WEATHER COMMENT: Sun Feb 25 17:50:43 GMT 1996

In heavy clouds, Slushing heavily, approximately 2 inches of slushy snow on the ground. Road very slick, parked car about 2 miles down the road and walked up to check if any water was getting into the building. Only water that I tracked in as snow on my shoes and clothes. Strong southwest wind driving snow. I can see cirrus or altostratus overcast thru thin spots in low cloud. Heading down before my car gets snowed in.
