COMMENT: Fri Apr 1 17:33:47 GMT 1994  
Clear sky, light wind from the west, temp=50 F.

NOTE: This is the second time I started up the DPMon, the first time I got  
as far as entering the occulting disk size and the program crashed.  
It wouldn't respond to any keyboard input, I restarted everything.

Fri Apr 1 17:36:18 GMT 1994: Patrol Start

DPMON COMMENT: Fri Apr 1 17:53:31 GMT 1994  
First scans of the day are bad, diffuser was in. If the Patrol program is  
ended the day before during a calibration with the diffuser in then when we  
start the Patrol program the next day it doesn't move the diffuser out but  
it shows the Objective field status as Clear. A small program change is  
needed.
