NOAA said the router in Hilo wasn't the problem, maybe the router at their observatory was at fault. There was a island-wide power outage late Saturday, maybe this was preceded by power problems that affected the router earlier in the day. Between the recent power outages and mandatory water restrictions maybe people will start seeing the value of having their own water catchment and alternate power systems ;)

WEATHER COMMENT: Mon Apr 24 22:32:58 GMT 1995

Clouds and wind are just getting worse, no observing today.
