Under solid deck of orographic clouds. Saw an extensive  
deck of cirrostratus above orographic clouds on my drive  
up. Informed by DAK that chances for getting data today  
are poor. Will wait and see.

LOW-L COMMENT: Sat Oct 29 23:50:30 GMT 1994  
Low-l just crashed. Will reboot and recycle current  
tape (L00125), since no good data retrieved today.
