Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

### CALIFORNIA, South Central

#### (CA-Z099) SE KERN CTY DESERT

10/05/07 04:32 PST	10/05/07 12:13 PST	1K	0	Strong Wind (MAX 49 kt)
--------------------	--------------------	----	---	-------------------------

#### (CA-Z099) SE KERN CTY DESERT

10/05/07 12:13 PST	10/05/07 13:13 PST	0	0	High Wind (MAX 66 kt)
--------------------	--------------------	---	---	-----------------------

A cold, mostly dry trough reached California on the 4th, and San Joaquin Valley temperatures plunging into the lower to mid 70s (a drop of 13-14 degrees from the previous day), and further cooling into the 60s the next two days. Light precipitation fell on the northern parts of the San Joaquin Valley, but stayed mainly north of Fresno. To the south, the main impact was wind, as winds occasionally gusted over 55 mph in the Kern County mountains and deserts on October 4. During the morning of the 5th winds gusted as high as 68 mph, about 10 miles northwest of Ridgecrest in Kern County. Gusty winds continued through the afternoon, with a wind gust of 76 mph reported at Indian Wells Canyon.

#### (CA-Z099) SE KERN CTY DESERT

10/16/07 10:45 PST	10/17/07 10:45 PST	0.50M	0	Dust Storm
--------------------	--------------------	-------	---	------------

The third weather system of the month of October brought only light precipitation to the region on the 16th-17th, but also brought strong wind gusts to the Kern County mountains and deserts, where gusts as high as 67 mph were recorded.

Winds gusting to around 60 mph in the Mojave area on October 16 reduced visibility to near zero, with numerous accidents reported. Peak wind at the Mojave Air/Space Port was 50 knots (58 mph) at 1847Z (1147 AM PDT) and 2046Z (1346 PM PDT). The fatal accidents occurred at 1845Z (1145 AM PDT); both involved vehicles colliding with big rigs. One accident occurred when the driver of a van reportedly made a "U-turn" in low visibility and collided with a big rig; one passenger in the van was killed. Portions of Highway 58 near Mojave were closed for about a day due to the blowing dust and sand. The two deaths that occurred during the dust storm near Mojave were indirect fatalities related to the high winds that occurred.

Also due to the high winds in the Mojave area, the roof was blown off a Public Utility District facility's two large water storage tanks.

Fatalities related to the dust storm on October 16, 2007, were the first dust storm related fatalities in the state of California since 1993, according to official Storm Data records.

#### FRESNO COUNTY --- FRESNO [36.78, -119.77]

10/12/07 13:00 PST	10/12/07 18:00 PST	50K	0	Heavy Rain Source: Newspaper
--------------------	--------------------	-----	---	---------------------------------

The second storm of the month hit Central California on the 12th as a low pressure disturbance moved through the region. Nearly all of Fresno's measurable rainfall occurred with this storm (0.14 inch — the month total was 0.15 inch), but Bakersfield only saw a trace of rain. (Meadows Field did not have any measurable rainfall in all of October 2007.) The storm on the 12th caused several car crashes and power outages during the evening in the Fresno area. Merced measured 0.63 inches of rain with this storm. A brief power outage occurred at 449 pm PDT and darkened about 3000 customers in the Fresno area.

#### (CA-Z099) SE KERN CTY DESERT

10/20/07 15:00 PST	10/20/07 19:00 PST	0	0	Dust Storm
--------------------	--------------------	---	---	------------

The fourth, and final, storm in a series of weather disturbances since October 10 in Central California, hit the San Joaquin Valley on October 20, again bringing gusty winds to the Kern County mountains and deserts, with wind gusts of up to 67 mph measured at automated weather stations. Again, only light precipitation occurred with this storm, and mainly north of Fresno.

Saturday afternoon, October 20, a dust storm occurred near Mojave and prompted highway patrol to close two heavily traveled freeways. Highway 58 was closed between exits 167 and 172 due to the severe visibility restrictions from the dust storm.

#### KERN COUNTY --- 0.9 SE FORD CITY [35.14, -119.46]

	10/29/07 18:48 PST		0	Source: Mesonet
A Mesonet station reported a wind gust of 61 knots in association with a severe thunderstorm near Yosemite National Park.				
<b>TULARE COUNTY --- LEMONCOVE [36.38, -119.02]</b>				
	10/29/07 18:49 PST		22K	Thunderstorm Wind (EG 50 kt)
	10/29/07 18:54 PST		0	Source: Trained Spotter
Trees and powerlines were downed causing power outages.				
<b>TULARE COUNTY --- LODGEPOLE [36.60, -118.73]</b>				
	10/29/07 19:00 PST		12K	Thunderstorm Wind (EG 50 kt)
	10/29/07 19:08 PST		0	Source: Park/Forest Service
The Park Service reported a few trees downed.				
<b>MARIPOSA COUNTY --- 1.3 WSW YOSEMITE VLG [37.74, -119.60], 13.2 NW YOSEMITE LODGE [37.93, -119.71], 15.7 NNE YOSEMITE LODGE [37.99, -119.51], 10.6 NE YOSEMITE NATL PARK [37.85, -119.40]</b>				
	10/29/07 19:30 PST		0	Flood (due to Heavy Rain)
	10/29/07 21:30 PST		0	Source: Park/Forest Service
The Park Service reported minor flooding of road surfaces at low water crossings.				
<b>An upper-level low developed off Point Conception by October 27, and slowly drifted northeast toward the central California coast. The low pulled a moist, tropical airmass, including remnants from former Tropical Storm Kiko, into the central California interior on the 29th. A dry air flow became trapped in the area around the storm, clearing skies over the San Joaquin Valley during the late morning, allowing for extensive heating of an already unstable airmass. Then, in the late afternoon, a weather disturbance moved over the southern half of the San Joaquin Valley.</b>				
<b>This combination of weather patterns triggered the worst severe thunderstorm outbreak over the central California interior in recent memory, with 15 Severe Thunderstorm Warnings, two Urban and Small Stream Flood Advisories, and a Flash Flood Warning issued between 4 PM and 8 PM. Another Severe Thunderstorm Warning had been issued earlier in the day, at 1:16 PM PDT, for the Sierra foothills in Madera and Mariposa counties. Hail up to an inch in diameter was reported, and flooding occurred in parts of the San Joaquin Valley, including sections of northwest Fresno and downtown Visalia.</b>				

## Storm Data and Unusual Weather Phenomena - October 2007

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

Thunderstorm activity continued into the early morning hours of October 30, as a cold front moved through central California. A strong push of cold air into the region dropped the high temperature at Fresno from 80 on the 29th to 68 on the 30th. Bakersfield saw even stronger cooling, from 84 on October 29th to 63 the next day, a 21-degree cooling.

Severe thunderstorms caused several reports of downed power lines and trees, large hail, and flash flooding throughout portions of the San Joaquin Valley.
