# Summary of Impacts

Links: See/submit [Condition Monitoring Observer Reports \(CMOR\)](#) and view the [Drought Impacts Reporter](#)

## Hydrologic Impacts

- There are no known impacts at this time.

## Agricultural Impacts

- There are no known impacts at this time.

## Fire Hazard Impacts

- As of the morning of November 12, fire danger was low (fires are not easily started) in southeast Minnesota, and from southwest into central Wisconsin. Meanwhile, the fire danger was low to moderate (fires start easily and spread at a moderate rate) in northeast Iowa.

## Other Impacts

- There are no known impacts at this time.

## Mitigation Actions

- No known actions are taking place in northeast Iowa, southeast Minnesota, and western Wisconsin.

# Hydrologic Conditions and Impacts

- During the past week (November 6 through November 12), rainfall totals ranged from 0.04" near Oelwein, IA to 1.66" at Mabel, MN.
- Normally, around 4/10" of an inch of rain falls during this time frame.
- This heavy rain resulted in a 1-category improvement in Dodge County in southeast Minnesota.
- As of the morning of November 12, rivers and stream flows were primarily near normal in northeast Iowa, southeast Minnesota, and from southwest into central Wisconsin.

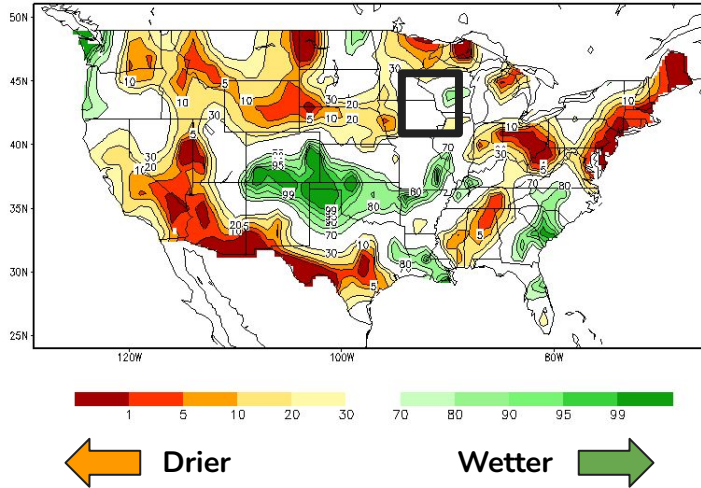

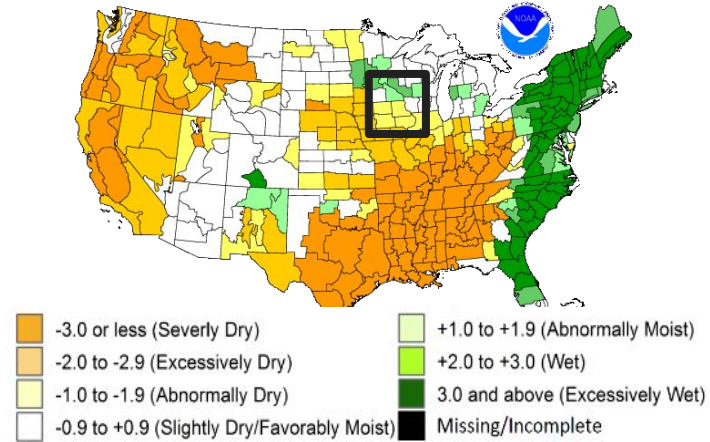

# Agricultural Impacts

- From July through October, both the top- and sub-soils gradually dried.
- During the past 2 to 3 weeks, above-normal rainfall has resulted in some improvement in top- and sub-soil moisture.
