

Mauna Loa Solar Observatory Observer's Log

---

Mon Mar 27 17:52:23 GMT 1995

Year: 95 Doy: 086

Observer: koon

WEATHER COMMENT: Mon Mar 27 17:52:27 GMT 1995

Thick cirrostratus overcast, no wind, temp=38 F.

COMMENT: Mon Mar 27 17:53:30 GMT 1995

Today is overcast as was yesterday, haven't been able to do the second part of the Artifact Scan Test because of bad weather since Saturday. I will work on a few things here at the observatory then I will work on some projects at the office in Hilo later today.

LOW-L COMMENT: Mon Mar 27 18:06:26 GMT 1995

The lowl crashed shortly after I left on Saturday, restarting program.

LOW-L COMMENT: Mon Mar 27 19:59:53 GMT 1995

Cleaned the entrance window of the dust from recent road construction nearby. Patched up the new tear in the flexible hose that houses the cables going to the head, I had temporarily taped it until I got some free time to patch it nicely as I did today.

WEATHER COMMENT: Mon Mar 27 20:02:30 GMT 1995

Still have a thick cirrostratus overcast, no observations today.
