

Mauna Loa Solar Observatory Observer's Log

Fri Nov 3 17:15:48 GMT 1995

Year: 95 Doy: 307

Observer: koon console Nov 3 17:13

WEATHER COMMENT: Fri Nov 3 17:15:54 GMT 1995

Thick altocumulus layer with medium to thick cirrostratus layer above, wind=20 mph from the South, temp=35 F.

LOW-L COMMENT: Fri Nov 3 17:25:24 GMT 1995

Crashed yesterday at 18:27:00 with the instrument head pointing down in the stowed position, probably crashed due to power problems associated with the thunderstorms we had yesterday. I left the same tapes in the drives and reset the computer.

COMMENT: Fri Nov 3 20:09:10 GMT 1995

Clouds aren't clearing, no observations.

TAPES:

LOW-L: L00339 in drive #0.

Fri Nov 3 20:09:55 GMT 1995: Filemark
