LOW-L COMMENT: Mon Mar 20 17:31:32 GMT 1995

Instrument pointing in wrong place, straight up instead of to the east, I will cycle the spar power and restart the program as I did to fix it the last time this happened, instrument is tracking and taking useless data now. Also, the flexible hose to the instrument head has cracked and seperated again near the clamp at the head, I'll try to fix it.

LOW-L COMMENT: Mon Mar 20 19:48:10 GMT 1995

Still no success with the pointing, the HA appears to be 90 degrees off, its pointing to the west right now. The screen shows the actual coordinates that it is pointing to, so the ephemeris is probably at fault. I may have to call Boulder for help with this.
