

Mauna Loa Solar Observatory Observer's Log

Mon Jun 6 17:14:07 GMT 1994
Year: 94 Doy: 157
Observer: koon

Well this isn't the log I wrote for today, somehow I goofed and concatenated the wrong log and deleted the wrong log in between one of the crashes.

Basically I took some images with the DPMON at initial settings of O2B mike at 4.300 mm, with the hr filter in on the 0.8" Lyot stop and these were saved to tape. Then I did some focus testing and saved the images to the data directory for inspection.

The MKIII ran fine.

Lots of passing clouds today.

Following the new SOP for the Low-1, I stopped the program and R+R tapes.

COMMENT: Tue Jun 7 02:50:29 GMT 1994
Activity report:
QP: 53; 83; 280-290; 305-320.
No coronal activity.

TAPES:

MKIII: H00770

DPMON: P00074, P00075

LOW-L: L00055 removed from drive #0, L00056 installed, using new SOP will quit lowl program every 2 days and start a new tape.

Tue Jun 7 02:54:24 GMT 1994: Filemark
