

Mauna Loa Solar Observatory Observer's Log

---

Fri Jan 6 17:31:33 GMT 1995

Year: 95 Doy: 006

Observer: yasukawa

WEATHER COMMENT: Fri Jan 6 17:31:56 GMT 1995

Cold, in extensive cirrus overcast, southwest wind. Temp=42F.

COMMENT: Fri Jan 6 17:33:02 GMT 1995

Observations doubtful today. Standing by for a while.

LOW-L COMMENT: Fri Jan 6 18:11:57 GMT 1995

Spare smartfan board arrived for checkout. Today would be a good day to do the swap, but as HKH message indicates there is a good possibility of crashing the computer, I have decided to wait for the LOWL to go thru another couple of tape swap cycles first to complete testing of the software fix on the tape-swap crashes.

WEATHER COMMENT: Fri Jan 6 19:55:07 GMT 1995

Cirrus still extensive, getting thicker.

No observations today.
