WEATHER COMMENT: Fri Sep 1 16:53:10 GMT 1995

Thick cirrostratus overcast, wind=5 mph from the South, temp=45 F.

LOW-L COMMENT: Fri Sep 1 17:11:46 GMT 1995

Removed L00302 and L00303 from drives and installed L00304 in drive #0 and L00305 in drive #1. Some data missed this morning due to the tapes being filled in both drives by yesterday evening.

LOW-L COMMENT: Fri Sep 1 19:54:49 GMT 1995

Dropped the heater setpoint one more degree to 26 C, at Steve's request. The West2 temp has been in the yellow more than red lately so maybe this will move it into the green as it should be.

COMMENT: Fri Sep 1 23:54:04 GMT 1995

No observing due to clouds.
