Summary of Impacts

Links: See/submit [Condition Monitoring Observer Reports \(CMOR\)](#) and view the [Drought Impacts Reporter](#)

Hydrologic Impacts

- There are no known impacts at this time

Agricultural Impacts

- There are no known impacts at this time

Fire Hazard Impacts

- See the latest [IDHS Burn Ban Status Map](#) for remaining burn bans

Other Impacts

- There are no known impacts at this time

Mitigation Actions

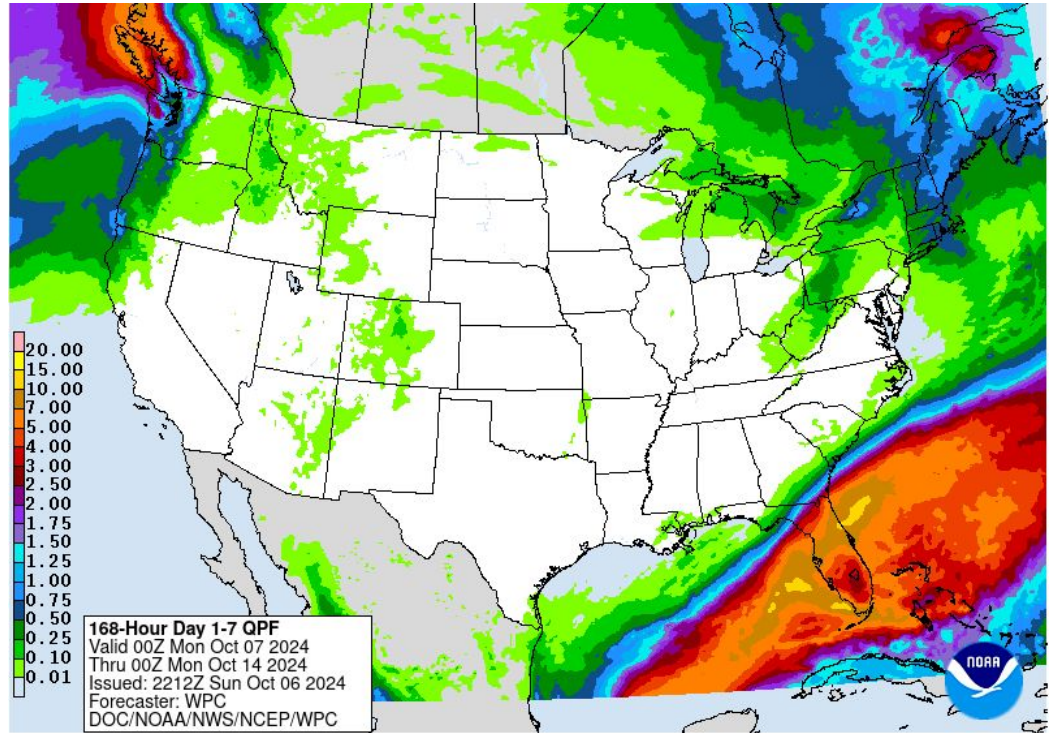

- None reported

Seven Day Precipitation Forecast

- No rain is expected within the next 7 days.
- Drought conditions may worsen.

Drought Outlook

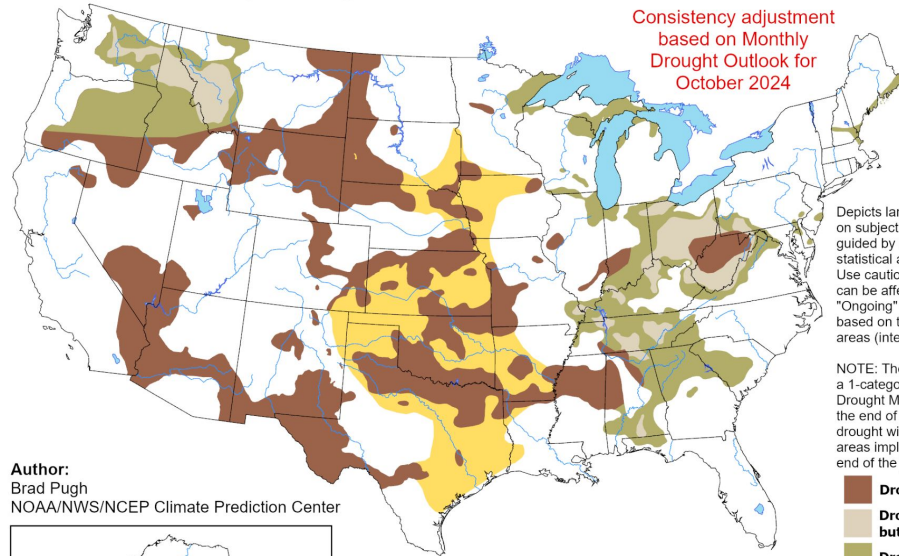

The latest monthly and seasonal outlooks can be found on the [CPC homepage](#)

- Drought conditions are favored to improve over much of the forecast area through the remainder of the calendar year.

U.S. Seasonal Drought Outlook Drought Tendency During the Valid Period

Valid for October 1 - December 31, 2024
Released September 30, 2024

Consistency adjustment
based on Monthly
Drought Outlook for
October 2024

Depicts large-scale trends based on subjectively derived probabilities guided by short- and long-range statistical and dynamical forecasts. Use caution for applications that can be affected by short lived events. "Ongoing" drought areas are based on the U.S. Drought Monitor areas (intensities of D1 to D4).

NOTE: The tan areas imply at least a 1-category improvement in the Drought Monitor intensity levels by the end of the period, although drought will remain. The green areas imply drought removal by the end of the period (D0 or none).

- Drought persists
- Drought remains, but improves
- Drought removal likely
- Drought development likely
- No drought
