 Other NWS Partners, Users and Employees

From: Michelle Mainelli
 Chief, Systems Integration Branch
 NCEP Central Operations

Subject: Soliciting Comments until December 31, 2010, on the Experimental Model Analyses and Guidance Website

The National Centers for Environmental Prediction (NCEP) is seeking user comments on the new experimental Model Analyses and Guidance (MAG) website, located at:

<http://mag.ncep.noaa.gov>

The MAG website showcases the NWS suite of graphical numerical model analyses and guidance and observational database. The experimental MAG was made available in June 2010. We are seeking public comment through December 31, 2010. Comments on the MAG may be provided at:

<http://www.weather.gov/survey/nws-survey.php?code=NCEP-MAG>

The MAG is an upgrade of the current experimental NCEP Model Analysis and Forecast (MAF) site located at:

<http://www.nco.ncep.noaa.gov/pmb/nwprod/analysis>

Following a successful review and comment period, the MAG will become operational and the experimental MAF site will be discontinued.

More details about the MAG can be found in the Product Description Document (PDD) located on the front page of the MAG website.

For technical questions/comments about the MAG, please contact:

Bradley Mabe
NCEP/NCO Systems Integration Branch
Camp Springs, MD
mag.helpdesk@noaa.gov
