

Xerox® EX-P 5 Print Server Powered by Fiery®

XEROX® IGEN® 5 PRESS

Unsurpassed Speed and Performance

The powerful Xerox® EX-P 5 Print Server, driving the Xerox® iGen® 5 Press, features HyperRIP, a unique parallel-processing technology that enables blazing-fast RIP speeds. Two HyperRIP modes (for single and multiple jobs) optimize job processing speed to help achieve uninterrupted production and higher profits.

DRIVE NEW REVENUE WITH A FIFTH STATION

Make a bold, high-value impression on any digital print with Clear, White, or Fluorescent Yellow Dry Ink options. Or, add Orange, Green, or Blue Dry Inks as a fifth color to expand your press's gamut, allowing you to match more critical brand colors. Built-in features such as Fiery® ImageViewer and Fiery® Spot Pro make it easy to manage any fifth station option throughout your workflow.

OUTSTANDING COLOR ACCURACY

Get the best out-of-the-box color consistency and accuracy with Fiery color management tools. Fiery Color Profiler Suite allows you to G7® calibrate your Fiery Driven™ iGen 5 Press to ensure color accuracy throughout print runs and across multiple printers. ICC output profiles are created on the pre-calibrated press for better gray balance.

OPTIMIZE WORKFLOW EFFICIENCY AND PRODUCTIVITY

Fiery Command WorkStation® centralizes job management and makes getting jobs out the door faster and more efficient. Easily drive multiple presses from one interface and manage multiple jobs simultaneously from a Mac® or Windows® client for maximum productivity. Fiery Impose-Compose offers intuitive, visual document preparation and simplifies labor-intensive assembly. Easily use imposition templates with an automated job submission workflow to reduce touchpoints and errors.

AUTOMATE WITH SEAMLESS INTEGRATION

The EX-P 5 Print Server integrates with technologies such as Xerox® FreeFlow® Digital Workflow Collection plus EFI™ MIS/ERP business software and leading prepress workflows. Boost productivity and profitability by using Fiery JDF technology or the Fiery API to automate and integrate your business and print processes.

The integrated Fiery Smart Estimator allows you to estimate your Specialty Dry Ink usage before you print a single page.
