

Mauna Loa Solar Observatory Observer's Log

Sat Sep 10 16:55:17 GMT 1994

Year: 94 Doy: 253

Observer: koon

WEATHER COMMENT: Sat Sep 10 16:55:24 GMT 1994

Medium to thick altocumulus clouds, wind ~5 mph from the south, temp ~45 F.

No observing possible yet.

COMMENT: Sat Sep 10 21:58:33 GMT 1994

#####

Chu relieving koon at obs

#####

Still in a thick layer of altocumulus. Patches of blue sky to west.

Orographic clouds also rising in west. Will wait and see if obs

possible today.

WEATHER COMMENT: Sun Sep 11 01:36:16 GMT 1994

Altocumulus clouds have moved on. Orographic clouds opening

up enough to see a solid layer of cirrostratus above.

WEATHER COMMENT: Sun Sep 11 02:29:30 GMT 1994

Orographic clouds receding. Thick layer of cirrus extending across

the western horizon. Chances of getting data for remainder of day

is poor. No good data for the entire day.
