
Mauna Loa Solar Observatory Observer's Log

Mon May 20 17:01:37 GMT 1996

Year: 96 Doy: 141

Observer: koon

WEATHER COMMENT: Mon May 20 17:01:50 GMT 1996

Thick vogy haze below, medium to thick cirrocumulus above, wind=10 mph from the South, temp=48 F.

CHIP COMMENT: Mon May 20 17:04:37 GMT 1996

Took 5 tries to get the program to start with the "Run" command, kept getting message that MCC wasn't ready.

WEATHER COMMENT: Mon May 20 17:05:44 GMT 1996

No observations until Spar can track steadily.

Mon May 20 17:15:24 GMT 1996 CHIP CHIP Start Patrol

Mon May 20 17:16:22 GMT 1996 dPMon Start Patrol

WEATHER COMMENT: Mon May 20 17:16:36 GMT 1996

Clouds getting thin enough to track the sun, will start some observations.

MKIII COMMENT: Mon May 20 17:17:38 GMT 1996

Too much cirrus to get data, will hold off on starting obs program.
