Content-Length: 930

X-Lines: 30

Status: RO

WEATHER COMMENT: Sun Jan 28 17:26:24 GMT 1996

Cold, still under heavy cirrus and altostratus overcast, no wind.
Only patches of snow left on ground around station, snow covering
higher elevations.

LOW-L COMMENT: Sun Jan 28 19:49:07 GMT 1996

L00370 popped out today, LEDs started flashing during 370's tenure
so I am cleaning drive before installing L00371.

LOW-L COMMENT: Sun Jan 28 20:08:00 GMT 1996

Noticed that the black plastic flexible cable conduit was broken in
two places -- it has happened before. Repaired breaks with an
underlayer of duct-tape and a covering layer of aluminum tape.

Foam insulation covering air ducts is deteriorating on east side.
Looks like erosion from driven sleet, maybe. recovering where
necessary.

WEATHER COMMENT: Sun Jan 28 21:10:05 GMT 1996

Heavy overcast continues. No data.

COMMENT: Sun Jan 28 21:10:36 GMT 1996
