Electrical interference in the Kodak camera due to a broken pin on the camera interconnect cable.

Images are therefore dominated by horizontal stripes. Despite this... There is a nice South polar hole skewed to the west. North hole does not show up in this junky image. Three Active regions in the west.

CHIP Comment--Fri Apr 19 19:23:05 GMT 1996

Summary of CHIP. Sent two ftps.

Electrical noise

Off-pointed and centered 2.6mm in y and 1.9mm in X
using O1. this is too far.

Focus was 21000 which looked OK.

CHIP is still being worked on, there is a problem with the images being noisy.

MKIII is shut down now although we did get data earlier.
