Precipitation

Last 30 days

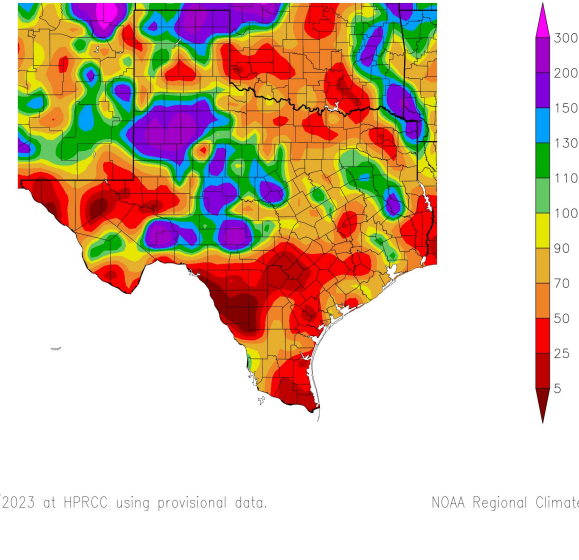

- Late September thunderstorms brought locally heavy rainfall to portions of the Hill Country and southern Edwards Plateau to help provide some short term relief.
- The vast majority of the area saw less than half of normal rains in the past 30 days. Zavala/Dimmit counties are 2 to 3 inches below normal for the past 30 days.

Precipitation (in)
9/5/2023 - 10/4/2023

erated 10/5/2023 at HPRCC using provisional data.

Percent of Normal Precipitation (%)
9/5/2023 - 10/4/2023

ated 10/5/2023 at HPRCC using provisional data.

Summary of Impacts

Links: See/submit [Condition Monitoring Observer Reports \(CMOR\)](#) and view the [Drought Impacts Reporter](#)

Hydrologic Impacts

- Streamflows remain below to much below normal across most basins in the region. Inflows to the Highland Lakes have been essentially zero. See next page for more details.

Agricultural Impacts

- Please see the latest [Crop & Weather Report](#) from Texas A&M Agrilife.
- A mixture of crop moistures are shown across the three crop divisions within the service area.

Fire Hazard Impacts

- Normal wildland fire activity is expected for the month of October. More details below.

Other Impacts

- Water recreation is severely impacted on Lake Medina, Lakes Travis and Amistad as well as the Guadalupe, Frio, Pedernales, and Blanco rivers.

Drought Mitigation Actions

- Please refer to your municipality and/or water provider for mitigation information.
- Select [Municipality Restrictions](#) (as of 10/4)
 - Kerrville: Stage 4
 - Fredericksburg: Stage 3
 - City of Llano: Stage 3
 - City of Georgetown: Stage 3
 - San Antonio: Stage 2
 - Universal City: Stage 2
 - New Braunfels: Stage 2
 - Austin: Stage 2

Hydrologic Conditions and Impacts

- Streamflows remain well below normal in most areas, including at all-time lows in a few basins and sub-basins.
- Much of the streamflow across the area is in the less than 10th percentile for this time of year (maroon shading on the map).
- Canyon Lake is at its lowest level on record.

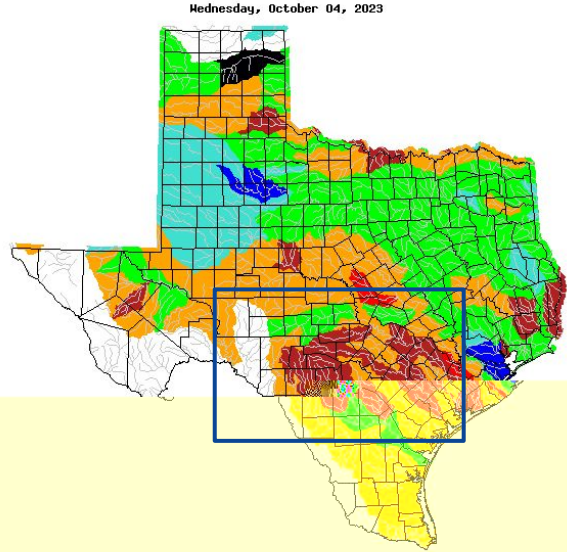

Figure Caption: [USGS 7 day streamflows for Texas](#), valid October 4, 2023

Reservoir	Pool Elevation	Current Elevation	Percent Full
Amistad	1117.00 feet	1065.9 feet	33.5%
Medina Lake	1064.2 feet	977.2 feet	4.0%
Canyon Lake	909.00 feet	890.6 feet	65.0%
Granger Lake	504.00 feet	500.5 feet	74.7%
Georgetown Lake	791.00 feet	771.2 feet	45.1%
Lake Buchanan	1020.00 feet	992.6 feet	45.0%
Lake LBJ	825.00 feet	824.7 feet	98.2%
Lake Marble Falls	738.00 feet	736.4 feet	94.9%
Lake Travis	681.00 feet	628.5 feet	36%
Lake Austin	492.9 feet	492.1 feet	95.7%

Valid October 2023

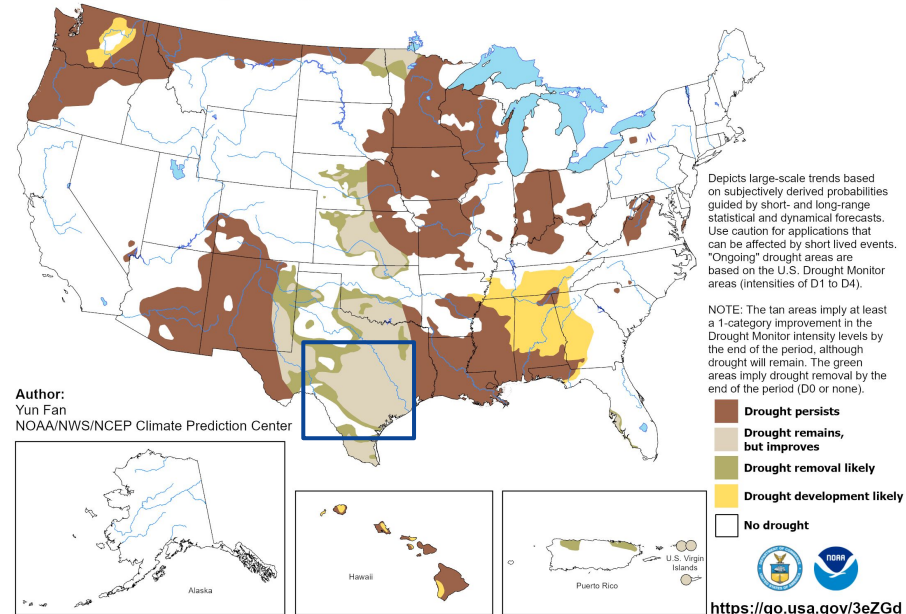

Drought Outlook

The latest monthly and seasonal outlooks can be found on the [CPC homepage](#)

- The Drought Outlook reflects the expected impact of ENSO on drought conditions through the month of October.
- While there is only a narrow sliver of the area that might see drought conditions be removed much of the area is forecast to remain in drought while seeing some improvement.
