LOW-L COMMENT: Thu Sep 21 16:57:28 GMT 1995

L00314 popped. L00315 also popped this morning from unit 1.  
Had to cycle drive power before tape would stay in, kept  
popping out as soon as door closed. Loaded L00316 into unit 0.  
LOWL operated normally after that.

Read HELCO meters today.

MKIII COMMENT: Thu Sep 21 17:36:39 GMT 1995

I think I just recorded an I dropout at approximate PA 350.  
Did this by monitoring CORONA after setting display to  
ILOOK and 40 MAGNIFY, and monitoring during most likely  
time of occurrence.

Thu Sep 21 18:00:02 GMT 1995: Calibration

MKIII COMMENT: Thu Sep 21 18:02:28 GMT 1995

Returning display to QLOOK, 80 MAGNIFY to resume coronal  
monitoring and calibration.

LOW-L COMMENT: Thu Sep 21 18:04:15 GMT 1995

LOW-L COMMENT: Thu Sep 21 18:31:56 GMT 1995

COMMENT: Thu Sep 21 21:28:28 GMT 1995  
Uncanny, huh? Guider waited until I left the control room,  
then recentered itself. Returned from GONG and repointed spar  
then reset guider.

Thu Sep 21 22:05:05 GMT 1995: Patrol End
