. 194). This resilience may be bolstered by self-care; indeed, more than half of sexual assault responders indicated having adequate time for self-care, though SARCs and VA/UVAs indicated having less time for self-care in 2021 compared to 2018. Time for self-care was most limited among SVC/VLC/SVPs, consistent with their higher levels of burnout. When asked about which self-care measures they take to manage the stress of their job, most sexual assault responders indicated they use exercise to manage their stress, as well as spending time interacting with family and friends to relieve stress.

### **Command Relationships**

The majority of sexual assault responders endorsed positive perceptions of command trust and support, although SARCs felt more supported by commanders than other sexual assault responders and VA/UVAs experienced some declines in their responses compared to 2018. Most sexual assault responders reported commanders viewed their role as important, fully supported them, and were accessible. SARCs reported the most frequent communication with senior commanders, followed by SVC/VLC/SVPs, and all were more likely to communicate with the commanders of victims than commanders of alleged perpetrators.

## Care for Female and Male Victims

Overall, the vast majority sexual assault responders felt they had the quality of care and resources available to support both male and female victims of sexual assault. While responses remained high, there was a decrease in 2021 compared to 2018 in perceptions of the quality of care and resources available for female victims, including appropriate health care, sufficient policy guidance, and the program meeting specific needs of female victims.

## Expedited Transfers

In 2021, almost half of SARCs indicated they were involved in an at least one expedited transfer in the past 12 months, of which, nearly half had experience as both a sending and receiving SARC during a transfer. SARCs were also asked about communications they had as a receiving and/or sending SARC during the expedited transfer process. Since 2018 there was improvement in the proportion of receiving SARCs having necessary and useful information during an expedited transfer. However, receiving SARCs continued to lag behind sending SARCs in this domain, suggesting the need for further improving communication between sending and receiving SARCs.

## Collaboration

Sexual assault responders' involvement in Case Management Groups (CMGs) remained steady in 2021 compared to 2018, with SVC/VLC/SVPs more likely than SARCs and VAs/UVAs to be involved. CMGs were held virtually at a significantly higher rate than in 2018, likely due to the Coronavirus pandemic. CMGs were most often chaired by the installation commander and often lasted up to two hours. Sexual assault responders were also asked about the effectiveness of CMGs in addressing issues related to victims of sexual assault, including retaliation, legal processes, information sharing, victim medical and mental health concerns, and expedited transfers. In general, sexual assault responders perceived the CMG as effective in addressing each of these issues. However, SVC/VLC/SVPs had lower perceptions of CMG effectiveness compared to SARCs and VA/UVAs.

SARCs and VA/UVAs were asked about their involvement in High Risk Response Teams (HRRTs), and, if involved, their insight about the effectiveness of the HRRT. Only 3% of sexual assault responders reported being involved in a HRRT in the past 12 months, the majority of whom indicated the HRRT appropriately addressed the high-risk situation(s).

Sexual assault responders were asked to what extent they received appropriate support from other personnel in their efforts to assist victims. Overall, sexual assault responders reported receiving appropriate support from other professionals regarding victim care, with the most collaboration among sexual assault responders themselves, chaplains, and mental health professionals. Less than one-quarter of responders indicated they collaborated with community resources in 2021.

## Program Procedures

Participants indicated having clear program procedures for working with various populations, with highest clarity in working with DoD civilian employees, dependents, visiting personnel, and

deployed military members. Consistent procedural clarity remained lowest for working with foreign nationals, with one half to less than two-thirds of sexual assault responders stating they had clear program procedures for this population.

### **Catch a Serial Offender (CATCH) Program**

SVC/VLC/SVPs were more likely than SARCs and VA/UVAs to indicate they had at least one victim request to submit an entry to the CATCH program. When asked about their experience in answering questions about CATCH from victims, approximately two-thirds of sexual assault responders were able to answer victims' questions, based on their knowledge of CATCH and materials provided to them.

### **Effectiveness of Training**

Sexual assault responders were asked their opinions on how well their initial training prepared them to have structured conversations with victims of sexual assault, to help victims of sexual assault through the court martial process, and to serve men who experienced sexual assault. While the majority of all sexual assault responders reported feeling at least moderately prepared by their initial training to handle duties related to these domains, SARCs felt less prepared than VA/UVAs and SVC/VLC/SVPs after their initial training. Similarly, the majority of sexual assault responders reported that they had received training on dealing with retaliation against victims, with SVC/VLC/SVPs reporting statistically higher rates of receiving training on the topic and feeling more prepared than SARCs and VA/UVAs. The factors that most contributed to sexual assault responders feeling prepared to deal with victim retaliation were training and resources, while lack of experience was the primary factor in feeling unprepared.

### **Perceptions on D-SAACP**

Overall, the majority of SARCs and VA/UVAs felt that the D-SAACP training they received helped to enhance their skills in working with victims, an increase compared to 2018. The vast majority of SARCs and VA/UVAs indicated that their chain of command supports their continuing education requirements, with the majority using their Service SAPR/SHARP program to meet these requirements. SARCs and VA/UVAs were also asked about their plans for, and motivation to, pursue the next D-SAACP certification level. The majority of SARCs and VA/UVAs indicated they planned to pursue the next certification level. When asked how motivated they were to move to the next D-SAACP level, the vast majority of SARCs and VA/UVAs indicated they were motivated to do so.

### **Conclusion**

Overall, findings from the 2021 QSAR revealed that sexual assault responders are generally resilient, feel well-supported by local command, and have strong working relationships with other professionals. The majority expressed satisfaction with their training and certification, and reported clarity regarding SAPR procedures. Furthermore, most responders indicated they feel well prepared to serve both female and male victims and feel that both female and male victims get adequate support. Although most feedback was positive, the 2021 QSAR results did reveal some signs of increased strain on the sexual assault response workforce and some areas for improvement, including rising levels of burnout, vicarious trauma, and compassion fatigue, lack

of clarity in dealing with cases regarding foreign nationals, and a disconnect in communication between sending and receiving SARCs during expedited transfers.

## Chapter 1: Introduction and Methodology

### Study Background

The Department of Defense (DoD) continually seeks to improve upon sexual assault response programs and resources available to Service members. As a result of the recommendations from the DoD Care for Victims of Sexual Assault Task Force in 2004, the Secretary of Defense directed the Under Secretary of Defense for Personnel and Readiness (USD [P&R]) to undertake a review of all sexual assault policies and programs across the DoD and the individual Services, and to recommend changes (DoD, 2004). The Task Force recommendations led to the creation of several positions dedicated to providing services to sexual assault victims, including Sexual Assault Response Coordinators (SARCs), Victim Advocates (VAs), Uniformed Victim Advocates (UVAs), United States Air Force Volunteer Victim Advocates (USAF VVAs),<sup>1</sup> Special Victims' Counsel (SVCs), Victims' Legal Counsel (VLCs), and Special Victims' Paralegal (SVPs). The individuals in these positions are the key responders within the Sexual Assault Prevention and Response (SAPR) program. Below is a brief description of each position and their responsibilities, as defined in DoD Instruction (DoDI) 6495.02 (DoD 2015c).

**Sexual Assault Response Coordinator (SARC).** *The single point of contact at an installation or within a geographic area who oversees sexual assault awareness, prevention, and response training; coordinates medical treatment, including emergency care, for victims of sexual assault; and tracks the services provided to a victim of sexual assault from the initial report through final disposition and resolution.*

**Victim Advocate/Uniformed Victim Advocate (VA/UVA).**<sup>2</sup> *A person who, as a victim advocate, shall provide non-clinical crisis intervention, referral, and ongoing non-clinical support to adult sexual assault victims. Support will include providing information on available options and resources to victims. The VA/UVA, on behalf of the sexual assault victim, provides liaison assistance with other organizations and agencies on victim care matters and reports directly to the SARC when performing victim advocacy duties. People who are interested in serving as a VA/UVA are encouraged to volunteer for this duty assignment.*

**Special Victims' Counsel/Victims' Legal Counsel/Special Victims' Paralegal (SVC/VLC/SVP).** *Attorneys who are assigned to provide legal assistance in accordance with section 1716 of Reference (k) and Service regulations. The Air Force, Army, National Guard, and Coast Guard refer to these attorneys as SVC, who are often supported by SVP. The Navy and Marine Corps refer to these attorneys as VLC.*

The overall mission of these positions is, collectively, to provide guidance to and advocacy for victims of sexual assault in accessing the medical, psychological, and legal services to which they are entitled. They are the responders tasked with the responsibility of providing support and

<sup>1</sup> USAF VVAs perform the same duties as VAs and UVAs; therefore, any mentions of victim advocates will be referred to as VA/UVAs throughout the rest of this report.

<sup>2</sup> A SAPR VA may be civilian or military. A civilian in this position is referred to as a "victim advocate" (VA), whereas a military member in this position is referred to as a "uniformed victim advocate" (UVA).

guidance for sexual assault victims from initial response through the care and recovery processes.

The National Defense Authorization Act (NDAA) for Fiscal Year 2021 codified into law the need for an assessment and report on the ability of sexual assault response coordinators and sexual assault prevention and response victim advocates to perform their duties. Specifically, the Secretary of Defense was tasked with conducting a survey no later than June 30, 2021 to address this need with specific attention to several key elements, which included topics regarding:

the state of support provided to sexual assault responders,

the ability of sexual assault responders to contact and access their installation commander or unit commander,

the ability of sexual assault responders to contact and access the immediate commander of victims and alleged offenders,

the responsiveness of commanders to sexual assault responders,

the support and services provided to victims of sexual assault,

the understanding of other response and prevention professionals and their willingness to assist,

the adequacy of the training received by sexual assault responders, and

any other factors affecting the ability of sexual assault responders to perform their duties.

The *2021 QuickCompass of Sexual Assault Response Personnel (2021 QSAR)* was designed to survey SARCs and VAs/UVAs at military installations worldwide on these key elements, specifically, in order to meet this congressional mandate. Sexual assault responders are instrumental in the successful implementation of SAPR programs at each military location; therefore, it is critical that SAPRO and Service SAPR/SHARP officials understand how effectively Sexual assault responders are trained for their positions and their perceptions of how well their program is supported and executed. Additionally, the QSAR provides important information on the well-being and job satisfaction of sexual assault responders, including SVC/VLC/SVPs. While the 2021 NDAA did not specifically require the inclusion of SVC/VLC/SVPs, the *2021 QSAR* chose to continue to survey this population. The complete survey and accompanying frequently asked questions (FAQs) are included as Appendix B and Appendix C of this report, respectively.

The *2021 QSAR* is the fifth survey of this population following four previous iterations conducted from 2009 through 2018.<sup>3</sup> These surveys were performed at the request of the Defense Task Force on Sexual Assault in the Military Services (DTFSAMS). Given the

---

<sup>3</sup> Previous iterations include the *2018 QuickCompass of Sexual Assault Responders (2018 QSAR)*, the *2015 QuickCompass of Sexual Assault Prevention and Response-Related Responders (2015 QSAPR)*, the *2012 QuickCompass of Sexual Assault Response Coordinators (2012 QSARC)*, and the *2009 QuickCompass of Sexual Assault Responders (2009 QSAR)*.

similarities between the 2021 *QSAR* the 2018 *QSAR* surveys, the results of these surveys allowed for the trending of key metrics. However, due to major changes to the questions and substantial differences in the survey populations, the results of the 2021 *QSAR* and the 2018 *QSAR* are not directly comparable to the previous three surveys.

## Survey Methodology

The 2021 *QSAR* was administered via the web between June 8 and July 20, 2021. The survey sample comprised all DoD SARCs and VA/UVAs who were certified as of April 1, 2021, and all SVCs, VLCs, and SVPs serving at the time of the survey fielding. Potential SARC and VA/UVA participants were identified through the DoD Sexual Assault Advocate Certification Program (D-SAACP), a database of all certified SARCs and VA/UVAs; Service SAPR offices identified SVCs, VLCs, and SVPs, who do not hold D-SAACP certification.

The survey frame consisted of 1,973 certified SARCs and 21,201 VA/UVAs drawn from the D-SAACP list and 252 SVC/VLC/SVPs provided by Service SAPR offices. Surveys were completed by 4,370 eligible responders, yielding an overall weighted response rate of 19%.

Respondents were considered ineligible if they indicated in the survey or by other contact (e.g., telephone calls or e-mails to the research team) that they were not serving in the appropriate position as of the first day of the survey fielding—June 8, 2021. Survey completion was defined as answering 50% or more of the survey questions asked of all participants. Data were weighted using an industry-standard process to reflect the known population of D-SAACP certified personnel and SVC/VLC/SVPs as of April 2021. Weighting produces survey estimates of population totals, proportions, means, and other statistics that are representative of their respective populations.

Table 2 See Table 2 for a further description of the eligible respondent population. Statistical comparisons were made with two-tailed, independent sample *t* tests, with a significance threshold of  $p < 0.05$ .

**Table 2.**  
*Weighted Eligible Respondents by Job Role*

	Overall	SARC	VA/UVA	SVC/VLC/SVP
Army	2,358	598	1735	25
Navy	708	68	633	7
Marine Corps	372	53	308	11
Air Force	651	102	534	15
DoD Agency	80	42	38	0
Total	4,370	881	3,418	71

## Statistical Analysis

Results of the *2021 QSAR* are presented by several reporting categories within the report. Results are typically presented by sexual assault responder role: SARCs, VA/UVAs, and SVC/VLC/SVPs. In some cases, results are also broken down by Service and Status. It is important to note that the population of sexual assault responders is not equally split between SARCs and VA/UVAs. Specifically, while there are fewer than 2,000 SARCs in the population, there are over 20,000 VA/UVAs and fewer than 300 SVC/VLC/SVPs. Therefore, when estimates for sexual assault responders overall are presented in the report, these findings are heavily skewed by the estimates for VA/UVAs, an artifact that is not accounted for, nor adjustable by data weighting. Therefore, caution should be taken when interpreting overall findings; different expectations for different roles may prevent meaningful interpretation of combined survey statistics for some questions and may not provide the role nuance necessary for actionable findings.

Only statistically significant pairwise comparisons are discussed in this report. Pairwise comparisons comparing one entity to another entity are generally made along a single dimension: for example, SARCs compared to VA/UVAs and SARCs compared to SVC/VLC/SVPs. Where applicable, trends between the *2018 QSAR* and *2021 QSAR* are included in this report. Unless otherwise specified, the numbers presented are percentages and ranges of standard errors are provided.

Appendix A contains the full topline report for the *2021 QSAR* results, where each survey question is presented and includes the question text (or composite measuring description, if applicable), subitem text (if applicable), variable name, response options, reporting categories, unweighted n, estimates for each response option, and a table note (if applicable). Results are presented by all sexual assault responders, Service, duty status, and job role. To form the reporting categories, sexual assault responders were classified primarily by survey self-report data. If the self-reported data were missing, then D-SAACP data, if applicable, were used to impute the subgroup classification.

## Organization

The principal purpose of the *2021 QSAR* was to provide information to DoD SAPRO and the Service SAPR/SHARP offices about the effectiveness of programs from the perspective of primary sexual assault responders—the SARCs, VA/UVAs, and SVC/VLC/SVPs.

Topics covered in this report are organized into the following chapters:

**Chapter 2** describes the state of support provided to sexual assault responders. Topics include sexual assault responder well-being, workplace climate, and retaliation against sexual assault responders as a result of performance of their duties related to sexual assault.

**Chapter 3** discusses sexual assault responder access to commanders including concerns around command trust and support and access to commanders of victims of sexual assault and commanders of alleged perpetrators.

**Chapter 4** examines the perceived state of support services for victims of sexual assault. Topics include availability and usage of victim support resources, perceptions on the effectiveness of policy and procedures including the CATCH program, expedited transfers, case management groups, and high-risk response teams, and collaboration between sexual assault responders.

**Chapter 5** looks at opinions around the effectiveness of training to prepare sexual assault responders for their duties in assisting victims and perceptions around D-SAACP.

**Chapter 6** concludes this report with a discussion of major findings and recommendations for improvements that would benefit sexual assault responders and victims of sexual assault.

## Chapter 2: Well-Being, Workplace Climate, and Self-Care Support

This chapter addresses National Defense Authorization Act (NDAA) Fiscal Year 2021 (FY21) requirement A, which directed research on the state of support provided to responders, including perceived retaliation and resources available to responders as a result of the nature of their work, and elements of requirement H addressing other factors affecting responders' ability to perform their duties. This chapter covers the topic of responder well-being, workplace climate, and self-care support.

### Responder Well-Being

Requirement H of the NDAA for FY21 directed research on factors of well-being, including stressors experienced by sexual assault responders. Reported here is responders' well-being in terms of sources of job stress; experience(s) with burnout, compassion fatigue and vicarious trauma; and work satisfaction.

#### Job Stress

The 2021 QSAR included questions on six potential job stressors and three well-being indicators: burnout, compassion fatigue, and vicarious trauma. Burnout involves emotional depletion, along with mental and physical symptoms, caused by one's work life (Maslach & Schaufeli, 1993). Generalized job stress and burnout are related, but distinct, constructs. Though stress can be transitory, burnout is associated with prolonged job stress (Maslach & Schaufeli, 1993). Compassion fatigue is "the overall experience of emotional and physical fatigue...due to the chronic use of empathy" (Newell & MacNeil, 2010, p. 61) and vicarious trauma occurs specifically due to absorption of clients' traumatic experiences (Newell & MacNeil, 2010). Although any worker can experience burnout, compassion fatigue and vicarious trauma occur among "helping" professionals like sexual assault responders, and these psychological factors can increase the likelihood of burnout (Newell & MacNeil, 2010).

There were notable differences in stress between roles (see Table 3). Job stressors were generally highest for SVC/VLC/SVPs, and lowest for VA/UVA's. The most frequent source of stress for SVC/VLC/SVPs was their caseload, with around three-fifths reporting this to be a large source of stress. Stress levels were largely consistent with 2018 for both SVC/VLC/SVPs and SARCs, with the exception of SARCs' increased stress due to administrative requirements. Though job stress is lowest for VA/UVAs, they did indicate an increase in their levels of job stress since 2018.

**Table 3.**  
*Sources of Job Stress, Trends and Comparisons by Role*

Job Stress	SARCs		VA/UVAs		SVC/VLC/SVPs		↑ Higher than SARCs ↑ Higher than VAs/UVAs ↑ Higher than 2018
	2018	2021	2018	2021	2018	2021	
My caseload	17%	↑ 21%	4%	6%	49%	↑ 61%	
The subject matter of my work	21%	↑ 33%	10%	16%	45%	↑ 56%	
The administrative requirements of the position	34%	↑ 41%	9%	13%	31%	↑ 38%	
The amount of time I have been in my current position	18%	↑ 22%	8%	12%	28%	↑ 30%	
The increase in my workload	---	↑ 29%	---	6%	---	↑ 47%	
The increasing complexity of the program	---	↑ 39%	---	10%	---	↑ 31%	

Results by Service are shown in Table 4. Increases in stress since 2018 were concentrated among Army and Navy responders. Job stress was highest among responders in DoD Agencies. Levels of job stress were generally lowest in the Air Force.

**Table 4.**  
*Sources of Job Stress, by Service Branch*

Job Stress	Army		Navy		Marine Corps		Air Force		DoD Agency	
	2018	2021	2018	2021	2018	2021	2018	2021	2018	2021

Percent responding Large extent/Very large extent  
Standard error range is from ± 0.47% to ±2.37%

Q60

With regard to D-SAACP level, generally as D-SAACP level increased, they experienced higher levels of job stress (see Table 6). These individuals were also the most highly trained responders in the Department and it is therefore critical to support their wellbeing as they face a very stressful job.

**Table 6.**  
*Sources of Job Stress, by D-SAACP Level*

Job Stress	Level I	Level II	Level III	Level IV	
<b>My caseload</b>	8%	18% ↑	22% ↑	27% ↑	↑ Higher than Level I ↑ Higher than Level II

### Burnout, Compassion Fatigue, and Vicarious Trauma

Sexual assault responders indicated significantly higher rates of burnout, compassion fatigue, and vicarious trauma compared to 2018. Figure 1 breaks down these results by responder role. Burnout was significantly higher among SARCs and VA/UVAs than in 2018. Vicarious trauma was also higher among SARCs and VA/UVAs in 2021 compared to 2018. All three roles trended upward in compassion fatigue. SARCs and SVC/VLC/SVPs reported significantly higher burnout and vicarious trauma than VA/UVAs in 2021. All roles were significantly different from each other in terms of compassion fatigue, with SVC/VLC/SVPs having the highest levels and VA/UVAs the lowest.

**Figure 1.**  
*Burnout, Compassion Fatigue, and Vicarious Trauma; Trends and Comparisons by Role*

Table 7 shows trends between 2018 and 2021 and comparisons of 2021 results by Service. Responders in the Army, Navy, Marine Corps, and Air Force all reported higher levels of burnout, compassion fatigue, and vicarious trauma compared to 2018. Of note, DoD Agency responders reported significantly higher compassion fatigue and vicarious trauma than Service responders.

**Table 7.**  
*Burnout, Compassion Fatigue, and Vicarious Trauma, by Service Branch*

	Army		Navy		Marine Corps		Air Force		DoD Agency		↑ Higher than Army ↑ Higher than Navy ** Higher than all others ↑ Higher than 2018
	2018	2021	2018	2021	2018	2021	2018	2021	2018	2021	
<b>Burnout</b>	24%	39% ↑	30%	44% ↑	33%	45% ↑	26%	43% ↑	33%	46%	
<b>Compassion Fatigue</b>	13%	21% ↑	14%	23% ↑	17%	25% ↑	15%	26% ↑	33%	39% **	
<b>Vicarious Trauma</b>	6%	12% ↑	5%	11% ↑	5%	11% ↑	6%	15% ↑	24%	33% **	

Percent responding Yes  
Standard error range between ± 0.50% and ± 6.15%

Q60

Burnout, compassion fatigue, and vicarious trauma increased for all duty types from 2018 to 2021 (Table 8). Comparing by duty type, sole duty responders reported higher rates of compassion fatigue and vicarious trauma than primary and collateral duty responders, followed by primary duty responders who had higher rates than collateral duty responders. Despite differences in job stressors, there were no differences in burnout by role type, with more than a third of responders reporting burnout across all types.

**Table 8.**  
*Burnout, Compassion Fatigue, and Vicarious Trauma, by Duty Type*

	Sole		Primary		Collateral		↑ Higher than Primary ↑ Higher than Collateral ↑ Higher than 2018
	2018	2021	2018	2021	2018	2021	
<b>Burnout</b>	33%	45% ↑	27%	41% ↑	27%	41% ↑	
<b>Compassion fatigue</b>	29%	↑↑ 37% ↑	20%	↑ 28% ↑	12%	21% ↑	
<b>Vicarious trauma</b>	20%	↑↑ 29% ↑	10%	↑ 17% ↑	4%	10% ↑	

Percent responding Yes  
Standard error range is between ± 0.35% and ± 2.7%

Q63

### Work Satisfaction

The 2021 QSAR incorporated a six-item work satisfaction scale which measures happiness with one’s job and is associated with several outcomes, including burnout, well-being, and job performance (Wright & Cropanzano, 2000). Each item was answered on a scale from 1 (strongly disagree) to 5 (strongly agree), and scale means are reported here.

As shown in Figure 2, SARC and VA/UVAs had significantly higher work satisfaction than SVC/VLC/SVPs. With regard to differences in work satisfaction by Service, Air Force responders had the highest work satisfaction score, while Marine Corps responders had the lowest work satisfaction score (Figure 3).

**Figure 2.**  
*Work Satisfaction Scale Means, by Role*

**Figure 3.**  
*Work Satisfaction Scale Means, By Service*

### Workgroup Effectiveness

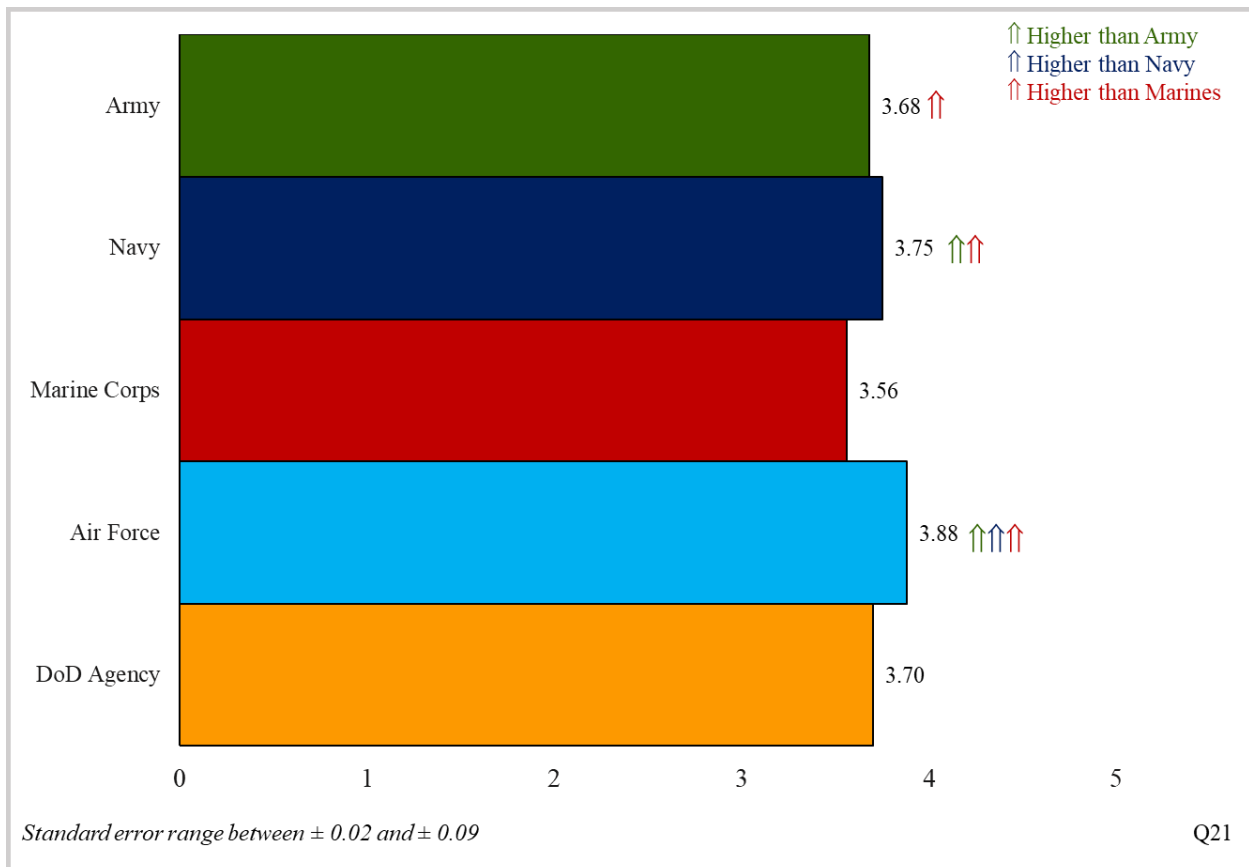

The *workgroup* is the “smallest formal grouping of personnel within an organization” (Fry & Slocum, 1984, p. 222). Workgroup effectiveness not only involves a human element, but also factors such as technology and team structure (Fry & Slocum, 1984). The 2021 *QSAR* incorporated a four-item workgroup effectiveness scale. Each item was answered on a scale from 1 (strongly disagree) to 5 (strongly agree), and scale means are reported.

As shown in Figure 4, SVC/VLC/SVPs showed higher levels of workgroup effectiveness than both SARC and VA/UVAs. Differences in workgroup effectiveness between Services were clear: Air Force responders showed the highest levels of workgroup effectiveness, while Marine Corps responders had the lowest (Figure 5).

**Figure 4.**  
**Workgroup Effectiveness Scale Means, by Role**

**Figure 5.**  
**Workgroup Effectiveness Scale Means, by Service**

## Retaliation

Requirement A of the NDAA FY21 directed research on frequency with which sexual assault responders experience retaliatory behaviors. The 2021 Q<sub>SAR</sub> asked about responders’ personal experience of retaliatory behaviors (e.g., from commanders or peers) due to their job duties and the culture around retaliation at their workplace.

Table 9 shows retaliation findings by role in 2021. SARCs were most likely to have experienced retaliation personally, at a significantly higher rate than VA/UVAs. SARCs and SVC/VLC/SVPs were more likely than VA/UVAs to have known of retaliation occurring. While rates of experiencing retaliation or witnessing/knowing of retaliation occurring are relatively low, approximately one-half or more of responders would feel comfortable seeking help with retaliation.

In 2006, the DoD initiated monthly Case Managements Groups (CMGs) to discuss unrestricted SAPR cases. These CMGs have three purposes: ensure victims and those that report retaliation are safe, improve access to services for victims and for those reporting retaliation, and provide a framework for coordination and accountability across multiple services (DoDI 6495.02, 2021). They are multi-disciplinary groups consisting of professionals who are involved and working on a specific case. Included in the responsibilities of a CMG is active monitoring for retaliatory incidents involving reprisal, ostracism, or maltreatment. Almost three-quarters of SARCs and VA/UVAs indicated the CMG chair covered retaliation of sexual assault responders, while only one-third of SVC/VLC/SVPs indicated retaliation was covered in the CMG (see Table 9).

**Table 9.**  
**Retaliation Items, by Role**

Retaliation Items	SARCs		VA/UVAs		SVC/VLC/SVPs	
	2018	2021	2018	2021	2018	2021
<b>Experienced retaliation*</b>	10%	↑ 12%	6%	5%	NR	NR
<b>Witnessed/Knew of retaliation**</b>	---	↑ 23%	---	17%	---	↑ 34%
<b>Comfortable seeking help with retaliation**</b>	---	↑ 56%	---	49%	---	48%
<b>CMG/CIT Chair covers retaliation of SARCs and/or VA/UVAs*</b>	72%	↑ 70%	79%	↑ 72%↓	47%	34%

\* Percent responding Yes  
 \*\* Percent responding Agree/Strongly agree  
 NR = Not Reportable  
 Standard error range between ± 0.41% and ± 8.31%

↑ Higher than VA/UVAs  
 ↑ Higher than SVC/VLC/SVPs  
 ↓ Lower than 2018

Q58, Q56, Q101

Table 10 shows trends to 2018 and comparisons of retaliation by Service. In 2021, few Service responders indicated experiencing retaliation, however, Army responders were more likely than Marine Corps and Air Force responders to indicate experiencing retaliation as a part of their duties. DoD Agency and Army responders were more likely than the other Services to have witnessed or knew of retaliation. Despite low rates of experiencing or witnessing retaliation, over two-fifths to just over half of Service responders were comfortable seeking help with retaliation and the majority of responders indicated the CMG covered retaliation of sexual

assault responders, although some significant decreases were found among Marine Corps and Air Force responders compared to 2018.

**Table 10.**  
**Retaliation Items, by Service Branch**

Retaliation Items	Army		Navy		Marine Corps		Air Force		DoD Agency	
	2018	2021	2018	2021	2018	2021	2018	2021	2018	2021
Witnessed/Knew of retaliation**	---	↑ 19%	---	18%	---	14%	---	16%	---	↑ 26%
Comfortable seeking help with retaliation**	---	↑ 52%	---	48%	---	43%	---	49%	---	↑ 57%
CMG/CIT Chair covers retaliation of SARC and/or VA/UVAs*	76%	↑ 73%	81%	↑ 78%	79%	65% ↓	70%	60% ↓	72%	72%

↑ Higher than Marine Corps  
↓ Higher than Air Force

## Self-Care Support

Requirement A of the NDAA for FY21 directed research on the state of support provided to sexual assault responders. Sexual assault responder support as it relates to self-care is discussed here, including time available for self-care; availability and use of self-care resources; and responder resilience. The practice of self-care, including use of behavioral health services, can attenuate experiences of burnout, compassion fatigue, and vicarious trauma; further, organizations can foster sufficient self-care among its members by acknowledging psychological experiences and providing resources for self-care (Newell & MacNeil, 2010).

### Time for Self-Care

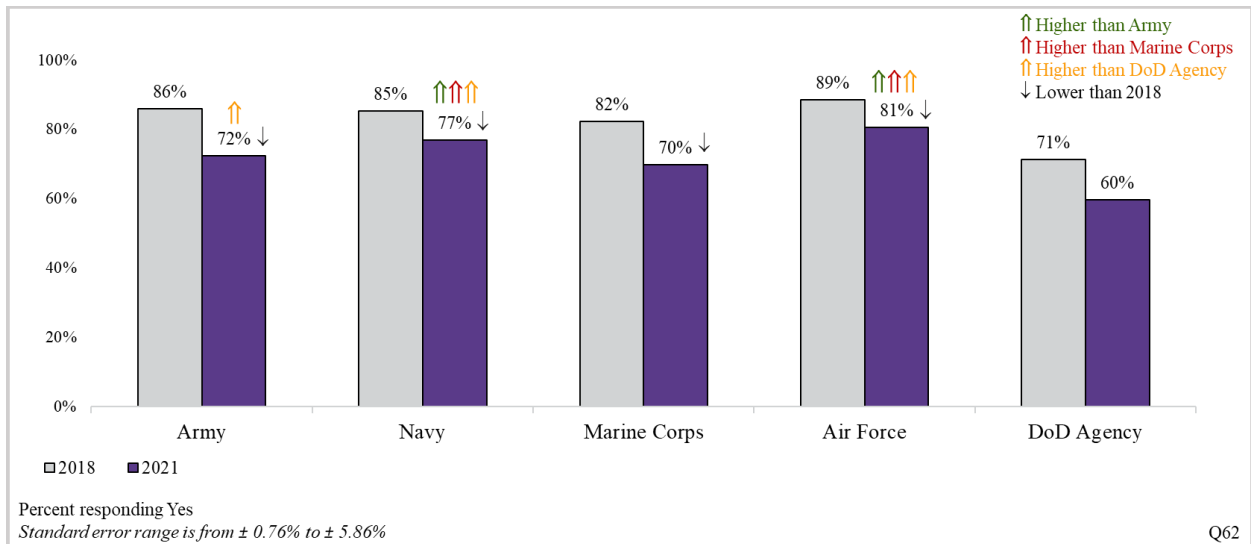

The majority of sexual assault responders reported having adequate time for self-care in both 2021 and 2018, although there were downward trends in 2021 (Figure 6). SARC and VA/UVAs reported adequate time for self-care at significantly lower rates than in 2018, although VA/UVAs reported having more time for self-care than SARC and SVC/VLC/SVPs.

**Figure 6.**  
*Self-Care Time, by Role*

Army, Navy, Marine Corps, and Air Force responders all reported significantly less time for self-care than in 2018 (Figure 7). Air Force and Navy responders indicated having the most time for self-care, followed by Army and Marine Corps responders, all of which reported having significantly more time than responders from DoD Agencies.

**Figure 7.**  
*Self-Care Time, by Service*

Sole duty responders reported significantly lower time for self-care than both primary and collateral duty responders. Although they trended downward from 2018, Level I D-SAACP holders reported adequate time for self-care at a significantly higher rate than each of Levels II-

IV. As D-SAACP Level increased, time for self-care decreased, particularly once beyond Level I, which most responders held.

## Self-Care Resources

Responders were asked about which self-care measures they take to manage the stress of their job. While some items were included on the 2018 survey, with the addition of new subitems, this question is not able to be trended. Most responders indicated they use exercise to manage their stress, with VA/UVAs indicating higher levels than SARCAs, and SVC/VLC/SVPs indicating higher levels than both SARCAs and VA/UVAs (see Table 11). SVC/VLC/SVPs were more likely than other responders to indicate spending time interacting with family and friends to relieve stress. Other differences are noted in the table below.

**Table 11.**  
*Self-Care Measures to Manage Stress, by Role*

Self-Care Measures to Manage Stress	SARCAs	VA/UVAs	SVC/VLC/SVPs
Exercise	67%	↑ 72%	↑↑ 84%
Hobbies (e.g., reading, cooking, watching television)	64%	68%	75%
Interacting with family/friends	58%	57%	↑↑ 81%
Time off from work	57%	57%	67%
Traveling	38%	↑ 42%	49%
Meditation	21%	↑ 28%	19%
Religious outlets	27%	24%	27%
Pursuing education	22%	↑ 26%	NR
Behavioral health provider at military treatment facility	↑ 13%	10%	7%
Behavioral health provider at civilian treatment facility	8%	7%	3%
Group counseling	1%	↑ 2%	NR
I do not use self-care measures	↑↑ 6%	3%	NR

Percent responding Yes  
 NR = Not reportable  
 Standard error range is from ± 0.29% to ± 6.78%

↑ Higher than SARCAs  
 ↑ Higher than VA/UVAs  
 ↑ Higher than SVC/VLC/SVPs

Q61

## Resilience

Resilience is defined as the ability to “return to the previous level of functioning” after a negative experience (Smith, et al., 2008, p. 194). Emotional resilience is especially important for helping professionals like sexual assault responders, and this ability can be fostered to improve well-being (Grant & Kinman, 2014). The 2021 QSAR introduced a 5-point resilience scale (Smith, et al., 2008); mean scores are included in this report, with a higher score indicating more resilience. Overall, as shown in Figure 8, sexual assault responders displayed high levels of resilience, with SVC/VLC/SVPs having significantly higher scores than VA/UVAs but not significantly different from SARCAs.

**Figure 8.**  
*Resilience Mean Scores, by Role*

## Chapter 3: Commander Relationships

This section explores the relationships between sexual assault responders and their commanders. Recognizing the importance of commanders in addressing sexual assault, National Defense Authorization Act (NDAA) for Fiscal Year 2021 elements B, C, and D directed questions on commanders’ accessibility and responsiveness to sexual assault responders. Specifically, this chapter examines the degree to which sexual assault responders’ report they interact with, and feel supported by, commanders. This information provides insight into the environment in which sexual assault responders operate and can highlight leadership attitudes towards sexual assault. Commander attitudes and behaviors are important as they could contribute to secondary victimization (i.e., negative reactions, such as disbelief or victim blaming) and the development of post-traumatic stress disorder in victims of sexual assault (Campbell & Raja, 2005; Ullman et al., 2007; Ullman & Peter-Hagene, 2014).

### Commander Access, Support, & Preparedness

In general, SARCs indicated they feel more supported by commanders than other sexual assault responders and VA/UVAs experienced some declines in their responses compared to 2018 (see Table 12). In 2021, 90% of SARCs indicated their commander recognizes them as a subject matter expert for issues related to sexual assault, which was higher than VA/UVAs. SARCs also indicated having more direct and unimpeded access to commanders than VA/UVAs, and believed commanders perceive their role as important at higher rates than VA/UVAs. Similarly, SARCs indicated their commanders support them fully at higher rates than both VA/UVAs and SVC/VLC/SVPs.

One area where there was more contrast in responses from sexual assault responders was with regard to whether they provide updates to senior commanders at least monthly, where 84% of SARCs indicated doing so, compared to 55% of SVC/VLC/SVPs and 36% of VA/UVAs

**Table 12.**  
*Commander Access, Support, and Preparedness, by Role*

Commander Access, Support, and Preparedness	SARCs		VA/UVAs		SVC/VLC/SVPs		↑ Higher than VA/UVAs ↑ Higher than SVC/VLC/SVPs ↑ Higher than 2018 ↓ Lower than 2018
	2018	2021	2018	2021	2018	2021	
I am recognized by local commanders as a subject matter expert for issues related to sexual assault	88%	↑ 90%	64%	68%	---	---	
Local commanders support me fully	83%	↑ 84%	81%	↑ 74%	56%	56%	
Local commanders perceive my role as important	81%	↑ 84%	83%	↑ 77%	58%	58%	
I provide updates to senior commanders at least monthly	---	---	83%	↑ 84%	41%	41%	
Local commanders feel comfortable speaking about program-related issues in general	---	---	74%	↑ 79%	71%	71%	
Local commanders feel comfortable speaking to victims on program-related issues	---	---	---	---	67%	↑ 62%	
I am recognized by local commanders as a subject matter expert for legal issues related to sexual assault	---	---	---	---	60%	↑ 47%	

## Communication with Victim’s and Perpetrator’s Commander(s)

Sexual assault responders were asked about their level of contact with the commanders of victims and alleged perpetrators. Figure 9 summarizes rates of contact with victim and alleged perpetrator commander(s) by role. As 2021 was the first-time questions about contact with the victim’s and alleged perpetrator’s commanders were included in the *QSAR*, trend data is not available for these questions.

SARCs were more likely than VA/UVAs and SVC/VLC/SVPs (who were also more likely than VA/UVAs) to indicate they communicate often with commanders of victims, while SARCs and SVC/VLC/SVPs were more likely than VA/UVAs to indicate they communicate often with commanders of alleged perpetrators.

**Figure 9.**  
*Communication with Commanders of Victims/Alleged Perpetrators, by Role*

## Chapter 4: Support Services for Victims of Sexual Assault

The FY2021 NDAA required an assessment of support and services that victims of sexual violence receive. In that regard, the 2021 QSAR assessed the capability of prevention and response programs to support victims by asking responders about 1) victim care, 2) collaboration among supporting agencies, and 3) the programs, policies, and procedures in place that shape how care is provided to victims of sexual assault.

### Victim Care

Victim care is defined here as the resources made available to programs to assist victims, referrals to resources made to victims, the appropriate care and responses to both female and male victims, and the expedited transfer process.

### Program Resources

Sexual assault responders were asked to what extent their program is provided with different types of resources for victims.<sup>4</sup> Table 13 provides a complete breakdown of resource availability by role. While there were no significant trends from 2018 to 2021, there was variation in the percentages that endorsed each item by role. VA/UVAs endorsed providing clothing, transportation, and administration support at significantly higher rates than SARCAs. However, significantly more SARCAs reported having government communication devices, computers, and the ability to meet virtually with victims compared to VA/UVAs

**Table 13.**  
*Resources Provided to Program, by Role*

Resources Provided to Programs	SARCAs		VA/UVAs		↑ Higher than SARCAs ↑ Higher than VAs/UVAs
	2018	2021	2018	2021	
Reach-back support (i.e., get help/advice dealing with a case)	75%	74%	77%	77%	
Safe space to meet with victims	74%	71%	73%	75%	
Private space to meet with victims	71%	71%	72%	74%	
Administrative support	62%	62%	71%	↑72%	
Communication devices (e.g., government-provided mobile phone)	70%	↑70%	64%	63%	
Computer	76%	↑75%	61%	62%	
Ability to meet with victims virtually*	---	↑64%	---	59%	
Transportation for victims	42%	43%	50%	↑53%	
Clothing for victims	34%	30%	47%	↑45%	

Percent responding Very large extent/Large extent  
 Standard error range is from ± 0.77% to ± 2.03%  
 Note. Item only asked of SARCAs and VA/UVAs  
 \* New Item in 2021, trends are not available

Q32

<sup>4</sup> The question regarding availability of resources was asked only of SARCAs and VA/UVAs.

## Referral Resources

Sexual assault responders were asked if they had referred victims to various resources in the last year. As shown in Table 14, the top resources referred across sexual assault responders were to a military mental health clinic, military medical health agencies, on-base Family Advocacy Programs (FAP), Military Equal Opportunity Programs, and the Safe Helpline (SHL). In addition, SARCs and SVC/VLC/SVPs were more likely than VA/UVAs to refer resources to victims. Comparing referrals in 2018 to 2021, almost all resources trended downward, particularly for SARCs and VA/UVAs. Referrals to SAPR Source was the only resource to see a trend upward for both SARCs and SVC/VLC/SVPs.

**Table 14.**  
*Referral to Resources, by Role*

Referral Resource	SARCs		VA/UVAs		SVC/VLC/SVPs	
	2018	2021	2018	2021	2018	2021
Military mental health clinic	73%	↑ 62% ↓	56%	32% ↓	82%	↑↑ 85%
Military medical health agencies	69%	↑ 54% ↓	47%	25% ↓	75%	↑ 66%
On-base Family Advocacy Program (FAP)	51%	↑ 45% ↓	31%	17% ↓	59%	↑↑ 71%
Military Equal Opportunity Program	59%	↑↑ 51% ↓	36%	21% ↓	33%	22%
Safe Helpline (SHL)	56%	↑↑ 51%	45%	↑ 29% ↓	29%	18%

Q32

## Quality of Care and Resources for Female and Male Victims of Sexual Assault

Sexual assault responders were asked about various aspects of victim care for female and male victims separately, such as appropriate care from health care providers and resources to support victims. Overall, the vast majority sexual assault responders felt they have the quality of care and resources available to support both male and female victims of sexual assault (Figure 10). While responses remained high, sexual assault responders indicated a decrease in quality of care and resources available for female victims on several aspects, including appropriate health care, sufficient policy guidance, and the program meeting specific needs of female victims. Sexual

assault responders also indicated a decrease in appropriate response from SVC/VLCs and Military Investigators (for both female and male victims).

**Figure 10.**  
*Aspects of Support for Female and Male Victims*

## Expedited Transfers

Victims who file unrestricted reports also have the option to request an expedited transfer, which reassigns, either temporarily or permanently, the victim away from their current unit or installation to a new unit or installation. Expedited transfers are intended to be used when the victim is uncomfortable, such as when there are accusations of retaliation, but is physically safe. Given the privacy concerns in these situations, victim consent is needed for the sending SARC to share any case documentation with the receiving SARC. Additionally, DoD policy limits the information provided to the receiving SARC. The receiving commander is only notified in four instances: active criminal case, active legal proceeding, continuing victim health care related to the assault, or participation in the CMG for victim care. Sexual assault responders were asked if they had been involved in an expedited transfer in the past 12 months, and if so, SARCs were asked follow-up questions regarding communication between sending and receiving SARCs in such transfers.

Almost one half of SARCs indicated they were involved in an expedited transfer in the past 12 months (Figure 11). In 2021, almost one fifth of VA/UVAs indicated they were involved in an expedited transfer, which increased slightly compared to 2018. However, the remaining questions about expedited transfers were only asked of SARCs.

Of the 45% of SARCs who were involved in an expedited transfer in the past 12 months, 47% were both a sending and receiving SARC, 37% were a sending SARC only and 16% were a receiving SARC only. When asked whether they believe the receiving SARC should always be notified of a victim transfer, 49% indicated yes, even if the victim does not consent, which increased compared to 2018. Conversely, 48% of SARCs indicated yes, but only if the victim consents, which decreased compared to 2018.

SARCs were then asked about communications they had as a receiving and/or sending SARC during the expedited transfer process. Trends for receiving SARCs were significantly higher in 2021 than 2018 for those indicating they provided a warm handoff, provided updates on investigation information, and received notification from command about the transfer in all cases. Further, 91% of sending SARCs reported providing a warm handoff compared to 82% in 2018. Still, as in 2018, there were major disparities between receiving and sending SARCs in all three areas of expedited transfer communications, with sending SARCs indicating higher proportions of providing information in all cases.

**Figure 11.**  
*SARC Involvement in an Expedited Transfer in the Past 12 Months*

## Collaboration

Sexual assault responders were asked about various collaborative aspects of their programs, including involvement in Case Management Groups and High-Risk Response Teams, collaboration with other professionals in the SAPR space, and collaboration with resources in the community.

### Case Management Groups (CMGs)

As discussed in Chapter 2, Case Management Groups (CMGs) are monthly, interdisciplinary meetings to facilitate victim care across multiple parties. Responders were asked whether they were involved in a CMG in the past 12 months; if they indicated involvement, additional questions were asked about the nature of the CMG (e.g., duration, who chairs the CMG) and the effectiveness of the CMG.

#### CMG Involvement

In general, sexual assault responders indicated CMG involvement at similar rates as they did in 2018. SVC/VLC/SVPs were more involved than SARCAs, and both were more involved than VA/UVAs. Army sexual assault responders were the only Service to have significantly higher involvement in CMGs in 2021 compared to 2018. Some Service differences were noted, with DoD Agency sexual assault responders being most involved in CMGs followed by Air Force and Marine Corps sexual assault responders, who were involved at higher rates than both Army and Navy sexual assault responders (see Table 15).

**Table 15.**  
*Case Management Group Involvement, by Role and Service*

Case Management Group Involvement	2018	2021	
SARCAs	50%	↑ 54%	↑ Higher than SARCAs ↑ Higher than VAs/UVAs ↑ Higher than Army
VA/UVAs	16%	16%	↑ Higher than Navy

Navy	17%	18%	
Marine Corps	33%	↑↑ 33%	
Air Force	37%	↑↑ 34%	
DoD Agency	74%	** 64%	

Percent responding Yes  
Standard error range between ± <0.01% and ± 6.10%

Q95

### Case Management Group (CMG) Characteristics

Sexual assault responders were also asked various aspects of how CMGs were run, including questions on who chaired the meetings, the method in which they were conducted, and how long they lasted. As shown in Table 16, over half of sexual assault responders indicated the Installation Commander chaired the CMG, with SARC's indicating a significant increase compared to 2018. With the increase in SARC's indicating the Installation Commander chaired the CMG, there were comparable declines in the Deputy Installation Commander as chairing the CMG in 2021. Looking at the Services, even though the Navy saw a decline in the Installation Commander chairing the CMG compared to 2018, they had the highest rates of Installation Commander chairing the CMG compared to all other Services, with Air Force sexual assault responders having the lowest rates. In contrast, Air Force responders indicated having the highest rates of the Deputy Installation Commander chairing the CMG compared to the other Services.

**Table 16.**  
*Case Management Group Chairperson, by Role and Service*

Role	2018	2021	2018	2021	Comparison

Q97

Sexual assault responders were asked whether CMG meetings had been conducted in person, virtually, via e-mail, or some other method. Use of virtual meetings trended significantly higher across sexual assault responders and Services, while in-person trended significantly lower. SARC's and SVC/VLC/SVPs were more likely than VA/UVAs to indicate the CMG was conducted in-person, although in-person was still endorsed higher than virtually for VA/UVAs. There were several significant differences among the Services regarding in-person and virtual meeting environments. Most clearly, Air Force sexual assault responders utilized a virtual environment at a significantly lower rate than all other Services, despite increasing compared to 2018 (see Table 17). This is consistent with the nature of working conditions during the Coronavirus pandemic, where many were afforded the opportunity to work remotely.

**Table 17.**  
**Case Management Group Meeting Method, by Role and Service**

Case Management Group Meeting Method	In-Person		Virtually		Via E-Mail		Other		↑ Higher than VAs/UVAs ↑ Higher than Army ↑ Higher than Navy ↑ Higher than Marine Corps ↑ Higher than Air Force ↑ Higher than 2018 ↓ Lower than 2018

Percent responding Yes  
Standard error range between ± 0.53% and ± 7.65%  
NR = Not reportable

Q99

Sexual assault responders were asked to approximate how long CMG meetings tend to last on average. In 2021, the majority of CMG's lasted under 2 hours, with SARCs more likely than their counterparts to indicate they lasted one to two hours. In contrast to SARCs and VA/UVAs, SVC/VLC/SVPs were more likely to indicate the CMG's lasted between two and four hours. Similarly, Services also indicated that CMG's tend to last under two hours, with Army being more likely than the other Services to indicate they last one to two hours, in contrast to all other Services who were more likely to indicate they lasted less than one hour (see Table 18).

**Table 18.**  
**Case Management Group Meeting Length, by Role and Service**

Case Management Group Meeting Length	< 1 Hour		1 to 2 Hours		2 to 4 Hours		> 4 Hours		↑ Higher than SARCs ↑ Higher than VAs/UVAs ↑ Higher than SVC/VLC/SVPs ↑ Higher than Army ↑ Higher than Navy ↑ Higher than Marine Corps ↑ Higher than Air Force ** Higher than all others ↓ Lower than 2018

Q100

### CMG Effectiveness

Sexual assault responders were also asked about the effectiveness of CMGs in addressing issues related to victims of sexual assault, including retaliation, legal processes, information sharing, victim medical and mental health concerns, and expedited transfers. In general, sexual assault responders perceived the CMG as effective in addressing each of these issues. SARCs felt CMGs were effective in addressing expedited transfers at a significantly higher rate than in 2018, while VA/UVAs indicated lower effectiveness in addressing legal issues.

Moreover, there were significant differences between roles in their assessment of CMG effectiveness addressing issues of retaliation, legal processes, victim medical concerns, and victim mental health (see Table 19). For those aspects, SVC/VLC/SVPs indicated effectiveness at significantly lower levels compared to SARCs and VA/UVAs.

**Table 19.**  
*CMG Effectiveness in Addressing Issues, by Role*

CMG Issue	SARCs		VA/UVAs		SVC/VLC/SVPs		↑ Higher than SARCs ↑ Higher than SVC/VLCs/SVPs ↑ Higher than 2018 ↓ Lower than 2018
	2018	2021	2018	2021	2018	2021	
Retaliation	68%	↑ 70%	78%	↑↑ 77%	48%	51%	
Legal (e.g., investigative adjudication)	79%	↑ 81%	87%	↑ 80% ↓	51%	61%	
Information sharing	87%	87%	89%	86%	66%	83%	
Victim medical concerns	69%	↑ 73%	81%	↑ 78%	44%	44%	
Victim mental health concerns	72%	↑ 75%	84%	↑ 80%	45%	39%	

When looking at whether the CMG was effective at addressing issues, the majority of Services indicated they were effective. The lowest rates of effectiveness were seen among sexual assault responders in the Marine Corps, with almost all other Services rating the effectiveness higher across most issues (Table 20).

**Table 20.**  
*CMG Effectiveness in Addressing Issues, by Service*

CMG Issue	Army		Navy		Marine Corps		Air Force		DoD Agency		↑ Higher than Army ↑ Higher than Navy ↑ Higher than Marine Corps ↑ Higher than Air Force ↑ Higher than DoD Agency
	2018	2021	2018	2021	2018	2021	2018	2021	2018	2021	
Legal (e.g., investigative adjudication)	81%	↑ 82%	88%	79% ↓	78%	70%	85%	↑ 84%			
Information sharing	85%	↑ 85%	93%	↑ 89%	81%	79%	87%	↑↑ 91%			
Victim medical concerns	76%	↑ 77%	80%	↑ 73%	70%	60%	78%	↑↑ 83%			
Victim mental health concerns	76%	↑ 77%	85%	↑ 78%	74%	61% ↓	79%	↑↑ 85%			
Expedited transfers	78%	↑ 86% ↑	84%	↑ 83%	74%	66%	84%	↑ 84%			

Finally, sexual assault responders were asked if the CMG Chair asked about reports of retaliation against victims. Overall, the majority of sexual assault responders indicated that CMG Chairs asked about victim retaliation (Table 21). Roles did not differ significantly in their rating of victim retaliation inquiry, but the Army and Navy each endorsed at a significantly higher rate than Air Force.

**Table 21.**  
*CMG Covered Victim Retaliation, by Role and Service*

<b>Marine Corps</b>	88%	81%	
<b>Air Force</b>	82%	77%	
<b>DoD Agency</b>	87%	80%	

Percent responding Yes  
Standard error range between  $\pm 1.4\%$  and  $\pm 7.09\%$

Q101

### High-Risk Response Team (HRRT)

If a sexual assault victim is deemed to be in a high-risk situation (e.g., alleged offender has a history of stalking the victim, made threats against the victim, history of violence against the victim), then the CMG Chair initiates a High-Risk Response Team (HRRT). The HRRT is a multidisciplinary team charged with assessing the victim's safety and adopting safety plans to meet the victim's needs throughout the evolving situation (DoDI 6495.02, 2021). SARCs and VA/UVAs were asked about their involvement in HRRTs, and, if involved, their insight about the effectiveness of the HRRT and the timeframe that a HRRT remains in place. As shown in Figure 12, only 3% of sexual assault responders, made up of 9% of SARCs and 2% of VA/UVAs, reported being involved in a HRRT in the past 12 months, of which, 41% indicated the HRRT lasted one to seven days, 37% lasted eight to thirty days, and 22% lasted for more than thirty days. Despite this variety in length, the majority of sexual assault responders indicated the HRRT appropriately addressed the high-risk situations.

**Figure 12.**  
**High-Risk Response Teams**

### Victim Care Support from Personnel

Sexual assault responders were asked to what extent they received appropriate support from other personnel in their efforts to assist victims: SVC/VLC/SVPs, VA/UVAs, SARCs, Military criminal investigators, Family Advocacy Program, Equal Employment Opportunity, victim witness liaisons, medical professionals, mental health professionals, and chaplains.

Overall, sexual assault responders reported receiving appropriate support from other professionals regarding victim care. Compared to 2018, trends were largely stable, with the only significant decreases reported by SARCs regarding the support they received from Victim Witness Liaisons and medical professionals (see Table 22).

**Table 22.**  
*Victim Care Support from Personnel, by Role*

Victim Care Support from Personnel	SARCs		VA/UVAs		SVC/VLC/SVPs		↑ Higher than SARCs ↑ Higher than VAs/UVAs ↑ Higher than SVC/VLCs/SVPs ↓ Lower than 2018
	2018	2021	2018	2021	2018	2021	
SVC/VLC	73%	↑ 71%	64%	64%	NA	NA	
VA	80%	79%	NA	NA	73%	76%	
Medical professionals	56%	55%	37%	45%			
Family Advocacy Program (FAP)	54%	↑ 56%	14%	17%			
Equal Employment Opportunity (EEO) Office	46%	46%	45%	39%			
Victim Witness Liaison	69%	62% ↓	64%	62%	39%	49%	
Medical professionals	72%	↑ 70%	62%	↑ 61%	47%	55%	
Mental health professionals	78%	↑ 74%	69%	↑ 68%	48%	55%	
Chaplain/Chaplain staff							

There were many differences among Services in ratings of support from each type of personnel. In general, Air Force sexual assault responders perceived all the professionals as more supportive compared to the other Services, and showed increases in support from many personnel compared to 2018. However, DoD Agency counterparts endorsed the lowest perceptions of support compared to the Services (see Table 23).

**Table 23.**  
*Victim Care Support from Personnel, by Service Branch*

Victim Care Support from Personnel	Army		Navy		Marine Corps		Air Force		DoD Agency		↑ Higher than Army ↑ Higher than Navy ↑ Higher than Marine Corps ↑ Higher than Air Force ↑ Higher than DoD Agency

Chaplain/Chaplain staff											

### Community Collaboration

Sexual assault responders were asked how often they collaborated with different resources in the community to support victims. Less than one-quarter of sexual assault responders indicated they collaborated with community resources in 2021, with the Military Equal Opportunity Programs being the most collaborated with. Collaboration trended down for coordination with local rape crisis centers and on-base alcohol and drug abuse prevention programs in 2021 compared to 2018. Sexual assault responders reported an increase in collaboration with Veterans Affairs Military Sexual Trauma (VA MST) Coordinators in 2021 compared to 2018. It should be noted

though, as in 2018, sexual assault responders still reported the least amount of collaboration with VA MST Coordinators (Table 24).

**Table 24.**  
*Collaboration with Community Resources*

Community Resource	2018	2021	
Local rape crisis center	11%	10% ↓	↑ Higher than 2018 ↓ Lower than 2018
Local civilian police	9%	8%

On-base alcohol and drug abuse prevention programs	14%	12% ↓	
Military Equal Opportunity Program	22%	24%	
On-base Family Advocacy Program	16%	17%	
On-base police	17%	16%	
Veterans Affairs Military Sexual Trauma Coordinator	7%	9% ↑	

Percent responding Often/Very often  
Standard error range between ± 0.40% and ± 0.70%

Q31

The most frequently referred community resources across the Services were resources found on-base: the Military Equal Opportunity Program, SAPR Connect, on-base Family Advocacy Program, and on-base police. There were many differences between the Service branches and DoD Agency sexual assault responders in terms of collaboration with community resources (Table 25). In general DoD Agency sexual assault responders were more likely to use off-base resources than the other Services. Air Force sexual assault responders reported collaborating with local rape crisis centers at a significantly higher rate than the other three Services, and the Army reported a higher rate than both the Navy and Marine Corps.

**Table 25.**  
*Collaboration with Community Resources, by Service Branch*

Community Resource	Army	Navy	Marine Corps	Air Force	DoD Agency	
Local rape crisis center	↑↑11%	7%	4%	↑↑↑15%	**36%	↑ Higher than Army ↑ Higher than Navy ↑ Higher than Marine Corps ↑ Higher than Air Force ↑ Higher than DoD Agency ↑ Higher than all others
Local civilian police	↑↑11%	5%	5%	↑↑0%	**25%	
Local domestic violence services	↑↑0%	5%	0%	↑0%	↑1%

Veterans Affairs Military Sexual Trauma Coordinator	↑↑11%		8%		3%	
SAPR Connect			↑21%	↑19%	13%	

## Programs, Policies, and Procedures

Sexual assault responders were asked if clear policies and procedures were in place for victim care (e.g., ensure victim safety, obtain protective orders, expedited transfers), including when different populations (e.g., foreign nationals, dependents) are involved in the case, and/or when in a joint environment.

The vast majority of sexual assault responders indicated they have clear procedures for victim care policies and procedures. These indications trended significantly upward regarding expedited transfers, reporting retaliation, and handing off cases to the victim’s next location (Table 26). There were few differences among the types of sexual assault responders, therefore, only overall sexual assault responders are shown here.

**Table 26.**  
*Program Procedure Clarity for Different Situations*

Situation	2018	2021	
Ensuring victims’ safety when handling cases	97%	97%	↑ Higher than 2018
Ensuring SARC’s and VA’s personal safety when handling a case	97%	97%	
Obtaining a Military Protective Order (MPO)	97%	97%	
Obtaining a Civilian Protective Order (CPO)	97%	97%	
Providing a Special Victims’ Counsel (SVC)/Victims’ Legal Counsel (VLC)	97%	97%	
Providing expedited transfers	97%	97%	
Providing ways to report retaliation	97%	97%	
Handing off cases to the SARC at the victim’s next location	97%	97%	

## Program Procedures for Different Populations

Sexual assault responders indicated they have clear procedures for handling cases involving dependents, visiting personnel, DoD civilian employees, and deployed military members (Table 27). One population that may need more clarity of policies and procedures for cases are those involving foreign nationals, as only 51% of SARC, 66% of VA/UVAs, and 63% of SVC/VLC/SVPs indicated having clear policies in place.

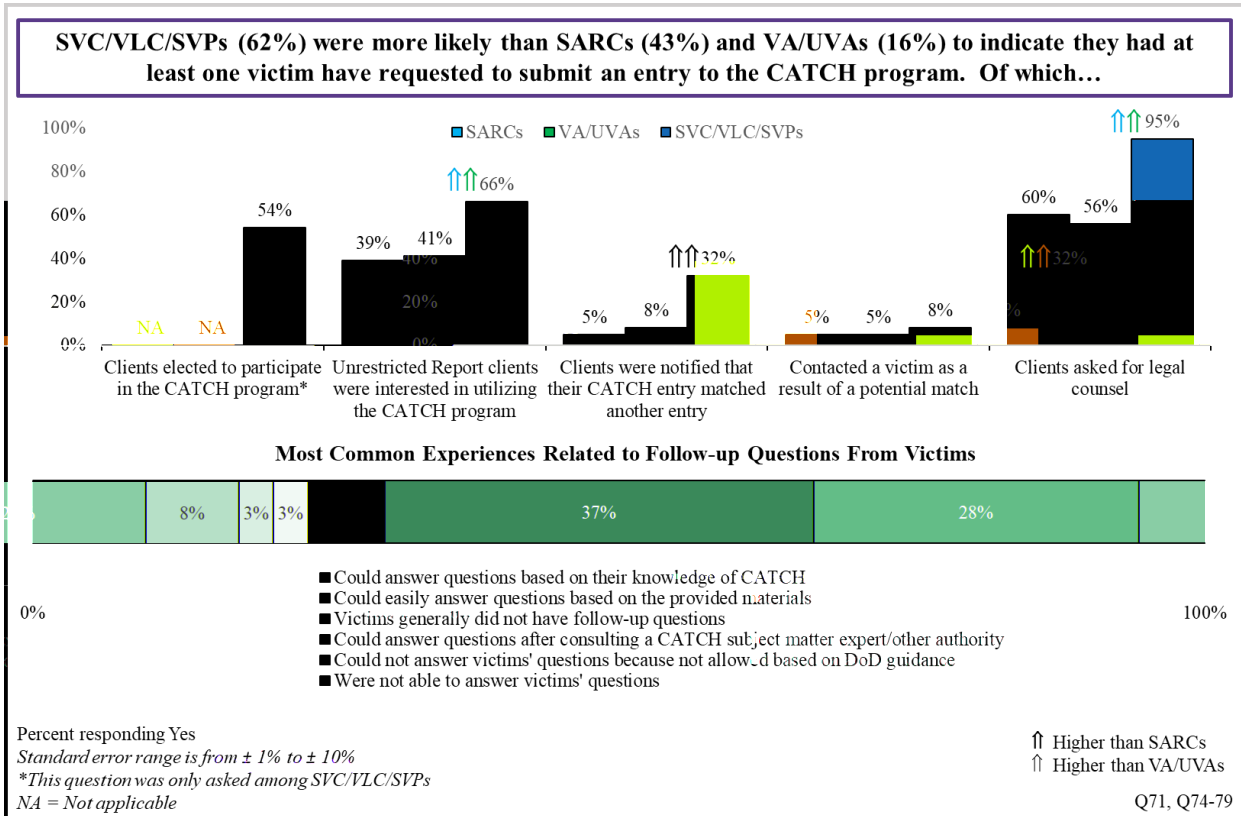

**Table 27.**  
*Program Procedure Quality for Different Populations, by Role*

Population	SARCs		VA/UVAs		SVC/VLC/SVPs		↑ Higher than SARCs ↑ Higher than VAs/UVAs ↑ Higher than 2018
	2018	2021	2018	2021	2018	2021

Deployed military members*	---	---	87%	↑ 91%	---	---	

## Catch a Serial Offender (CATCH) Program

CATCH provides a system for adult sexual assault victims, including those with restricted reports, to voluntarily submit anonymous reports of their assault. The system identifies if the alleged perpetrator was involved in other sexual assaults, a “match,” in the system (DoDI 6495.02, 2021). As CATCH reached its full operating capability in August 2019, new items regarding it were introduced in the 2021 QSAR. SVC/VLC/SVPs were more likely than SARCs and VA/UVAs to indicate they had at least one victim have requested to submit an entry to the CATCH program (Figure 13). Sexual assault responders who had a victim request an entry were asked follow-up questions regarding what happened with that request and about their experience in answering follow-up questions from victims about the CATCH program. SVC/VLC/SVPs were more likely than SARCs and VA/UVAs to indicate unrestricted report clients were interested in utilizing the CATCH program, had clients who were notified that their CATCH entry matched another entry, and had clients ask for legal counsel. When asked about their experience in answering follow-up questions about CATCH from victims, sexual assault responders were generally able to answer victims’ questions, with almost two fifths of all sexual assault responders indicating they could answer questions based on their knowledge of CATCH and more than a quarter could answer question based on provided materials. Only 3% of sexual assault responders indicated they could not answer victims’ questions.

**Figure 13.**  
**CATCH Program**

## Chapter 5: SAPR Professional Training

Element G of the NDAA for FY21 requested that the adequacy of the training received by sexual assault responders be assessed. The 2021 QSAR asked sexual assault responders about their experiences and opinions regarding the training they received in order to perform their duties. Topics included perceptions around the effectiveness of the initial training sexual assault responders received to prepare them to interact with victims of sexual assault, perceptions on training specifically related to addressing concerns of retaliation against victims of sexual assault, and opinions on D-SAACP training, including its effectiveness, and willingness and ability to continue to engage with the certification program.

### Effectiveness of Initial Training

Sexual assault responders were asked their opinions on how well their initial training prepared them to have structured conversations with victims of sexual assault, to help victims of sexual assault through the court martial process, and to serve men who experienced sexual assault. While the majority of all sexual assault responders reported feeling at least moderately prepared by their initial training to handle duties related to these domains, SARCS felt less prepared than VA/UVAs and SVC/VLC/SVPs after their initial training (Figure 14). Compared to 2018, SARCs and VA/UVAs indicated a significant increase in preparedness to help victims through the court-martial process, but were still significantly less prepared than SVC/VLC/SVPs.

**Figure 14.**  
*Effectiveness of Initial Training, by Role*

At the Service level, members of the Navy and Air Force endorsed the highest levels of preparedness after initial training across all elements (Table 28). Helping victims through the court-martial process is an area for improvement across all Services, although there was a trend

upward for sexual assault responders in the Army, Air Force, and DoD Agencies compared to 2018.

**Table 28.**  
*Effectiveness of Initial Training, by Service*

Effectiveness of Initial Training	Army		Navy		Marine Corps		Air Force		DoD Agency	
	2018	2021	2018	2021	2018	2021	2018	2021	2018	2021
Having structured conversations with victims	9%	28% ↑	10%	10%	10%	10%	10%	10%	10%	10%
Helping victims through the court-martial process	29%	34% ↑	48% ↑↑	51% ↑↑	34%					
Serving men who have experienced sexual assault	42%	44%	66% ↑↑	66% ↑↑	48%					

↑ Higher than Army  
 ↑ Higher than Marine Corps  
 ↑ Higher than DoD Agency  
 ↑ Higher than 2018

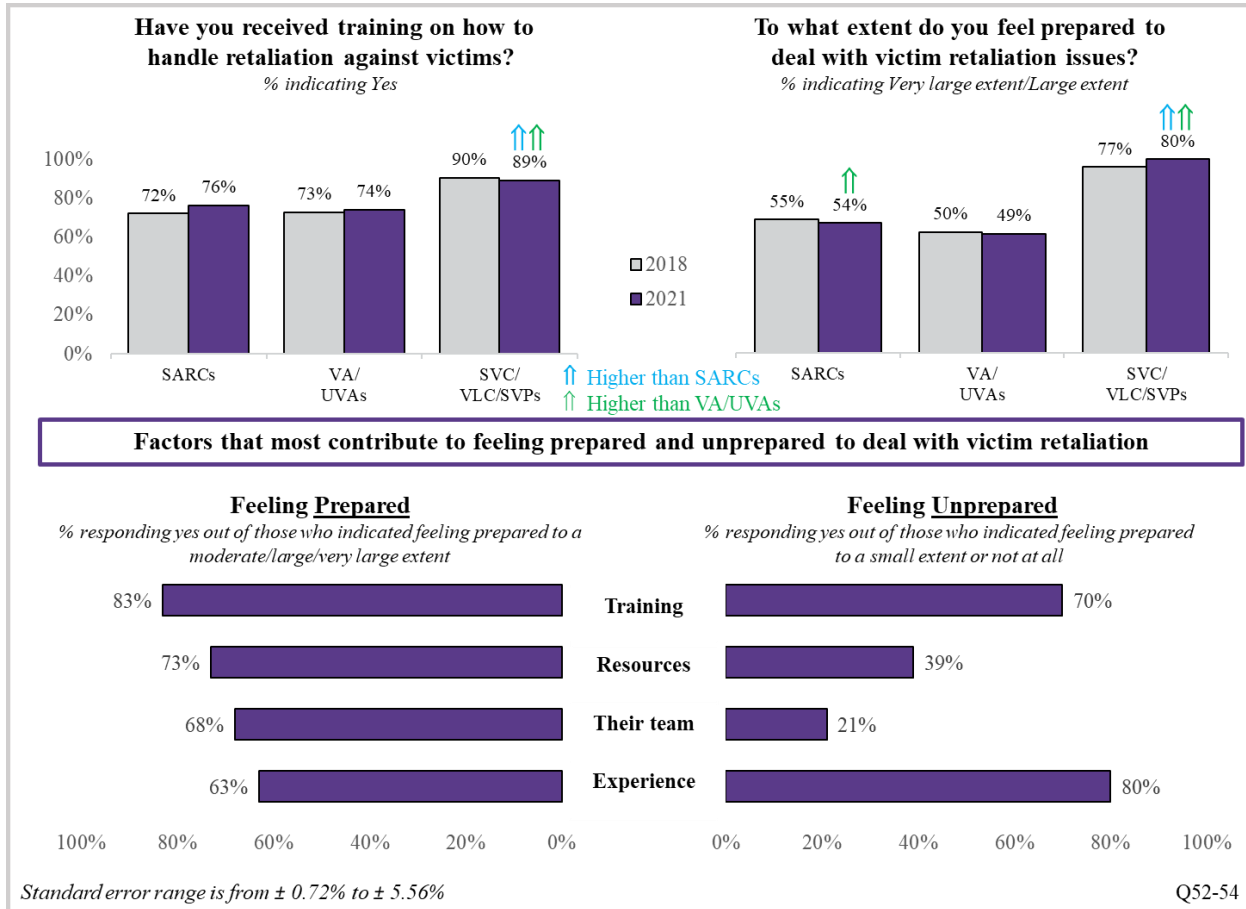

## Training on Retaliation Against Victims

Sexual assault responders were asked about their opinions on the training they received to address retaliation against victims of sexual assault. Specifically, they were asked whether they had received training regarding retaliation against victims, how well that training prepared them to handle retaliation against victims while carrying out their duties, and factors that led to their feelings of preparedness or unpreparedness.

The majority of sexual assault responders reported that they had received training on dealing with retaliation against victims (Figure 15). SVC/VLC/SVPs reported statistically higher rates of receiving training on the topic than SARC and VAs/UVAs. With regard to feeling prepared to deal with victim retaliation issues, SVC/VLC/SVPs were more prepared than SARC and VA/UVAs, with SARC reporting higher rates than VA/UVAs as well.

Sexual assault responders were also asked about which factors contributed to feeling prepared or unprepared to handle victim retaliation, including their training, resources, their team, and experience. Results were not reportable when breaking results out by role, therefore, responses are provided at the total responder level. Overall, sexual assault responders indicated training was the top factor for feeling prepared to handle retaliation against victims of sexual assault, followed by resources available, their team, and experience. The top factor for sexual assault responders feeling unprepared to handle retaliation against victims of sexual assault was experience, followed by training, resources available, and their team.

**Figure 15.**  
**Training on Retaliation**

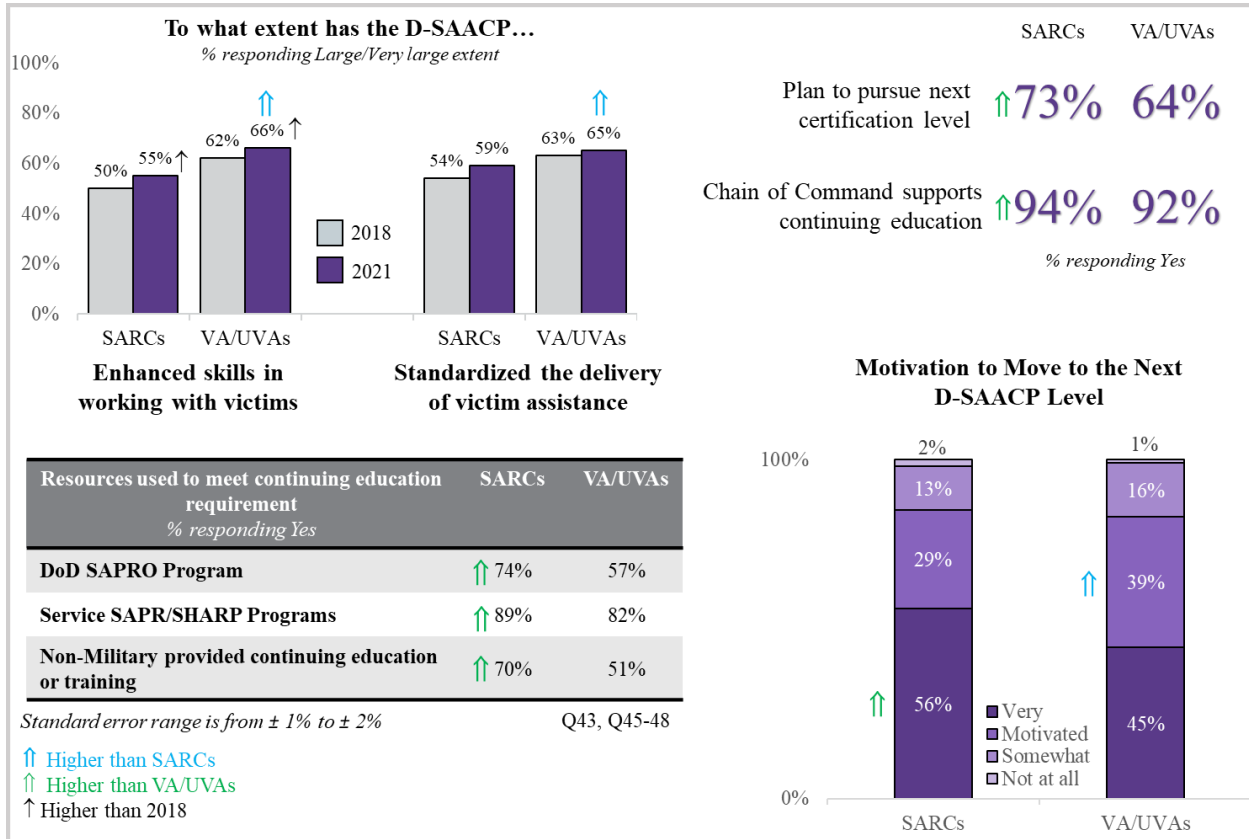

## D-SAACP Training and Intentions

Sexual assault responders were asked about their opinions on the DoD Sexual Assault Advocate Certification Program (D-SAACP). Questions included how the training they received through the program helped with victim assistance, how they were meeting their continuing education requirements, including where they were pursuing continuing education and support from their chain of command, and plans and motivation to pursue higher levels of certification. Note that SVC/VLC/SVPs are not required to attain D-SAACP certification, and as a result, these questions were only asked of SARCs and VA/UVAs. Figure 16 displays data for these items.

Compared to 2018, SARCs and VA/UVAs indicated the D-SAACP training they received helped to enhance their skills in working with victims at higher rates in 2021. VA/UVAs were more likely than SARCs to indicate the D-SAACP has standardized the delivery of victim assistance. The vast majority of sexual assault responders indicated that their chain of command supports their continuing education requirements, with SARCs indicating more support than VA/UVAs. With regard to what resources sexual assault responders used to meet their continuing education requirements, SARCs were more likely than VA/UVAs to utilize all three resources available: DoD SAPRO programs, Service SAPR/SHARP programs, and non-Military programs.

SARCs and VA/UVAs were also asked about their plans for, and motivation to, pursue the next D-SAACP certification level. The majority of SARCs indicated they planned to pursue the next certification level, which was higher than VA/UVAs. When asked how motivated they were to move to the next D-SAACP level, SARCs were more likely than VA/UVAs to indicate they were very motivated, while VA/UVAs were more likely than SARCs to indicate they were motivated.

**Figure 16.**  
**D-SAACP, by Role**

## Chapter 6: Conclusion

The *2021 QSAR* surveyed sexual assault responders about their background, training, and perceptions of the SAPR program. Sexual assault responders included SARCs, VA/UVAs, and SVC/VLC/SVPs. These sexual assault responders were from all branches of the military, including the Army, Navy, Marine Corps, Air Force, and DoD agencies. Sexual assault responders could be on active duty, in the National Guard/Reserve, or DoD civilians. The survey asked about a variety of aspects of the SAPR program, including workplace relationships, certification and training, resources and tools, victim care, policies and procedures, and the well-being of the sexual assault responders. The responses provided give the DoD insights into the effectiveness of the SAPR program, highlights areas that are going well, and identifies some areas for improvement. This final chapter highlights key survey findings.

### Well-Being, Workplace Climate, and Self-Care Support

Helping professionals like sexual assault responders tend to experience job-related psychological effects such as job stress, burnout, compassion fatigue, and vicarious trauma more often due to the nature of the work (Newell & MacNeil, 2010). Practice of self-care can mitigate negative psychological effects from work, and organizations can foster this self-care among their

members (Newell & MacNeil, 2010). Sexual assault responders in the DoD indicated higher levels of job stress, burnout, compassion fatigue, and vicarious trauma in 2021, compared to 2018. While high percentages of sexual assault responders indicated adequate resources to handle burnout, compassion fatigue, and vicarious trauma, low percentages indicated

**Despite indications that adequate resources exist to address burn out, vicarious trauma, and compassion fatigue, all three rose significantly in 2021.**

use of three self-care support resources: military behavioral health providers, civilian behavioral health providers, and group counseling. Additionally, the percentage of sexual assault responders indicating adequate time for self-care trended significantly downward in 2021. Despite increases in psychological effects from their work, sexual assault responders scored highly on the work satisfaction scale that was introduced in the *2021 QSAR*.

Well-being and workplace climate often differed depending on subgroup. While increases in burnout, compassion fatigue, and vicarious trauma since 2018 were common across almost all subgroups, increases in job stress were almost entirely driven by VA/UVAs, sexual assault responders performing a collateral duty, and D-SAACP Level I holders. Still, in 2021 these three subgroups experienced less of these experiences, plus retaliation, than their comparison subgroups. The rate of retaliation experienced by all sexual assault responders remained low at 6%, unchanged from 2018. Because work satisfaction and workgroup effectiveness scales were not included in the *2018 QSAR*, results could not be trended, but there were notable differences between subgroups: SVC/VLC/SVPs scored significantly lower on work satisfaction, but significantly higher on workgroup effectiveness, than other roles. Marine Corps sexual assault responders scored the lowest, while Air Force sexual assault responders scored the highest, on both scales.

## Commander Relationships

The majority of sexual assault responders reported feeling supported by their command. Specifically, sexual assault responders reported their commander is accessible and fully supports them. More than half of all sexual assault responders endorsed high perceptions of command support and trust, including an increase in the perception of being viewed as an expert.

However, despite these high rates of support, there was a general decrease in perceptions of command trust and support from 2018 to 2021. Perceptions of commander support and viewing their role as important significantly decreased from 2018. Additionally, perceptions of commanders' comfort level in speaking on general topics related to sexual violence decreased in 2021

compared to 2018. There was no change in perceptions of commanders' comfort speaking with victims of sexual violence, but as only 29% of sexual assault responders reported frequent contact with victims' commanders, this perception may be impacted by other factors.

**Sexual assault responders feel highly supported by their command, but these perceptions have decreased in 2021 compared to 2018.**

## Support Services for Victims of Sexual Assault

Resources available for victim care remained abundant and largely stable in 2021 compared to 2018. Across the board, sexual assault responders reported that resources were available for the victims they see, however, referrals to outside agencies decreased in 2021. The introduction of the CATCH program has been relatively well implemented with over half of sexual assault responders reporting that they have engaged with it regarding the clients they have seen.

Overall, the vast majority of sexual assault responders endorsed that there are clear policies and procedures in place to provide victim care. This was largely stable across working with victim cases involving different populations with the exception of cases involving foreign nationals.

With specific regard to expedited transfers, the vast majority of SARCs that participated in one expressed that they were following established policy and that communication from commanders was improving in 2021. However, receiving SARCs reported much lower rates of receiving notification from command, obtaining updates on investigations, and having a warm handoff from sending SARCs compared to sending SARCs.

This finding suggests that there is some form of breakdown of communication between sending and receiving SARCs, where sending SARCs feel they are correctly following policy guidelines, but that communication is not reaching receiving SARCs.

**While policy for victim care is largely clear in the majority of circumstances, there seems to be a disconnect in communication between sending and receiving SARCs during expedited transfers.**

## Effectiveness of Training

Overall, perceptions around initial training and the D-SAACP are positive. The majority of sexual assault responders expressed that their training prepared them to at least a moderate extent to perform

**Training was largely viewed as helpful, however, sexual assault responders' perceptions of the effectiveness of training decreased as their D-SAACP level increased.**

their duties as it related to direct victim care, working with victims through the court martial process, addressing issues of retaliation against victims, and working with men who had experienced sexual assault. Despite these stable levels of perceptions on training effectiveness overall, a large number of sexual assault responders expressed that they only felt moderately prepared and up to a fifth felt that their training left them feeling not at all prepared to deal with these issues. Additionally, confidence in initial trainings seems to lessen as sexual assault responders gain more experience and progress through D-SAACP levels. These results suggest a gap in the training program that could be elucidated by the more highly certified SARCs or the potential for the need for refresher trainings for responders that have served in the role for longer periods of time.

The training involved in attaining D-SAACP certification is well regarded. The majority of SARCs and VA/UVAs indicated that they believed these trainings helped them to enhance their skills in working with victims and to standardize the delivery of victim assistance.

Finally, SARCs and VA/UVAs are both highly motivated and planning to continue to engage with, and advance through, the levels of the D-SAACP.

## Background

The *2021 QuickCompass of Sexual Assault Response Personnel* is a survey developed in 2009 to examine characteristics of Sexual Assault Prevention and Response (SAPR) programs at military installations worldwide. This survey was designed to gauge how effectively responders are trained for their position and their perceptions of how well the SAPR program is supported and executed. Findings from this study can be used to identify policies, community resources, and support networks that are most effective in aiding sexual assault responders in their respective positions.

The *2021 QuickCompass of Sexual Assault Response Personnel* fielded from June 8, 2021, to July 20, 2021. The sample included Sexual Assault Response Coordinators (SARC); Victim Advocates (VA) and Uniformed Victim Advocates (UVA); and Special Victims' Counsel (SVC), Victims' Legal Counsel (VLC), and Special Victims' Paralegals (SVP). Responders were members of the Army, Navy, Marine Corps, Air Force,<sup>5</sup> Coast Guard, or Department of Defense (DoD) Agencies, and spanned a variety of duty statuses. The survey was a census, administered via e-mail to 23,426 sexual assault responders. The final unweighted sample included 4,370 respondents. Table 1 and Table 2 provide the unweighted sample sizes broken down by job role, duty status, and Service.

**Table 1.**

### *Unweighted Job Role by Service*

	Overall	SARC	VA/UVA	SVC/VLC/SVP
Army	2,358	598	1735	25
Navy	708	68	633	7
Marine Corps	372	53	308	11
Air Force	651	102	534	15
DoD Agency	80	42	38	0
<b>Total</b>	<b>4,370</b>	<b>881</b>	<b>3,418</b>	<b>71</b>

**Table 2.**

### *Unweighted Duty Status by Job Role*

	Overall	SARC	VA/UVA	SVC/VLC
Active Duty	2,869	400	2,406	63
National Guard	460	56	404	0
Reserve	271	51	218	2
DoD Civilian	770	374	390	6
<b>Total</b>	<b>4,370</b>	<b>881</b>	<b>3,418</b>	<b>71</b>

This report provides the weighted frequencies for all of the survey questions and includes estimates for the Service, duty status, and job role subpopulations. Complete details on the survey methodology as well as the sampling and weighting processes are available in the *QuickCompass of Sexual Assault Response Personnel (QSAR) 2021 Weighting Methodology*.

<sup>5</sup> Participants that self-reported serving in the Space Force had their data combined with members of the Air Force.

## How to Use the Topline Report

Each survey question is presented within the topline report. The topline report includes the question text (or composite measuring description, if applicable), subitem text (if applicable), variable name, response options, reporting categories, unweighted *n*, estimates for each response option, and a table note (if applicable). Each of these elements is shown in Figure 4 and described in detail below.

**Figure 1.**

### How to Read a Topline Report

1 VARNAME: [Question Text]: [Subitem text, if applicable]

	[TOTAL REPORTING]	[REPORTING CATEGORY]			
	[Total Reporting]	[Sub reporting category]	[Sub reporting category]	[Sub reporting category]	[Sub reporting category]
Response label 1					
Response label 2					
Response label 3					
Response label 4					
Response label 5					
<i>Unweighted n</i>					
NOTE: [Footer, skip logic, and instruction text]					

1. **Question Text, Subitem Text, and Variable Name:** This contains the question text from the survey or composite measure description, if the item was constructed, and the subitem text from the survey. The item’s corresponding variable name is also included.
2. **Response Options:** This contains the response options as presented on the survey.
3. **Reporting Category:** This row lists the reporting group for each column, including the total reporting for the sample.
4. **Unweighted *n*:** The number of members who answered the question is shown in this column. These are the members represented in the estimates for that reporting group.
5. **Response Option Percentages:** Estimates are placed into rows that correspond to the response options. For the majority of survey items, these rows contain the percentage of members choosing the response options indicated by the row heading. Within a set of response options, percentages may not add to 100% due to rounding. In some questions, respondents were asked to “Mark all that apply” for a list of responses. Because respondents were able to select more than one option, the topline report shows the percentage of respondents who marked each response option, and the sum across the subitems does not equal 100%. Further, if respondents endorsed two or more response options, they were counted in the percentage for all options marked.
6. **Table Note:** The table note describes the skip patterns and instruction text. Not all questions apply to every respondent, and where possible, the survey is programmed to skip respondents over questions that are not applicable.

In addition, the following reporting conventions are used within the topline report:

- *NR* indicates the estimate is *Not Reportable* and is suppressed because of low reliability. Estimates of low reliability are suppressed based on criteria defined in terms of nominal sample size (less than five). An “NR” presentation protects DoD, and the reader, from presenting potentially inaccurate findings due to instability of the specific estimate. The cause of instability is due to high variability usually associated with a small number of respondents contributing to the estimate.
- “---” indicates the question was not applicable and did not apply to respondents in the reporting category based on answers to previous questions.

NOTE: Responses to SRSVCA, SRCOMP, and SRCIVSVC were used to categorize respondents into the appropriate Service. Air Force includes respondents in the Space Force. SRELIG:

## 2021 QuickCompass of Sexual Assault Response Personnel Annotated Questionnaire

//PROGRAMMING NOTE: DISPLAY BELOW MESSAGE.//

### Welcome

[Security Protection Advisory](#)

OMB CONTROL NUMBER: 0704-0603

OMB EXPIRATION DATE: 11/30/2021

You have been selected to take a survey about your background, training, and perceptions of your Sexual Assault Prevention and Response (SAPR) program for Sexual Assault Response Coordinators (SARC), Victims' Advocates (VA), Special Victims' Counsel (SVC), Victims' Legal Counsel (VLC), and Special Victims' Paralegals (SVP). When you click the *Continue* button below, you will be asked to:

- Read the Security Protection Advisory
- Read the Privacy Advisory
- Read the FAQs
- Take the survey

If you have questions, please refer to the [Frequently Asked Questions](#) page. Thank you for your time and participation.

#### AGENCY DISCLOSURE NOTICE

The public reporting burden for this collection of information, 074-0603, is estimated to average 20 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or burden reduction suggestions to the Department of Defense, Washington Headquarters Services, at [whs.mc-alex.esd.mbx.dd-dod-information-collections@mail.mil](mailto:whs.mc-alex.esd.mbx.dd-dod-information-collections@mail.mil). Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to any penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number.

#### Section 508 Compliance

The U.S. Department of Defense is committed to making electronic and information technologies accessible to individuals with disabilities in accordance with [Section 508 of the Rehabilitation Act \(29 U.S.C. §794d\), as amended in 1999](#). Send feedback or concerns related to the accessibility of this website to: [DoDSection508@osd.mil](mailto:DoDSection508@osd.mil). For more information about Section 508, please visit the [DoD Section 508 website](#). Last Updated: 08/13/2013

## Security Protection Advisory

**WEB SITE PRIVACY:** Neither the Department of Defense (DoD) nor Fors Marsh Group will collect personal information about you when you visit this web site unless you choose to provide it yourself. If you provide personal information, it will be treated as confidential.

In addition, our system does not enable "cookies," which are files placed on your computer's hard drive in order to monitor your use of the site or the web. For more information about your privacy rights, please read the Privacy Advisory at the beginning of the survey.

This web site does collect certain data from your visit but does not store it in a way that it can be linked to you. This non-personal information helps us make the site more useful by recognizing the types of technology being used. The data collected are listed below:

1. The Internet Protocol (IP) address for the computer and the server being used on the Internet (for example, www.verizon.com, www.comcast.com, 122.3.55.34). Depending on your Internet service provider, IP addresses may identify your computer; in other cases, they identify no more than your Internet service provider (such as Verizon or Comcast).
2. The type and version of the browser and operating system used to access our site.
3. The date and time this site was accessed.
4. Number of bytes sent and received.
5. The pages visited.

This information is stored permanently for troubleshooting technical problems and for future capacity planning. It cannot be linked to any survey response data and resides in a completely different database. It may be shared with DoD as required for troubleshooting connections from DoD computers. None of this information will be revealed publicly or used to identify you.

## Privacy Advisory

The public reporting burden for this collection of information, 0704-0603, is estimated to average 30 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or burden reduction suggestions to the Department of Defense, Washington Headquarters Services, at [whs.mc-alex.esd.mbx.dd-dod-information-collections@mail.mil](mailto:whs.mc-alex.esd.mbx.dd-dod-information-collections@mail.mil). Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to any penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number.

Your name and contact information have been used only for the distribution of this survey. Your responses to the demographic questions will allow DoD to better analyze all responses among varying demographic groups. Responding to this survey is voluntary.

The survey is confidential. Therefore, any responses you provide regarding your experiences in your current position will not impact your reporting options.

Most people can complete the survey in 20 minutes. There is no penalty to you if you choose not to respond. However, maximum participation is encouraged so the data will be complete and representative.

## Additional Information

10 USC Sections 136, 481, 1782, 2358, 14 USC 1 and Section 539D, NDAA FY 2021, authorize the Department of Defense to conduct this survey. Reports will be provided to the military leaders, the Secretary of Defense, and Congress.

OPA uses well-established, scientific procedures to randomly select a sample representing the Defense community based on combinations of demographic characteristics.

Identifying information will be used only by government and contractor staff engaged in, and for purposes of, survey research. For example, the research oversight office of the Office of the Under Secretary of Defense (Personnel and Readiness) and representatives of the Walter Reed National Military Medical Center (WRNMMC) are eligible to review research records as a part of their responsibility to protect human subjects in research. In no case will individual identifiable survey responses be reported.

The data collection procedures are not expected to involve any risk or discomfort to you.

Survey data may be shared with DoD researchers or organizations outside the DoD who are conducting research on DoD personnel. OPA performs a disclosure avoidance analysis to reduce the risk of there being a combination of demographic variables which can single out an individual. In some instances and only with sponsor approval, OPA may make available datasets with additional demographic variables to a small number of approved researchers. There is some risk individuals might be identified on these datasets; however, OPA implements several procedures to protect the data. The datasets will only be available in a secure environment where they cannot be downloaded or transferred. Statistical analyses can only be performed after review and approval to ensure identifying information is not released. Access to these datasets will only be allowed on a need-to-know basis with an approved data sharing agreement in place. Researchers approved for access to these datasets must adhere to strict procedures, including - but not limited to - data sharing agreements, secure transfers of data, destruction of files upon completion of research, and authorization to reuse data. In addition, receipt and use of these datasets must adhere to all DoD information assurance, security, and other data use policies.

Your responses could be used in future research. Results from these surveys will be posted on the web: <https://dwp.dmdc.osd.mil/dwp/app/dod-data-reports/defense-research>

If you answer any items or indicate distress or being upset, etc., you will not be contacted for follow-up purposes. However, if you indicate a direct threat to harm yourself or others within responses or communications about the survey, because of concern for your welfare, OPA may notify an office in your area for appropriate action.

**If you experience any difficulties while taking the survey, please contact the Survey Processing Center by sending an e-mail to [dodhra.mc-alex.dmdc.mbx.qcsurvey@mail.mil](mailto:dodhra.mc-alex.dmdc.mbx.qcsurvey@mail.mil). If you have concerns about your rights as a research participant, please contact the OUSD(P&R) Research Regulatory Oversight Office at 703-681-6522/703-681-8320 or e-mail [DHRA.R202.PR@mail.mil](mailto:DHRA.R202.PR@mail.mil).**

Once you start answering the survey, if you desire to withdraw your answers, please notify the Survey Processing Center prior to July 20, 2021. Please include in the e-mail your name and Ticket Number. Unless withdrawn, partially completed survey data may be used after that date.

//PROGRAMMING NOTE: DISPLAY BELOW MESSAGE.//

## How to Contact Us

If you have questions or concerns about this survey, you may contact the Survey Operations Center at [dodhra.mc-alex.dmdc.mbx.qcsurvey@mail.mil](mailto:dodhra.mc-alex.dmdc.mbx.qcsurvey@mail.mil).

[Why does the survey ask personal questions?](#)

[Will my answers be kept private?](#)

[Can I withdraw my answers once I have started the survey?](#)

[Will I ever see the results of the survey?](#)

### What is The Office of People Analytics (OPA)? [Top](#)

- In 2016, the Department of Defense (DoD) established the The Office of People Analytics (OPA) to utilize big-data analytics to better understand key components of Service members' career paths, and how policy or environmental changes affect the performance and composition of the DoD workforce. OPA provides go-to expertise for scientific assessments, data analytics, and problem solving to improve the lives of the DoD community.
- OPA conducts Joint-Service surveys including the Status of Forces Surveys, QuickCompass Surveys, and Health and Resilience (H&R) Surveys for the DoD.

### What is the QuickCompass Program? [Top](#)

- QuickCompass is a DoD personnel program that features web-based surveys sponsored by the Under Secretary of Defense for Personnel and Readiness (USD[P&R]).
- These surveys enable DoD to regularly assess the attitudes and opinions of the DoD community, including active duty and Reserve component members, on the full range of personnel issues.

- The Health and Resilience (H&R) Research Center supports the well-being of all members of the DoD community by providing in-depth research and analysis to inform policy makers on topics that impact resiliency, such as gender relations and equal opportunity.
- H&R provides the Department with fast, accurate assessments of the attitudes and opinions of the entire DoD community to evaluate existing programs and policies, establish baseline measures before implementing new programs and policies, and monitor progress of programs and policies and their effects on the Total Force.

### How do I know this is an official, approved DoD survey? [Top](#)

- The public reporting burden for this collection of information, 0704-0603, is estimated to average 30 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or burden reduction suggestions to the Department of Defense, Washington Headquarters Services, at [whs.mc-alex.esd.mbx.dd-dod-information-collections@mail.mil](mailto:whs.mc-alex.esd.mbx.dd-dod-information-collections@mail.mil). Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to any penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number.

### How did you pick me? [Top](#)

- All Sexual Assault Response and Prevention (SAPR) certified Sexual Assault Response Coordinators (SARC), Victim Advocates (VA), Special Victims' Counsel (SVC), Victims' Legal Counsel (VLC), and Special Victims Paralegals (SVP) in the DoD (active duty, National Guard/Reserve, and civilian) were selected to participate in this study.

### Why should I participate? [Top](#)

- This is your chance to be heard on issues that directly affect you, including your background, training, and perceptions of your Sexual Assault Prevention and Response (SAPR) program.
- Your responses on this survey *make a difference*.

### What is [dodhra.mc-alex.dmdc.mbx.qcsurvey@mail.mil](mailto:dodhra.mc-alex.dmdc.mbx.qcsurvey@mail.mil)? [Top](#)

- The official e-mail address for communicating with Sexual Assault Response Coordinators (SARC), Victims' Advocates (VA), Special Victims' Counsel (SVC), Victims' Legal Counsel (VLC), and Special Victims' Paralegals (SVP) about QuickCompass. "dodhra.mc-alex.dmdc.mbx.qcsurvey@mail.mil" is short for QuickCompass Survey.

### **Why am I being asked to use the web? [Top](#)**

- Web administration enables us to get survey results to senior Defense leaders faster.

### **Why are you using a .com instead of a .mil domain to field your survey? [Top](#)**

- The survey is administered by our contractor, Fors Marsh Group, an experienced survey operations company. This allows everyone to access the survey, even from a non-government computer.

### **Do I have to answer all questions? [Top](#)**

- No, it is not necessary to answer every question. Within the survey screen, you have two control buttons: *Continue >>* and *<< Back*. Use these buttons to navigate through the survey or skip questions. If you wish to complete the survey at a later time, simply close out of the window. When you return to the survey website, enter your Ticket Number to get to the place in the survey where you had stopped.

### **Why does the survey ask personal questions? [Top](#)**

- OPA reports overall results, as well as by other characteristics, such as race (minority/not minority), gender, etc. To complete these analyses, we must ask demographic information from respondents.
- Analyzing results in this way provides Defense leaders information about the attitudes and concerns of all subgroups of personnel so that no groups are overlooked.

### **Will my answers be kept private? [Top](#)**

- The survey is confidential. All data will be reported in the aggregate and no individual data will be reported.

- We encourage you to safeguard your Ticket Number to prevent unauthorized access to your survey. In addition, to ensure your privacy, be aware of the environment in which you take the survey (e.g., take the survey when no one else is home, take care to not leave the survey unattended).
- If you answer any items in such a way that you indicate distress or being upset, etc., you will not be contacted for follow-up purposes. However, if you indicate a direct threat to harm yourself or others within responses or communications about the survey, because of concern for your welfare, OPA may notify an office in your area for appropriate action.

**Can I withdraw my answers once I have started the survey? [Top](#)**

- If you wish to withdraw your answers, please notify the Survey Processing Center prior to July 20, 2021 by sending an e-mail to [dodhra.mc-alex.dmdc.mbx.qcsurvey@mail.mil](mailto:dodhra.mc-alex.dmdc.mbx.qcsurvey@mail.mil). Include your name and Ticket Number.

**Will I ever see the results of the survey? [Top](#)**

- OPA posts survey results on the following website:

<https://dwp.dmdc.osd.mil/dwp/app/dod-data-reports/defense-research>

## Programming and Piping Notes

<b>[PROGRAM_ACRO]</b>	If NAVY=1 or MARINE CORPS=1 or AIR FORCE=1 or SPACE FORCE=1 or DOD=1 or, pipe in “Sexual Assault Prevention and Response (SAPR)”
	If ARMY=1, pipe in “Sexual Harassment/Assault Response & Prevention (SHARP)”

# Appendix C. FAQ

## Frequently Asked Questions

The Office of People Analytics (OPA) Health and Resilience (H&R) division has been conducting surveys of sexual assault responders since 2009. OPA uses scientific state of the art statistical techniques to draw conclusions from populations within the purview of the Department of Defense (DoD), such as active duty and Reserve components. To construct estimates for the *2021 QuickCompass of Sexual Assault Response Personnel (2021 QSAR)*, OPA used sampling and weighting procedures to ensure accuracy of estimates to the populations of Sexual Assault Response Coordinators (SARCs), Victim Advocates (VAs), Uniformed Victim Advocates (UVAs), Special Victims' Counsel (SVCs), and Victims' Legal Counsel (VLCs). The following details some common questions about our methodology as a whole and the *2021 QSAR* specifically.

### **1. What was the population of interest for the *2021 QuickCompass of Sexual Assault Response Personnel (2021 QSAR)*?**

The population of interest for the *2021 QSAR* consisted of SARCs, VAs, UVAs, SVCs, and (VLCs). DoD Instruction (DoDI) 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures, defines these specialized positions. Their broad purpose is to provide dedicated support to survivors of sexual assault providing guidance and advocacy for survivors in gaining the medical, psychological, and legal services to which they are entitled. They provide support from initial response throughout the care and recovery process.

### **2. Why did you survey this population?**

Section 539D, National Defense Authorization Act (NDAA) for Fiscal Year (FY) 2021, specified that not later than June 30, 2021, the Secretary of Defense shall conduct a survey regarding the ability of SARCs and Sexual Assault Prevention and Response VAs to perform their duties; the *2021 QSAR* fulfills this requirement. It is critical to the DoD Sexual Assault Prevention and Response Office (SAPRO) and Service-level Sexual Harassment and Assault Response and Prevention (SHARP) and SAPR officials to understand how responders are trained for their position and their perceptions of how well their program is supported and executed. Because the SAPR/SHARP program is now a few years old, regular assessment of the opinions of responders is critical to understanding both their view of the resources required to run the program and how well they are supporting the objectives of the program. As the providers of dedicated support to survivors of sexual assault, SARCs, VAs, UVAs, SVCs, and VLCs have unique perspectives on program effectiveness that is tapped by the *2021 QSAR*.

### **3. How did you identify SARCs, VAs/UVAs, and SVCs/VLCs to participate in the *2021 QSAR*?**

Potential SARC, VA, and UVA respondents were identified through the Department of Defense Sexual Assault Advocate Certification Program (D-SAACP). The NDAA for FY 2012 requires SARCs, VAs, and UVAs to be certified through D-SAACP. The certification process involves detailed training in SAPR/SHARP programs and all SARCs, VAs, UVAs earn 32 continuing education credits every two years in order to maintain certification. SAPRO provided OPA a list of certified SARCs, VAs, and UVAs in the D-SAACP who were certified as of March 22, 2021.

Potential SVC and VLC respondents were identified through Service-level SAPR/SHARP offices, and contact information was provided to the OPA research team on April 15, 2021. The 2021 QSAR was a census of all SARCs, VAs, UVAs, SVCs, and VLCs who were Active Duty, National Guard/Reserve members, or DoD civilian employees, in the Army, Navy, Marine Corps, Air Force, or DoD agencies. This year, the 2021 QSAR also included members of the Space Force and Coast Guard for the first time.

#### **4. Why did you perform a census of certified SARCs, VAs, UVAs, SVCs, and VLCs?**

OPA concluded that the population of SARCs, VAs, UVAs, SVCs, and VLCs is growing and subject to change as Service members transfer and transition between duties and commands. This conclusion is based on prior survey experience and discussions with SAPRO and Service-level SAPR/SHARP program offices. OPA also concluded that statistically meaningful results required sufficient numbers of responders in various subgroups (e.g., SARCs by Service). Given the estimated number of SARCs, VAs, UVAs, SVCs, and VLCs currently serving, and past year response rates, OPA statisticians concluded a census was required to provide a sufficient number of survey respondents.

#### **5. OPA uses “sampling” and “weighting” for their scientific surveys. Why are these methods used and what do they do?**

Simply stated, sampling and weighting allows for data, based on a sample, to be generalized accurately up to the total population. While the 2021 QSAR was a census, not everyone invited to participate in the survey responds. Statistical weighting techniques are applied to the responders, to adjust for nonresponse, in order to generalize to the population. This methodology meets industry standards used by government statistical agencies including the Census Bureau, Bureau of Labor Statistics, National Agricultural Statistical Service, National Center for Health Statistics, and National Center for Education Statistics. OPA subscribes to the survey methodology best practices promoted by the American Association for Public Opinion Research (AAPOR). The weighting produces survey estimates of population totals, proportions, and means (as well as other statistics) that are representative of their respective populations. Unweighted survey data, in contrast, are likely to produce biased estimates of population statistics.

#### **6. How did you determine the population for weighting purposes?**

The total population for the 2021 QSAR was provided by SAPRO and Service-level SAPR/SHARP offices as of April 15, 2021 and consisted of 23,426 certified SAPR/SHARP responders: 1,973 SARCs, 21,201 VAs/UVAs, and 252 SVCs/VLCs across Active Duty, National Guard/Reserve, and DoD civilian populations. Estimates in the results reflect the population as of April 15, 2021.

#### **7. How accurately did the sample match the results?**

OPA does not have the ability to assess how effectively the sampling frame covers the target population. In the 2021 QSAR, responders were asked to self-identify their current position as SARCs, VAs, UVAs, SVCs, and VLCs.

## **8. How did you contact people to take the survey?**

The web survey administration process began on June 8, 2021, with the mailing of an announcement e-mail to all sample members. The announcement email explained why the survey was being conducted, how the survey information would be used, and why participation was important. Throughout the administration period, additional e-mail reminders were sent to encourage survey participation. The survey closed on July 20, 2021.

## **9. How many people responded and what was the response rate?**

Surveys were completed by 4,370 eligible responders, yielding an overall weighted response rate of 27%. Responders were considered ineligible if they indicated in the survey or by other contact (e.g., telephone calls or e-mails to the data collection contractor) they were not serving in the appropriate position as of the first day of the survey fielding, June 8, 2021. Survey completion is defined as answering 50% or more of the survey questions asked of all responders.

## **10. When did you conduct the survey?**

The 2021 QSAR was administered via web from June 8, 2021, to July 20, 2021.

## **11. Some of the estimates provided in the report show “NR” or “Not Reportable.” What does this mean?**

The estimates become “Not Reportable” when they do not meet the criteria for statistically reliable reporting. This can happen for a number of reasons including high variability or too few survey respondents. This process helps ensure the estimates we provide in our analyses and reports are accurate and precise.

## **12. Do the results on retaliation for reporting sexual assault mean that people experienced retaliation?**

No, the results are not rates of retaliation; rather the results reflect the opinion of responders about the extent to which the Chair of their local Case Management Group (CMG) monitors retaliation at their installation/location. The roles and responsibilities of the CMG are detailed in Enclosure 9 of DoDI 6495.02, including ongoing active monitoring for incidents of retaliation allegations. The CMG is to monitor and address instances where someone has experienced retaliation for reporting sexual assault. Responders were asked if the chair of their CMG inquires of CMG members whether they were aware of any retaliation experienced by survivors, bystanders, and/or responders. Note this question addresses the responsibility of the CMG chair to inquire about potential acts of retaliation. These results do not reflect rates at which survivors, bystanders, and/or responders might have experienced retaliation.

## **13. How do the results in 2021 compare with the previous surveys in 2018, 2015, 2012, and 2009?**

The questions asked in previous surveys prior to the 2018 QSAR are substantially different from those asked in the 2021 QSAR. For the first time, results from the 2021 QSAR are comparable to

results from the 2018 QSAR. Trending analyses were performed where survey items matched in order to monitor change over time in the perceptions of SAPR/SHARP professionals.

**14. Why did you only survey SARCs, VAs/UVAs, and SVCs/VLCs and no other providers, such as SAMFEs or Prevention Personnel?**

A challenge to conducting scientific surveys is identifying the population. In the 2021 QSAR, OPA relied on the D-SAACP as the source of identification for SARCs, VAs, and UVAs, and on Service-level SAPR/SHARP offices for identification of SVC and VLC responders. No such central source currently exists for identifying other sexual assault service providers. While it is true that directives have established other positions for responders, such as and Sexual Assault Medical Forensic Examiners (SAMFEs), there are no current central sources of contact information of incumbents in those positions. OPA is cautious about surveying populations where the sampling frame is tenuous. To include responders in the survey without firm knowledge of the populations could lead to unstable or misleading results.

## Table of Contents

# Appendix D. Glossary

## Glossary

- **SARC** – *Sexual Assault Response Coordinator* – Individuals who are certified through D-SAACP as sexual assault response specialists.
- **VA** – *Victim Advocate* – Individuals certified through D-SAACP who act as direct support personnel for victims of sexual assault as they navigate the response process.
- **UVA** – *Uniformed Victim Advocate* – Similar to VAs
- **SVC** – *Special Victims’ Counsel* – Provides confidential legal advice and guidance for victims of sexual assault.
- **VLC** – *Victims’ Legal Counsel* – Similar to SVCs, VLC is the term used by the Navy and the Marine Corps
- **SVP**- *Special Victims’ Paralegal* – Provide support for SVCs as they perform their duties assisting victims of sexual assault through the legal process.
- **SAPR** – *Sexual Assault Prevention and Response* – DoD and service level program dedicated to prevention of and response to sexual assault in the military.
- **SHARP** – *Sexual Harassment and Assault Response and Prevention* – The Army’s name for their version of SAPR.
- **D-SAACP** – *Defense Sexual Assault Advocate Certification Program* – DoD program for training SARCs and VAs/UVAs for their sexual assault response and prevention duties.

14. ABSTRACT This report presents top line findings from the 2021 QuickCompass of Sexual Assault Response Personnel (2021 QSAR) conducted by the Office of People Analytics (OPA). This survey was conducted at the request of the DoD Sexual Assault Prevention and Response Office (SAPRO) as part of its ongoing evaluation efforts of Sexual Assault Prevention and Response (SAPR) programs towards sexual assault prevention and survivor support. The survey was designed to provide insights about SAPR responders--Sexual Assault Response Coordinators (SARCs), Victims Advocates (VAs), and Special Victims Counsel (SVCs)/Victims Legal Counsel (VLCs)--at military installations worldwide, to understand how effectively responders are trained for their positions, and their perceptions of how well their program is supported and executed.

Standard Form 298 (Rev. 8/98)  
Prescribed by ANSI Std. Z39.18

### INSTRUCTIONS FOR COMPLETING SF 298

**1. REPORT DATE.** Full publication date, including day, month, if available. Must cite at least the year and be Year 2000 compliant, e.g. 30-06-1998; xx-06-1998; xx-xx-1998.

**2. REPORT TYPE.** State the type of report, such as final, technical, interim, memorandum, master's thesis, progress, quarterly, research, special, group study, etc.

**3. DATES COVERED.** Indicate the time during which the work was performed and the report was written, e.g., Jun 1997 - Jun 1998; 1-10 Jun 1996; May - Nov 1998; Nov 1998.

**4. TITLE.** Enter title and subtitle with volume number and part number, if applicable. On classified documents, enter the title classification in parentheses.

**5a. CONTRACT NUMBER.** Enter all contract numbers as they appear in the report, e.g. F33615-86-C-5169.

**5b. GRANT NUMBER.** Enter all grant numbers as they appear in the report, e.g. AFOSR-82-1234.

**5c. PROGRAM ELEMENT NUMBER.** Enter all program element numbers as they appear in the report, e.g. 61101A.

**5d. PROJECT NUMBER.** Enter all project numbers as they appear in the report, e.g. 1F665702D1257; ILIR.

**5e. TASK NUMBER.** Enter all task numbers as they appear in the report, e.g. 05; RF0330201; T4112.

**5f. WORK UNIT NUMBER.** Enter all work unit numbers as they appear in the report, e.g. 001; AFAPL30480105.

**6. AUTHOR(S).** Enter name(s) of person(s) responsible for writing the report, performing the research, or credited with the content of the report. The form of entry is the last name, first name, middle initial, and additional qualifiers separated by commas, e.g. Smith, Richard, J, Jr.

**7. PERFORMING ORGANIZATION NAME(S) AND ADDRESS(ES).** Self-explanatory.

**8. PERFORMING ORGANIZATION REPORT NUMBER.** Enter all unique alphanumeric report numbers assigned by the performing organization, e.g. BRL-1234; AFWL-TR-85-4017-Vol-21-PT-2.

**9. SPONSORING/MONITORING AGENCY NAME(S) AND ADDRESS(ES).** Enter the name and address of the organization(s) financially responsible for and monitoring the work.

**10. SPONSOR/MONITOR'S ACRONYM(S).** Enter, if available, e.g. BRL, ARDEC, NADC.

**11. SPONSOR/MONITOR'S REPORT NUMBER(S).** Enter report number as assigned by the sponsoring/monitoring agency, if available, e.g. BRL-TR-829; -215.

**12. DISTRIBUTION/AVAILABILITY STATEMENT.** Use agency-mandated availability statements to indicate the public availability or distribution limitations of the report. If additional limitations/ restrictions or special markings are indicated, follow agency authorization procedures, e.g. RD/FRD, PROPIN, ITAR, etc. Include copyright information.

**13. SUPPLEMENTARY NOTES.** Enter information not included elsewhere such as: prepared in cooperation with; translation of; report supersedes; old edition number, etc.

**14. ABSTRACT.** A brief (approximately 200 words) factual summary of the most significant information.

**15. SUBJECT TERMS.** Key words or phrases identifying major concepts in the report.

**16. SECURITY CLASSIFICATION.** Enter security classification in accordance with security classification regulations, e.g. U, C, S, etc. If this form contains classified information, stamp classification level on the top and bottom of this page.

**17. LIMITATION OF ABSTRACT.** This block must be completed to assign a distribution limitation to the abstract. Enter UU (Unclassified Unlimited) or SAR (Same as Report). An entry in this block is necessary if the abstract is to be limited.
