COMMENT: Sun Mar 27 17:24:33 GMT 1994

Clear, cold, south breeze.

LowL crashed. Looks like it stopped at 23:50 yesterday. Will go through the standard recovery to restart as soon as other systems get going.

COMMENT: Sun Mar 27 17:38:18 GMT 1994

LowL rebooted, boot interrupted, deleted protection file in \log, new tapes loaded, system rebooted again as SOP. System restarted OK, quad cells acquired sun, tape 0 writing on L00016.

L00014 and L00015 removed, write protected, and will be sent back to Boulder, probably empty.

COMMENT: Sun Mar 27 17:43:01 GMT 1994

Outside temp 9.8 degrees C.

DPMON COMMENT: Sun Mar 27 17:58:42 GMT 1994

Limb image looks overocculted. Will stop to make a few adjustments.

Sun Mar 27 18:00:03 GMT 1994: Patrol End

DPMON COMMENT: Sun Mar 27 18:03:26 GMT 1994

Adjusted bench +2.4 degrees to get occulting stem at eyeball south.

DPMON COMMENT: Sun Mar 27 18:33:45 GMT 1994

Occulting disk #3 was in limb position (1991). I don't know if and when that happened while we were logging in 1971. Tried several occulters and rotated heat-dump mirrored pre-disk. None of those trials got rid of ring.

SetOccultingDisc at 1971 -- For real this time.
