Came up to retrieve motors to attempt disassembly in Hilo.

Also had to unwind GONG site survey instrument and load tapes into LOWL--you know, all the support stuff that supposed to be of minimum impact, like 5-10 minutes every few days.

COMMENT: Tue May 16 19:20:06 GMT 1995

Guider still down, Howard is still trying to acquire a replacement.

No observations.

Tapes: LOWL: L00238

L00237 removed from unit 0 and L00239 loaded.`
