	The Maggie Fire 8 miles north of Camp Nelson in the Tulare County Mountains was lightning initiated on the 9th. The fire burned 1,233 acres by the 29th when it was managed for resource objectives. The cost to fight the fire was \$307,000 by the 29th. There were no injuries or structures lost to the fire.								
<b>CAZ097</b>	<b>Tulare Cty Mtns</b>	<b>09 1430PST</b> <b>31 2359PST</b>			<b>0</b>	<b>0</b>			<b>Wildfire</b>
	The Tamarack Fire in Sequoia National Forest 14 miles north of Camp Nelson was lightning initiated in the afternoon of the 9th. See the August Stormdata Report for further information.								
<b>CAZ095</b>	<b>Kern Cty Mtns</b>	<b>09 1538PST</b> <b>12 1700PST</b>			<b>0</b>	<b>0</b>			<b>Wildfire</b>
	The Arco Fire burned 698 acres 5 miles north of Lebec in the Kern County Mountains. The cause of the fire was unknown but there were no injuries and no structures lost. The cost to fight the fire was unknown.								
<b>CAZ089&gt;094-098&gt;099</b>	<b>W Central Sj Valley - E Central Sj Valley - Sw Sj Valley - Se Sj Valley - S Sierra Foothills - Tulare Cty Foothills - Indian Wells Vly - Se Kern Cty Desert</b>	<b>16 1500PST</b> <b>27 1900PST</b>			<b>46</b>	<b>18</b>	<b>170K</b>	<b>492.4M</b>	<b>Excessive Heat</b>
	Arguably one of the hottest spells widespread across California, including Interior Central California, in the last 75 years occurred during a warm period that spanned from the 16th through the 27th of the month. Fresno City had 12 days in a row where maximum temperatures were at or above 105 degrees F. Numerous daily maximum and high minimum temperature records were both reset including the all-time high minimum temperature record for Fresno at 90F on the 23rd from that of 86F set in August of 1908. During the 5-day period from the 22nd through the 26th, Fresno had temperatures of 110F+ each day. The Southwest San Joaquin Valley maximum temperatures had 110F+ readings for a 6-day period from the 21st through the 26th. Minimum temperatures during that warmest portion of the heat spell lowered only into the 80s for much of the Central and South San Joaquin Valley. Even the high foothill areas and Kern County Mountains were impacted as Yosemite Valley in the Southern Sierra Nevada at the 4000-foot elevation had maximum temperatures of 100F+ from the 22nd through the 27th with a 105F high on the 26th. In the high desert areas of Kern County Inyokern had 110F+ from the 22nd through the 27th with overnight lows in the upper 70s to around 80F. Several daily high temperature records were also established in the Kern Desert during the period. Peak energy use in the state hit an all time record, 6165 Megawatts, even though several thousand customers in Central California went without power and air conditioning for hours. Typical of the situation \$100K of refrigerated products were lost at a single store in Northwest Fresno during

### CALIFORNIA, South Central

An intense thunderstorm pushed northwestward through the Antelope Valley and into the Kern County portion of the Mojave Desert the late afternoon of the 20th. Initially strong wind caused damage by felling trees and power poles, and the high wind even blowing out windows on cars as it crossed the desert. Numerous lightning strikes occurred in its passage across the Mojave Desert and as it extended into the Tehachapi area of the Kern County Mountains. Locally heavy rain was reported in the Lancaster-Palmdale area of northern Los Angeles County with the storm's passage.

A small fire around Keyesville near Lake Isabella Dam in the Kern County Mountains was likely set by a lightning strike in the evening of the 20th. Due to the evening thunderstorm activity a number of other small wildfires were set in the Kern County Mountains. These fires included the Clear Fire, located near Eagle Peak in the Piute Mountains (5 acres burned); the Rock Fire south of Heald's Peak near Kelso Valley (one acre burned); and, the Scodie Fire in Scodie Canyon (two acres burned)

A thunderstorm downed trees on Kaiser Pass Road east of Huntington Lake on the 23rd. With the storm came copious amounts of hail that piled deeply due to the wind. The heavy rain with the thunderstorm also lead to a flash flood into the Rancheria Campground on the east-southeast shore of the lake. Three cars and a motorhome were flooded in the campground. Lightning strikes occurred on Kaiser Ridge above Huntington Lake during the storm.

The Frog Complex Fire in Yosemite National Park located 1 mile west of Laurel Lake was a lightning caused fire that burned 112 acres by the 29th of the month. The cost to fight the fire initially was not known but there were no injuries fighting the fire nor were any structures lost. The fire was allowed to burn well into August for resource management purposes
